

**CENTRAL POLLUTION CONTROL BOARD
ZONAL OFFICE (SOUTH), BENGALURU**

Training Report on “Environmental legislations: interpretation, enforcement, legal & statutory requirements –case studies” conducted during February 8th - 12th, 2016 by National Law School Institute of India University, Bengaluru

Environmental Training Unit (ETU) of Central Pollution Control Board, Delhi organizes residential training programmes of 3 to 5 days duration through various reputed training institutes every year to the officials of CPCB working at Zonal Offices & Headquarters with the objective to develop the knowledge, skill and performance of the officials.

In view of above, the undersigned was nominated from Zonal Office, Bengaluru to participate in five days training programme on “Environmental legislations: interpretation, enforcement, legal & statutory requirements –case studies” conducted during February 8th - 12th, 2016 by National Law School Institute of India University, Bengaluru.

The training programme was conducted by National Law School Institute of India University, Bengaluru which is recognized as reputed university for legal education. Five days training programme was scheduled with various agenda items that covered different topics of Environmental legislations. The training also covered the case studies wherein the two case studies were given at the end of the day as homework and the same was discussed in next day session using existing laws.

The training programme was very much informative in upgrading the knowledge on Environmental legislations, recent amendments etc. The training was useful in interpreting the case as regulatory and implementing bodies. The training programme enlightened the different types of existing national and international legal and regulatory frameworks. Hands on exercise in solving problems (case studies) were very much useful in understanding and interpretation of different legal cases related to environmental fields.

The knowledge gained from this training programme will be completely utilized and applied in resolving day to day legal issues.
