CENTRAL POLLUTION CONTROL BOARD, DELHI

Dated: 08.03.2021

Status report in the matter of Kulwinder Singh Sandhu & Ors. Vs Ram Murti & Ors. (OA no. 465/2019).

1.0 Background

Hon'ble NGT vide order dated May 13, 2020 in OA 465/2019 directed as follows:

"The CPCB may issue at least interim Guidelines on the subject by way of Directives to the State PCBs/PCCs considering the studies available and seek action taken reports by way of monitoring. The State PCBs/PCCs may ensure compliance of the directions issued by the CPCB and compliance reports be furnished to the CPCB. The CPCB may in turn file a comprehensive compliance report before the next date."

2.0 Action Taken:

2.1 Guidelines for Carcass Management:

- CPCB had prepared draft Guidelines for Carcass Management based on available information.
- The document was sent to all SPCBs/PCCs, Ministry of Housing & Urban Affairs, Central Leather Research Institute (CLRI) and Department of Animal Husbandry for their comments vide letter dated October 01, 2020.
- The draft Guidelines was also uploaded on CPCB website for inviting comments on the document.
- Comments have been received from MoHUA, CLRI, 3 SPCBs/PCCs (Bihar, Punjab and Lakshadweep).
- Guidelines for Carcass Disposal have been finalized based on the inputs provided from various organizations and is placed at **Annexure I** and it is also uploaded on CPCB's website.
- Final Guidelines for Carcass Disposal was sent to all SPCBs/PCCs vide letter dated December 17, 2020.

2.2 Compliance Report from SPCBs/PCCs

- CPCB has issued letters dated December 17, 2020 and February 11, 2021 respectively to all SPCBs/PCCs to provide information in prescribed format regarding compliance of requisite facilities for carcass disposal as per guidelines by the concerned authorities. (**Annexure II**)

- Required information on the matter has been received from 15 SPCBs/PCCs (Bihar, Delhi, Himachal Pradesh, Jammu & Kashmir, Karnataka, Mizoram, Maharashtra, Nagaland, Tripura, Tamil Nadu, Uttar Pradesh, Gujarat, Uttarakhand, Telangana & Sikkim). Uttarakhand, Telangana have not provided information as per format. However, some of the states such as Maharashtra and Karnataka have not provided information for all ULBs.
- The information has been compiled and placed at **Annexure III**.

2.3 Conclusion

- i. Total 399 ULBs in 12 states namely Bihar, Delhi, Gujarat, Himachal Pradesh, Jammu, Kashmir, Karnataka, Mizoram, Nagaland, Tripura, Telangana, Uttarakhand and Uttar Pradesh have identified Carcass disposal sites. Whereas no disposal sites have been identified in the states namely Tamil Nadu, Sikkim, Maharashtra. Impetus required for promotion of site identification in the States & UTs.
- ii. 20 States/UTs namely Andhra Pradesh, Arunachal Pradesh, Assam, Chhattisgarh, Goa, Haryana, Jharkhand, Kerala, Madhya Pradesh, Manipur, Meghalaya, Odisha, Punjab, Rajasthan, West Bengal, Andaman & Nicobar, Dadar and Nagar Haveli and Daman diu, Lakshadweep, Chandigarh have not submitted compliance report regarding compliance of requisite facilities for carcass disposal as per guidelines.
- iii. In 90% of the ULBs (368/399) in 10 states namely Bihar, Gujarat, Himachal Pradesh, Jammu, Kashmir, Mizoram, Nagaland, Tripura, Telangana, Uttarakhand and Uttar Pradesh Carcass is being disposed through "Deep Burial Method". However, Crusher Anaerobic digester method have been adopted at one ULB in Gujarat, Dry Carcass rendering have been adopted at one ULB in Delhi, pit composting have been adopted at seven ULBs in Karnataka and incineration technique have been adopted one ULB in Bihar and one ULB in Gujarat for carcass disposal.
- iv. Authorization have been issued to 30 ULBs by SPCBs/PCCs in 8 states namely Bihar, Delhi, Gujarat, Jammu, Kashmir, Karnataka, Mizoram, Uttarakhand and Uttar Pradesh.
- v. 9 states namely Bihar, Delhi, Gujarat, Jammu, Kashmir, Himachal Pradesh, Karnataka, Mizoram, Nagaland and Tripura are having disposal sites which are complying with the stipulated norms.
- vi. States/UTs are required to take necessary action for implementation of above guidelines.

Guidelines for Carcass Disposal

	I	CSIR-CLRI Technology for Collection of fallen Carcass and its Utilization

1.0 INTRODUCTION

In India large number of cattle die of natural causes in villages and municipal areas every year. However, there is no organized and scientific system for the disposal of carcasses, in the absence of which, it has become a major environmental hazard. In most cases, whereas the hides are removed for leather, the remaining carcass is left to putrefy in open without any control resulting in highly repellent stench permeating into surrounding atmosphere. As no enclosure is provided, vultures and dogs are attracted to such sites polluting the environment and creating health hazards and can also cause air accidents.

Further, it is mandatory under Prevention and Control of Infectious and Contagious Disease in Animal Act, 2009 to dispose-off the fallen animals/carcasses properly. This Guideline outlines available methods for carcass disposal, the related environmental issues, the required pollution control measures to be implemented and the way forward to address issues related to carcass disposal in the country.

2.0 Current practices of carcass disposal

2.1 Carcass utilization plant:

Utilization of dead animals has many benefits. According to one estimate among dead animals 30% of cattle, 20 % of buffaloes, 46% goats and 50% sheep on an average are not flayed and 9 million bovine hides and 9 million ovine and caprine skins are lost annually due to non-recovery in India . After flaying, carcasses of dead animals can be processed to produce valuable meat-meal, bonemeal and technical fat. These products have good demand as feed ingredients of poultry and dairy animals. The economic utilization of dead animals, is imperative to reduce the spread of diseases. It also reduces the feed grounds for vultures and saves aircraft from bird hits. However, factors such as social, economic and climatic conditions as well as lack of technical knowhow and efficient processing machinery have hampered efficient utilization of carcass utilization in the country.

Carcass Utilization involves integrated utilization of all tissues of fallen carcass for value added product which find application in animal feed/leather industry/fertilizer/chemical Industry . The process includes lifting of fallen animals, flaying, preservation of hides and skins, rendering (cooking) of the flayed carcass, preparation of meat meal, bone meal, tallow, besides treatment of effluent waste water and conversion of rumen contents into manure. Machinery/Equipment used in the process includes flaying tools, wet rendering cooker, meat mincer, bone crusher, drier and pulveriser, transportable flaying and lifting device

2.1.1. Production Process

Rendering involves removal of hides/skin at the flaying yard from the Carcass, separation of rumen contents and horns and hooves. The rest of the animal body consisting of flesh, tissues and bones is cooked in a cooker for obtaining tallow and cooked meat and bones. Limited amount of water is added in the cooker for the production of steam. The separation of cooked meat from bones is carried out manually. The separated bones are crushed in the bone crusher for obtaining bone meal. The separated cooked meat is generally sun dried. However, during rainy season this meat is first minced in the meat mincer and then dried in a rotary drier. The dried meat is pulverized in the pulverizer for producing meat meal. The meat meal can also be mixed with bone meal for making meat cum bone meal.

Rendering is essentially done in dry or wet process. In a wet rendering process, steam enters the rendering tank, along with the biomass. In dry process, steam is confined in a jacket that surrounds the tank containing the material being rendered. The dry rendering process yields are 20 per cent higher than the wet rendering process as the water soluble extractive and proteins suspended are not discarded. In other words in dry rendering process, the meat and bones are cooked in its own fluid and

fried in its own fat. As the yield is in dry rendering is higher, it should be adopted wherever feasible

The slurry containing tallow is collected into an open pan from the rendering vessel. It is allowed to cool so that fat will solidify on the top layer. Fat is scooped off and collected in a separate vessel. There are impurities such as water with soluble proteins and some minerals. Hence the fat containing water and other impurities is cooked in an open pan by adding alum and salt. Water is evaporated and then purified tallow is collected.

The process flow chart is given in figure 1.0

Figure 1.0 Carcass utilization plant

2.1.2 Carcass Utilization Products: 3 main products are obtained from this technology:

- a) **Tallow or fat** is obtained by 'clarifying' fatty tissues and from the cooker, the former being white superior grade and the

latter slightly yellowish. These are familiar products and find a ready market in soap-manufacturing.

- b) **Meat Meal** is a protein-, vitamin- and mineral-rich material used as a supplement in poultry feed. It is completely sterile and free from pathogens since it is processed at high temperatures. It is a valuable substitute for fish meal since it is much cheaper and also eliminates need for some other additives. Meat meal can also be used as Pig Feed.
- c) **Bone Meal** is rich in phosphorous and calcium, is famous as fertilizer especially for horticulture, floriculture and home gardens. Bone meal is also an extremely beneficial supplement in poultry feed for both layers and broilers. It is also a powerful nutritional supplement in the growth phase of dogs.

2.1.3 Equipment & Machinery

- (i) **Carcass cooker;** Carcass cooker is a pressure vessel to operated at a pressure of 35-40 psi. The Cooker handles one large carcass (250 Kg) at a time, larger capacity vessels not being preferred since the timing of carcass arrivals is unpredictable and each carcass should be processed immediately on arrival to prevent putrefaction.. At least 2 Cookers are recommended for each unit for reasons as above. Overhead rails, trolley, chain and pulley etc for loading and unloading Cookers are provided for convenient material handling. The Cookers are to be installed on platforms with grates, chimney, dampers etc. for operating with biomass fuels.
- (ii) **Meat Mincer:** This medium-duty motorised machine with SS body is for mincing the cooked meat emanating from the Cooker. It is supplied with extra plates for different output sizes.
- (iii) **Bone Crusher:** This machine powders the digested bone from the Cooker to yield bone meal.

- (iv) **Vibratory Sieve:** This sieves the Bone Meal to desired size as per user specifications.
- (v) **SS Tallow Clarification Vessels:** Tallow tapped off from the cooker is clarified in SS vessels.
- (vi) **SS Drying Tray:** Cooked and minced flesh is gently dried on SS trays over an open hearth to yield Meat Meal.

Other equipments

The following other items are also required in the plant :

- Flaying Bed
- Hoist with chain & pulley
- Cleaver, knives, apron, handtools etc
- Wheel barrows
- Tallow Storage SS bins
- Balance (500 kg.)

2.1.4 Essential requirement for setting up of carcass utilization plant

- **Raw Material availability:** At least 4-6 carcasses should be available in a radius of 6-8 kilometers per day for viable operations.
- **Infrastructure:** Adequate water supply should be available
- **Logistics :** Vehicle for transportation of carcasses is needed
- **Workshed :** A covered area of about 1200-1500 sq. ft. is required

"CSIR-CLRI Technology for Collection of fallen Carcass and its Utilization" is enclosed at Annexure I

2.2 Incineration: -

Incineration is the thermal destruction of carcasses by auxiliary fuel such as diesel or natural gas etc. or by using electric energy. It reduces carcasses to ash and is generally bio-secure.

This technology can be applied as:

- fixed, whole-carcass incineration,
- mobile air curtain whole carcass incineration,
- municipal incinerators,

Fixed whole carcass incineration occurs in an established facility in which whole carcasses or carcass portions can be completely burnt and reduced to ash. This process is normally fuelled by natural gas.

Mobile air curtain whole carcass incineration is a mobile system which can be taken on-site. Whole carcasses can be burnt and reduced to ash using wood as a fuel. Because it can be used on site, there is no requirement for transportation of the animal material. It also produces effective inactivation of pathogens and may actually achieve higher temperatures (1000 deg.C).

Municipal incinerators are pre-established facilities which are normally used for the burning of household waste. Although they may not be currently licensed to burn carcasses, use of these facilities allows an expanded capacity for effective inactivation of pathogens.

2.3 Deep Burial: -

Burial is a method in which carcass is buried in the ground. It is a common and oldest method of carcass disposal and requires thoughtful selection of the burial site. After deep burial, carcass is covered with slaked lime, bleaching powder and crystal salt to address environmental issues related to deep burial.

2.4 Other methods

Other methods of disposing carcass include pyre burning, composting etc.

3.0 Environmental Issues associated with Carcass Disposal Methods: -

Environmental issues associated with different carcass disposal methods are mentioned below:

3.1 Rendering:

Environmental issues related to carcass rendering process are odour as well as trade effluent generated from various process steps followed for rendering. Besides, solid waste is generated from the Effluent Treatment plant

3.2 Environmental issues of Incineration: -

Environmental issues related to incineration are emission of flue gases causing air pollution and disposal of remaining solid waste.

3.3 Environmental issues of Deep Burial: -

- Deep burial may cause soil contamination if pathogens inactivation is not carried out.
- It can also lead to ground water contamination, particularly in cases where ground water table is shallow.

3.4 Pyre burning

Scientific analysis is required to assess environmental impact due to burning with focus on increased dioxin levels and groundwater contamination.

4.0 Control Measures:

4.1 Transportation of Carcasses to Disposal Site: -

- i. Separate system should be instituted for collection of carcass.
- ii. The transport of materials must be carried out by vehicles, which are easy to clean and disinfect. The bottom of the vehicles must be water proof to prevent infective material or liquid from leaking out during transportation
- iii. It should not be overloaded - half a metre or more (depending on distance to be travelled and temperature) should be left clear for expansion of carcasses.
- iv. Carcasses should not be slashed before loading. Vehicles should travel slowly to avoid splashing of contaminated material.
- v. Staff should carry a supply of an approved disinfectant and basic equipment to deal with minor spills during a journey.
- vi. The diseased animal should not be touched without protective clothing and gloves
- vii. All vehicles must be cleaned and disinfected before leaving the premises and after unloading.
- viii. The quantity of wash water generated during cleaning of vehicles should be connected to Effluent Treatment Plant (ETP) only and should not be allowed to discharge directly on land

4.2 Carcass utilization plant

- i. The parameters of concern in the effluent generated from a carcass utilization in the effluent include BOD , COD,TSS & O&G. The effluent is biodegradable and a combination of anaerobic and aerobic treatment system or two stage aeration system may be adopted for treatment of the effluent. O&G Trap is to be essentially provided to treat the effluent generated from the plant. Disinfection method using chlorination should be adopted for treatment of effluent prior to discharge . Effluent generated from various process steps to be treated in ETP and treated effluent should comply with Standards for water pollutants notified under E(P) Act, 1986 or as may be prescribed by SPCBs/PCCs.
- ii. The operations in the rendering plant release a huge amount of steam. Without proper ventilation, the working conditions may become incongenial. Therefore, the building should be well ventilated.
- iii. The rendering plant emits a large quantity of obnoxious gases, since it handles dead, even decomposed animals also. In such cases, it is preferable to have one of the following arrangements for reducing the odour.
 - a) Pass the fumes from the rendering vessel into the boiler stock where they are burnt and dispersed.
 - b) Disperse the hot vapors in cooling water where they are dissolved and discharged into the effluent disposal system. The equipment is called condenser
 - c) Chemical treatment like chlorination or absorption by activated carbons.
 - d) Generally, dry rendering equipment produces much less offensive odours than wet rendering.
- iv. The sludge generated from the ETP has to be dewatered and disposed-off properly, as per directions of respective state pollution control boards. Also the process solid waste generated from the

- carcass utilization plant has to be properly treated/ disposed-off, after recovery of valuable products.
- v. As personnel hygiene is important, arrangement must be made for the workers to wash and change clothes while leaving the plant after their work is completed.
 - vi. The room for salting and storing of hides must be easy to clean and disinfected. The floor and walls should be covered with tiles and sewerage for waste water should be provided.
 - vii. To minimize the danger of infection, it is necessary to keep the hides in salted condition for at least for 14 days before delivery to the tannery.
 - viii. Precautions must be taken to prevent the entry of animals and birds to this section.
 - ix. The various units of the plant should be so chosen so as to provide a continuous uninterrupted flow of operations between each individual unit of equipment without exposing the materials to air contamination. Wherever possible, a covered screw conveyor may be installed to transport any material from one point of processing to the other.
 - x. The carcass utilization should be operated under the supervision and control of Veterinary/Animal Husbandry Department of the State and the Local Bodies

4.2 Measures to be taken for Incineration:-

- i. Complete combustion of carcasses to be ensured.
- ii. Air pollution control devices should be installed and the emission from incinerators should comply the General Emission Standards mentioned under Standard for incineration section in SWM Rules,2016

4.3 Measures to be taken for Deep Burial:-

- (i) It is crucial to select a site which is well-protected from people and scavenging animals. General factors to be considered are:
 - Accessibility to disposal site by heavy transport vehicles;

- Nature of soil/rock formation in the available area;
- Level of water table: The deep burial site should be relatively impermeable and no shallow well should be close to the site. The ground water table level should be a minimum of six meters below the lower level of deep burial pit
- Proximity to habitation and water catchment areas, bores and wells: The pits should be distant from habitation, and sited so as to ensure that no contamination occurs of any surface water or ground water. The area should not be prone to flooding or erosion
- Presence of services such as water, gas, electricity, telephone lines, drainage, sewerage and other improvements or structures, including aerial lines;

The location of the deep burial site should be authorised by the prescribed authority.

- (ii) A pit or trench should be dug about 2 meters deep. Lime should not be placed directly on carcasses, because in wet conditions it slows and may prevent decomposition. A layer of 10 cm of soil shall be added to initially cover the wastes. The pit should be half filled with waste, then covered with lime within 50 cm of the surface, before filling the rest of the pit with soil. Lime is added to pits, to prevent earthworms from bringing contaminated material to the surface after pit closure.
- (iii) It must be ensured that animals do not have any access to burial sites. Covers of galvanised iron/wire meshes may be used.
- (iv) Burial must be performed under close and dedicated supervision.
- (v) The institution shall maintain a record of all pits for deep burial.

5.0 Status of carcass disposal in India

- (i) Methods currently adopted for carcass disposal include rendering, incineration and deep burial, of which deep burial is the most common practice for carcass disposal in the country. Very few cities have carcass

utilization plants and incinerators. One such carcass utilization plant is installed in Delhi and incinerator is under installation in Chandigarh.

- (ii) Carcass disposal sites are yet to be identified in most of the states
- (iii) Most of the disposal sites are not scientifically developed
- (iv) The disposal sites do not have necessary approvals (Consent, Authorization) from the regulatory bodies in most of the cases

5.0 Role of concerned organizations

5.1 Implementing agencies:

The implementing agencies shall include Municipalities / Department of Animal Husbandry of the States. States may involve NGOs, SHGs, Co-operatives.

The following provisions of the Section 393 of India Code Disposal of dead animals (Disposal of dead animals) should be implemented by these agencies

(1) Whenever any animal in charge of any person dies, the person in charge thereof shall within twenty-four hours either—

(a) convey the carcass to a place provided or appointed under section 352 for the final disposal of the carcasses of dead animals, or

(b) give notice of the death to the Commissioner whereupon the shall cause the carcass to be disposed of.

(2) In respect of the disposal of the carcass of a dead animal under clause (b) of sub-section (1) the Commissioner may charge such fee as he may by public notice prescribe.

The implementing agencies to ensure the following:

- No person shall deposit or otherwise dispose of the carcass or parts of any dead animal at a place not provided or appointed for this purpose
- Bye law to be framed by the local bodies for imposing of Penalty for non compliance of above. Spot fine in the range of Rs.100 to 5000 may be imposed based on the scale of. Such spot fines

may be imposed and collected by officers and Supervisory Staff authorized by the Municipal Authorities including Police personnel. The amount of fine imposed, if not paid on the spot, shall be recoverable in manner deemed appropriate by the Municipal Authority."

- A citizen charter has to be put in place by the local body for prompt disposal of carcasses in a time bound manner, with services which run 24X7. Accordingly, a dedicated on-call service should be established at ULB level for citizens to avail collection and transportation and disposal of animal carcasses.
- The District Magistrate or District Collector or as the case may be, the Deputy Commissioner shall facilitate identification and allocation of suitable land for setting up carcass disposal facility to local authorities in his/her district.
- The local authorities and Panchayats shall facilitate construction, operation and maintenance of carcass disposal facilities and associated infrastructure on their own or with private sector participation or through any agency, adhering to the guidelines issued by the Ministry of Urban Development from time to time and standards prescribed by the Central Pollution Control Board.
- Adequate buffer zone and green belt to be provided around the carcass disposal site to minimize the impact of the carcass disposal on human habitation
- The fund for setting up of the facilities may be obtained from schemes like National Livestock Mission or Animal Husbandry Department of the States.
- Based on pollution load generation a comprehensive wastewater treatment facility, solid waste management including gaseous emission/ odour control measures shall be implemented by the operator of the facility for carcass disposal.
- The local authorities and Panchayats shall make an application, obtain authorisation and consent for setting up carcass disposal

facility from the State Pollution Control Board or the Pollution Control Committee.

5.2 Regulatory bodies

- The regulatory bodies to ensure that the implementing agencies provide necessary infrastructure for carcass in areas falling in their jurisdiction
- The concerned State Boards shall grant consent & authorization to such carcass disposal facilities, after ensuring that necessary measures have been taken to control environmental pollution from such sites
- The respective State Boards shall regularly monitor the activities of such facilities to ensure that the emissions and discharges are within the stipulated norms.

6.0 Conclusion:-

- a) Carcass should be utilized by adopting rendering process or incineration and priority may be given to carcass utilization plant which are run by adopting rendering process at all the major towns to process the dead animal carcasses in a scientific manner.
- b) Carcass disposal to be done under the supervision Veterinary/Animal Husbandry Department of the State and the Local Bodies.
- c) Disposal of carcasses through deep burial method may be adopted only in where facilities listed in 6 (a) & (b) above are yet to be developed. Deep burial with adequate precautions may be adopted in case of mass mortality that may result from vagaries of nature or a mass die-off due to communicable disease, to avoid zoonotic transmission
- d) Scientific analysis required to assess environmental impact due to burning with focus on increased dioxin levels and groundwater contamination
- e) The implementing agencies to ensure that necessary infrastructure required for utilization and disposal of carcass is set up in the area under their jurisdiction
- f) The regulatory agency to ensure that necessary pollution control measures are implemented and monitor to ensure compliance with the stipulated norms

CSIR- CLRI Technology for Collection of fallen Carcass & its utilization

		Collection of Fallen Carcass and its utilization
1.	Name of Product / Process/Technology	
2.	Application / Use	It involves integrated utilization of all tissues of fallen carcass for value added product. Finds application in Animal feed/Leather industry/Fertilizer/Chemical Industry
3.	Salient features of technology/process	It is an eco-friendly and sustainable technology developed by CLRI for total utilisation of fallen animals (cattle and buffalo). It provides economically useful products from waste. The process includes lifting of fallen animals, flaying techniques, preservation of hides and skins, rendering (cooking) of the flayed carcass, preparation of meat meal, bone meal, tallow, besides treatment of effluent waste water and utilisation for agri-horticultural purposes and conversion of rumen contents into manure. Transportable devices for effective collection of fallen carcass are enclosed in Annexures 1 & 2.
4.	Raw materials	Fallen animals (cattle and buffalo)
5.	Machinery/Equipment	Flaying tools, wet rendering cooker, meat mincer, bone crusher, drier and pulveriser, transportable flaying and lifting device.
6.	Status of technology	Well developed and available at CSIR-CLRI.
7.	Minimum economic unit and total investment	3-4 carcasses per day Rs. 20 lakhs.(It may go upto Rs.40Lakhs when transportable device is included)
8.	Technology transfer methodology	As per CSIR guidelines
9.	Technology demonstration – cum – Training facilities	Demonstration can be done at Bardoli, Gujarat or some other location, if possible.
10.	Product acceptability	Excellent Market potential
11.	Marketability	Highly potential
12.	Is this technology locationspecific? If so, please elaborate	Need to ensure availability of 3-4 carcasses per day within a radius of about 30 Kms.
13.	Any gender-bias in technology utilisation?	No. Traditionally flaying activities are carried out by males in rural areas.

14.	Is any video-cassette available on the technology?	Requires to be arranged, if necessary.
15.	Any other relevant information not covered above	The centre can cater to the needs of a group of villages within a radius of 15 Kms. The likely benefits provided by the technology is not only economical but also in social and environmental spheres provides employment to rural poor and clean environment. Efficient carcass recovery not only reduces losses but also facilitates the availability of cheap and quality leathers to rural folk. Production of quality meat meal, bone meal would help to prepare animal feeds of better quality and help the feed industry to be less dependent on imports.
16.	Terms and conditions for technology transfer	Negotiable under the framework of CSIR guidelines.
17.	If required, can you provide prototype/working model for display/demonstrations	Yes
18.	Name and address of technology generating institute/individual	CSIR-Central Leather Research Institute, Adyar, Chennai - 600 020, India.
19.	Name and address of technology transfer agency, if different from above	Same as above (Sl. No.18)

Contact address:
 Director
 CSIR-Central Leather Research Institute Adyar,
 Chennai - 600 020.
 Phone: 91-44-24910897 / 24910846 / 24437158
 Fax: 91-44-24912150
 E-Mail: director@clri@gmail.com, director@clri.res.in,
ppbd@clri.res.in, bpclri@yahoo.com
 Website: www.clri.org

Annexure 1

1.	Name of the Device	Transportable Device for lifting of Carcass
2.	Application / Use	<ul style="list-style-type: none">➤ Collection of fallen animal especially in rural areas.➤ Ensure economic utilization of the hide/skin and even other body parts of a dead animal.➤ Ensure cleanliness of environment by not allowing it to be spoilt by the putrefaction of carcass.
3.	Salient features	The device can be fitted on the rear side of a vehicle and can be operated by a flayer cum driver to lift the animal and also flay the hide if the animal is dead. This device has several advantages over the existing methods presently used for lifting animals. The device has tremendous potential to improve the availability of quality hides from fallen animals to Indian leather industry if used by flayers and their societies in the country. The device also ensures proper collection of the remaining parts of the carcass for further processing into valueadded products like bone meal, meat meal, tallow etc.
4.	Any other relevant information not covered above	It ensures economical utilization of fallen carcass, while keeping the environment pollution free. The knowledge lead has been applied for patent protection (Indian Patent application no. 200Del2007).
5.	Name and address of technology generating institute/individual	CSIR-Central Leather Research Institute, Adyar, Chennai - 600 020, India.

Annexure 2

1.	Name of the Device	Transportable Device for lifting and flaying animals
2.	Application / Use	<ul style="list-style-type: none">➤ Collection of fallen animal especially in rural areas.➤ Ensure economic utilization of the hide/skin and even other body parts of a dead animal.➤ Ensure cleanliness of environment by not allowing it to be spoilt by the putrefaction of carcass.
3.	Salient features of technology/process	An improved transportable device for flaying of fallen animals from rural and urban areas has been innovated. The design features are exclusive for lifting and flaying of dead animals. The device is mechanized vehicle which uses power transmission system for loading, hoisting for flaying, carrying and unloading of the fallen animals. It has several advantages, in view of its (a) easy operability (b) reduction in time for flaying (c) provision for carrying and unloading two large or three small dead animals after flaying (d) hydraulic or mechanical system which increases efficiency (e) drastic reduction (by 50%) for capital investment (f) designed exclusively for flaying of dead animals.
4.	Any other relevant information not covered above	It ensures economical utilization of fallen carcass, while keeping the environment pollution free. The knowledge lead has been applied for patent protection (Indian Patent application no. 269DEL2011).
5.	Name and address of technology generating institute/individual	CSIR-Central Leather Research Institute, Adyar, Chennai - 600 020, India.

**Sub: Compliance Report in the matter of Kulwinder Singh Sandhu & Others Vs.
Ram Murti & Others – Carcass Disposal regarding**

Sir/ Madam,

Hon'ble NGT vide order dated May 13, 2020 in OA 465/2019 directed as follows:

"The CPCB may issue at least interim Guidelines on the subject by way of Directives to the State PCBs/PCCs considering the studies available and seek action taken reports by way of monitoring. The State PCBs/PCCs may ensure compliance of the directions issued by the CPCB and compliance reports be furnished to the CPCB. The CPCB may in turn file a comprehensive compliance report before the next date."

In compliance with above Directions of Hon'ble NGT, CPCB has prepared Guideline for Carcass disposal which is enclosed herewith (**Annexure I**).

It may be noted that Draft Guidelines on the matter had been sent to all SPCBs/PCCs for comments vide letter dated October 01, 2020 and the same was also uploaded on CPCB website.

SPCBs /PCCs are required to ensure that requisite facilities for Carcass disposal as per enclosed Guidelines are taken by the concerned authorities and compliance report in the enclosed format (**Annexure II**) is submitted to this office by January 22, 2020. Soft copy of the compliance report in excel form may also be emailed at divyasingha.cpcb@nic.in.

Yours faithfully

(Divya Sinha)

Item No. 01

Court No. 1

**BEFORE THE NATIONAL GREEN TRIBUNAL
PRINCIPAL BENCH, NEW DELHI**

(By Video Conferencing)

Original Application No. 465/2019

(With Reports dated 14.02.2020 & 11.05.2020)

Kulwinder Singh Sandhu & Ors.

Applicant(s)

Versus

Ram Murti & Ors.

Respondent(s)

Date of hearing: 13.05.2020

CORAM: HON'BLE MR. JUSTICE ADARSH KUMAR GOEL, CHAIRPERSON
HON'BLE MR. JUSTICE SHEO KUMAR SINGH, JUDICIAL MEMBER
HON'BLE DR. NAGIN NANDA, EXPERT MEMBER

Applicant (s): Mr. Divya Sinha, Advocate

Respondent(s): Mr. Vikrant N. Goyal, Advocate for CPCB

ORDER

1. Vide order dated 24.05.2019, this Tribunal sought a factual and action taken report from the CPCB, PPCB and the District Magistrate, Ludhiana with reference to the allegation of crude and unscientific carcass disposal at Village Ladhawal, District Ludhiana, Punjab by Respondent Nos. 1 to 5, Ram Murti, Ramesh Kumar, Suraj Kumar, Parshotam Lal and Munish Kumar.
2. The matter was thereafter considered in the light of report dated 15.09.2019 furnished by the State PCB acknowledging the problem and stating the remedial action by way of assessment of environmental compensation and taking steps for setting up a

project for scientific handling of the carcass. While seeking further report, this Tribunal also directed the CPCB to compile information from all the State PCBs/PCCs about the extent of problem and the remedial action taken/proposed.

3. The matter was further considered on 05.02.2020 in the light of report of the State PCB dated 14.01.2020 and report of the CPCB dated 15.01.2020. It was found that further action was necessary and accordingly directions were issued. For ready reference, it will be appropriate to refer to the proceedings dated 05.02.2020:

*“3. In pursuance of the above, the State PCB has filed report dated 14.01.2020 to the effect that notice **has been issued for recovery of compensation amounting to Rs. 2,28,12,000/- from each of the 5 Hadda Roddi units**. It is further mentioned that:*

- “5. **The Municipal Corporation, Ludhiana gave proposal to install carcass utilization plant at Village Noorpur Bet, Humbran Road, Ludhiana.** The Municipal Corporation, Ludhiana also obtained the site clearance from the competent Authority (SCA-cum-SAC) for the establishment of carcass utilization plant at Noorpur Bet, Ludhiana. Accordingly, Director of Factories, Punjab vide letter no. 3822-27 dated 31-03-2017 issued the approval of Site to Municipal Corporation, Ludhiana for the establishment of carcass utilization plant at Noorpur Bet, Ludhiana.*
- 6. That under the Chairmanship of Commissioner, Municipal Corporation, Ludhiana, a joint meeting between respondent Board and MCL Officials was held on 12.06.2017 to expedite the completion of project. The officials of the Municipal Corporation, Ludhiana assured for early necessary action in the matter. The respondent Board vide its letter no. 4767 dated 23.08.2017 again requested to the Commissioner, Municipal Corporation, Ludhiana to expedite the process of establishment of Carcass Utilization Plant. The Joint Commissioner, Municipal Corporation, Ludhiana was requested by the respondent Board vide endst. No. 149 dated 05.01.2018 to submit periodic monthly progress regarding process of establishment of Modern and scientific Carcass Utilization Plant at Noorpur Bet, Ludhiana to be completed by 31.12.2018. The authorities of Municipal Corporation, Ludhiana were requested to comply with the above said decisions vide Board’s letter no. 1020 dated 16.07.2018.*

- 
- 7. That Directions u/s 31-A of the Air (Prevention & Control of Pollution) Act, 1981 have also been issued by the respondent Board to the Municipal Corporation Ludhiana that the Municipal Corporation, Ludhiana shall expedite the process of establishment of Modern and scientific Carcass Utilization Plant at Noorpur Bet, Ludhiana and establish the same by 31.12.2018. However, the construction has not yet been started.**
 - 8. That the Punjab Pollution Control Board has also written letter bearing no. 1095 dated 17.07.2019, 1529 dated 15.09.2019 and 927 dated 29.11.2019 to the office of the Deputy Commissioner, Ludhiana requesting therein to shift the Hadda Roddi to some suitable place in accordance with law.**
 - 9. That vide letter no. 930 dated 29.11.2019 the Commissioner, Municipal Corporation, Ludhiana has again been requested by the Board to complete the said project with immediate effect so that the activities being carried out by the Hadda Roddis at Ladhawal are stopped and the same are shifted to the proposed Modern and scientific Carcass Utilization Plant.**
 - 10. That in further compliance to the orders dated 10.10.2019 of the Hon'ble Tribunal it is respectfully submitted that the notices to recover the Environmental Compensation amounting to Rs. 2,28,12,000/- from each of the 5 Hadda Roddi sites as calculated by the Joint Committee constituted by Hon'ble NGT have been issued by the Punjab Pollution Control Board u/s 33-A of the Water (Prevention & Control of Pollution) Act, 1974 and u/s 31-A of the Air (Prevention & Control of Pollution) Act, 1981, with an opportunity of personal hearing before the Competent Authority of the Punjab Pollution Control Board to the owners of 5 Hadda Roddis. The copies of the said notices are enclosed herewith as **Annexure-R1** for kind perusal.”**
 - 4. The CPCB has also filed report dated 15.01.2020. The observations and recommendations are as follows:**

“3.0 OBSERVATIONS:

Following are the observations from information received

- 1. Methods presently adopted for carcass disposal include Deep Burial, Rendering and Incineration**
- 2. Most States/UTs have adopted “Deep Burial” practice for disposal of carcass.**
- 3. Total no. of carcass disposal sites in 11 States/UTs is 128, however, only 4 States/UTs (namely Delhi, J&K, Lakshadweep and Mizoram) have granted authorization to 7 carcass disposal sites as per details given below:**

<i>State/UT</i>	<i>No. of authorization sites</i>	<i>Disposal methods</i>

<i>Delhi</i>	<i>1</i>	<i>Rendering plant</i>
<i>J & K</i>	<i>1</i>	<i>Deep Burial</i>
<i>Lakshadweep</i>	<i>4</i>	<i>Deep Burial</i>
<i>Mizoram</i>	<i>1</i>	<i>Slaughter House</i>

Chandigarh is in process of installation of incinerator.

4. West Bengal has indicated that 24 sites are scientifically developed. However, neither details regarding the burial practices followed are not given nor has authorization been granted to these sites by WBSPCB.
5. Different carcass disposal methods are mentioned below:

5.1 Rendering:

Rendering is the process of converting animal carcasses to pathogen-free, useful by-products such as feed protein. In the process of rendering, the carcasses are exposed to high temperatures using pressurized steam to ensure destruction of most pathogens. It is a closed system for mechanical and thermal treatment of animal tissues leading to stable, sterilized products.

5.2 Incineration:

Incineration is the thermal destruction of carcasses by auxiliary fuel such as diesel or natural gas etc. or by using electric energy. It reduces carcasses to ash and is generally bio-secure.

5.3 Burial:

Burial is a method in which carcass is buried in the ground. It is common method of carcass disposal. Use of slaked lime, bleaching powder and crystal salt are some remedial measures taken to address environmental issues related to deep burial in case of infectious carcass.

5.4 Other methods

Other methods of disposing animal carcass are pyre-burning, composting, mounding and other patented technologies.

Recommendation:

1. **Carcass should be utilized adopting rendering process or incineration. In rendering plant, odour control methods, such as bio-filters, scrubber etc. may be adopted and to meet prescribed standards before discharge. In incinerator, air pollution control devices should be installed.**
2. **Disposal of carcass through deep burial method may be adopted where rendering/incineration facility is yet to be developed.**
3. **Operators of carcass disposal sites should obtain authorization from respective SPCBs/PCCs.**

- 
- 4. SPCBs/PCCs need to monitor carcass disposal sites or facilities to address environment issues.**
 - 5. Consolidated guidelines on carcass disposal may be issued by Ministry of Housing & Urban Affairs/Ministry of Animal Husbandry and Dairying.”**
 5. In view of the above, the action taken not being adequate, further steps in the matter are necessary. CPCB needs to prepare guidelines in the matter and circulate the same for compliance to all the States/UTs. **The CPCB may also laydown interim mechanism in the matter to be adopted immediately. CPCB may also complete action in terms of earlier directions for collecting information from all State PCBs/PCCs about the status on the subject at the ground level. The State PCB may also take appropriate effective measures in the matter. We request the Committee headed by Justice Jasbir Singh, former Judge, Punjab and Haryana High Court to oversee the steps taken by the State PCB in the matter.**
 6. Deputy Commissioner, Ludhiana and Commissioner, Municipal Corporation, Ludhiana to file action taken report within one month to this Tribunal by email at judicial-ngt@gov.in.
 7. Action taken reports may be filed by Punjab PCB and CPCB before the next date. A copy of this order be sent by e-mail to CPCB, Punjab State PCB, Justice Jasbir Singh, former Judge, Punjab & Haryana High Court, Deputy Commissioner, Ludhiana and Commissioner, Municipal Corporation, Ludhiana by email.”
 4. We have perused report dated 14.02.2020 furnished by the Monitoring Committee headed by Justice Jasbir Singh, status report filed by the CPCB on 11.05.2020 and report of the Deputy Commissioner, Ludhiana dated 05.03.2020. The Monitoring Committee visited the site on 13.02.2020 in the presence of officers of the State PCB and the Municipal Corporation, Ludhiana and after noticing the deficiencies made recommendations as follows:

“Recommendations:

- 1. Directions may be issued to the Commissioner, Municipal Corporation, Ludhiana to complete and commission the modern and scientific carcass disposal plant at Noorpur Bet, Ludhiana by 31.8.2020 failing which, environmental compensation amounting to Rs.1 lakh per month may be imposed upon the Municipal Corporation, Ludhiana till the commissioning of the plant.**

-
2. Since the operation of carcass disposal plants is essential for disposal of dead animals of Ludhiana and its surrounding areas, therefore, in order to prevent any health hazard and maintain environmentally fragile area near water body i.e. River Sutlej, as short term measures, the owners of the Hadda Rodi shall take following steps to control obnoxious odour emissions, nuisance and restrict the discharge of wastewater of Hadda Rodi from entering into river Sutlej:

 - i) Provide a brick wall of 2 meters height towards the river Sutlej side within 01 month and temporary walls of tin sheets or any other suitable material on all the other three sides of the Hadda Rodi within 15 days.
 - ii) Spray sanitizers regularly on the leftovers to control the obnoxious odour.
 - iii) Close any outlet discharging wastewater into river Sutlej.
 - iv) The Municipal Commissioner, Ludhiana shall supervise the above works and ensure the compliance.
 3. After the successful commissioning of the modern and scientific carcass plant, these crude and unscientific carcass disposal plants should be closed.
 4. Punjab Pollution Control Board shall take immediate steps to get close these illegal activities from the present location with the help of District Administration. Deputy Commissioner, Ludhiana shall ensure the immediate closure of the unscientific carcass disposal plants after the commissioning of the modern and scientific carcass plant.
 5. Punjab Pollution Control Board shall recover the environmental compensation imposed by Hon'ble NGT for the damage caused to the environment due to operation of these illegal carcass disposal activities from the concerned persons through the Department of Revenue.”
5. The CPCB in its report has mentioned as follows:

Action taken:

- CPCB had previously issued letters dated 19.11.2019 & 10.12.2019 to all SPCBs/PCCS to provide information related to carcass disposal in the prescribed format, 11 SPCBs/PCCs (**Chandigarh, Delhi, Dadra & Nagar Haveli, Kerala, Lakshadweep, Jammu & Kashmir, Madhya Pradesh, Meghalaya, Mizoram, Tripura,**

West Bengal) had submitted information which was compiled and submitted to NGT in its report filed on 16th Jan., 2020.

- Vide letter dated 05.03.2020, reminder to submit required information was sent to remaining 24 SPCBs/PCCs. Copy of letter along with template is enclosed at **Annexure-I**.
- Required information on the matter has been received from Odisha SPCB so far and same is enclosed at **Annexure-II**. Reply from 23 SPCBs/PCCs is awaited for compilation of complete status report on Carcass disposal.
- **Field visit to carcass disposal sites is required for preparation of guidelines on the matter, the same could not be undertaken due to COVID-19 pandemic situation in the country.**
- **In view of above, extension of three months may kindly be granted for preparation of guidelines and compilation of complete status report on the matter.”**

6. The letter of the Deputy Commissioner, Ludhiana is as follows:

- (i) The undersigned has issued directions to Municipal Corporation, Ludhiana to expedite the completion of modern and scientific Carcass Utilization Plant vide this office letter no 9618 dated 04.03.2020 and copy of the same is attached as **Annexure-A**.
- (ii) The undersigned has issued directions to the District Development 86 Panchayat Officer, Ludhiana to locate alternate sites for disposing off the remains of dead animals till the completion of the Modern Carcass Utilization Plant vide this office letter no. 9619 dated 04.03.2020 and copy of the same is attached as **(Annexure-B)**.
- (iii) The undersigned has issued directions to the Punjab Pollution Control Board to keep a regular strict vigil at the site of Hadda Roddi so that no further activities that pollute River Satluj can be carried out at this site vide this office letter no. 9622 dated 04.03.2020 and copy of the same is attached as **(Annexure-C)**.”

7. We have given due consideration to the issue and reports. We are satisfied that the recommendations of the Monitoring Committee need to be acted upon. No objection has been raised by any of the parties. Accordingly, the State PCB and the Municipal Corporation,

Ludhiana may take further steps in a time bound manner and compliance report furnished before the next date by e-mail at judicial-ngt@gov.in. The Monitoring Committee may oversee compliance and is at liberty to file its further report, if found necessary.

8. The CPCB may issue atleast interim Guidelines on the subject by way of Directives to the State PCBs/PCCs considering the studies available and seek action taken reports by way of monitoring. The State PCBs/PCCs may ensure compliance of the directions issued by the CPCB and compliance reports be furnished to the CPCB. The CPCB may in turn file a comprehensive compliance report before the next date.

A copy of this order be sent to Justice Jasbir Singh, CPCB and all the State PCBs/PCCs by email.

List for further consideration on 28.09.2020.

Adarsh Kumar Goel, CP
