

## IPC – II Division

### Thermal Power Plants

## 1. Environmental Regulations

### A: Coal Based Thermal Power Plants

#### (i). Standards for discharge of liquid effluents

S. No.	Source	Pollutants	Concentration
(i)	Condenser cooling water (once through cooling system)	pH	6.5-8.5
		Temperature	More than 10°C than the intake water temperature
		Free available Chlorine	0.5 mg/l
(ii)	Boiler blow down	Suspended solids	100 mg/l
		Oil and grease	20 mg/l
		Copper (total)	1.0 mg/l
		Iron (total)	1.0 mg/l
(iii)	Cooling tower blow down	Free available Chlorine	0.5 mg/l
		Zinc	1.0 mg/l
		Chromium	0.2 mg/l
		Phosphate	5.0 mg/l
		Other corrosion inhibiting materials	Limit to be established on case by case basis
(iv)	Ash pond effluent	pH	6.5-8.5
		SS	100 mg/l
		Oil & grease	20 mg/l
			No limits for heavy metals are given at present

#### Temperature Limit for discharge of Condenser Cooling Water from Thermal Power plant

##### **(a). New thermal power plants commissioned after June 1, 1999.**

New thermal power plants, which will be using water from rivers/lakes/reservoirs, shall install cooling towers irrespective of location and capacity. Thermal power plants which will use sea water for cooling purposes, the condition below will apply.

##### **(b). New projects in coastal areas using sea water**

The thermal power plants using sea water should adopt suitable system to reduce water temperature at the final discharge point so that the resultant rise in the temperature of receiving water does not

Rise in temperature of condenser cooling water from inlet to the outlet of condenser shall not be more than 10° C.

**(c). Guidelines for discharge point:**

1. The discharge point shall preferably be located at the bottom of the water body at mid-stream for proper dispersion of thermal discharge.
2. In case of discharge of cooling water into sea, proper marine outfall shall be designed to achieve the prescribed standards. The point of discharge may be selected in consultation with concerned State Authorities/NIO.
3. No cooling water discharge shall be permitted in estuaries or near ecologically sensitive areas such as mangroves, coral reefs/spawning and breeding grounds of aquatic flora and fauna.

**(ii). Standards for Water Consumption vide Notification No. S.O. 3305(E) dated 07.12.2015**

1. All plants with Once Through Cooling (OTC) shall install Cooling Tower (CT) and achieve specific water consumption up to maximum of 3.5m<sup>3</sup>/MWh by 07/12/2017.
2. All existing CT-based plants reduce specific water consumption up to maximum of 3.5m<sup>3</sup>/MWh by 07/12/2017.
3. New plants to be installed after 1st January,2017 shall have to meet specific water consumption up to maximum of 2.5 m<sup>3</sup>/MWh and achieve zero waste water discharged.

**(iii). (a). Existing Emission Standards**

<b>Power generation capacity (MW)</b>	<b>Particulate matter emission</b>
Less than 210 MW	350 mg/Nm <sup>3</sup>
210 MW or more	150 mg/Nm <sup>3</sup>

**Note:**

Depending upon the requirement of local situations, which may warrant stricter standards as in case of protected areas the State Pollution Control Board and other implementing agencies within the provisions of the EPA, 1980 may prescribe limit of 150 mg/Nm<sup>3</sup> irrespective of the generation capacity of the plant.

Andhra Pradesh Pollution Control Board and Delhi Pollution Control Committees have stipulated stringent standards of 115 and 50 mg/Nm<sup>3</sup> respectively for control of particulate matter emission.

**(iii). (b). New Emission Standards vide Notification No. S.O. 3305(E) dated 07.12.2015**

<b>Parameter</b>	<b>Standards</b>
<b>TPPs ( units) installed before 31<sup>st</sup> December, 2003*</b>	
Particulate Matter	100 mg/Nm <sup>3</sup>
Sulphur Dioxide ( SO <sub>2</sub> )	600 mg/Nm <sup>3</sup> (Units Smaller than 500MW capacity units)
	200 mg/Nm <sup>3</sup> (for units having capacity of 500MW and above)

Oxides of Nitrogen ( NOx)	600 mg/Nm <sup>3</sup>
Mercury ( Hg)	0.03 mg/Nm <sup>3</sup> (for units having capacity of 500MW and above)
<b>TPPs ( units) installed after 1<sup>st</sup> January,2003, up to 31<sup>st</sup> December, 2016*</b>	
Particulate Matter	50 mg/Nm <sup>3</sup>
Sulphur Dioxide (SO <sub>2</sub> )	600 mg/Nm <sup>3</sup> (Units Smaller than 500MW capacity units) 200 mg/Nm <sup>3</sup> (for units having capacity of 500MW and above)
Oxides of Nitrogen ( NOx)	300 mg/Nm <sup>3</sup>
Mercury ( Hg)	0.03 mg/Nm <sup>3</sup>
<b>TPPs ( units) to be installed from 1<sup>st</sup> January, 2017**</b>	
Particulate Matter	30 mg/Nm <sup>3</sup>
Sulphur Dioxide (SO <sub>2</sub> )	100 mg/Nm <sup>3</sup>
Oxides of Nitrogen ( NOx)	100 mg/Nm <sup>3</sup>
Mercury ( Hg)	0.03 mg/Nm <sup>3</sup>

\* TPPs (units) shall meet the limits within two years from date of publication of this notification.

\*\* Includes all the TPPs (units) which have been accorded environmental clearance and are under construction".

#### **(iv). Stack Height Requirement**

In order to proper dispersion of SO<sub>2</sub> emissions from thermal power plants, stack height criteria have been adopted in the country. However, for larger capacities of boilers (500 m and above), space provision for installing FGD system has been recommended;

Power generation capacity	Stack height (metre)
Less than 200/210 MW	<b>H = 14(Q) 0.3</b> where Q is emission rate of SO <sub>2</sub> in kg/hr, H = Stack height in metre
200/210 MW or less than 500 MW	220
500 MW and above	275

**Note:**

The power plants sanctioned by CEA earlier to July 1, 1994 may not be required to increase existing stack height as per regulation notified, vide Government of India notification no. GSR 742(E) dated August 30, 1990 subject to following conditions:

- The ambient sulphur dioxide and NOx concentrations around the power plant is less than 1/3th prescribed ambient air quality standard for SO<sub>2</sub> and NOx for the concerned area.
- For (1) the power plant shall install adequate number of air quality monitoring stations in and around the power stations. The stations should be selected in consultation with the CPCB/SPCB.

(Vide office Memorandum No B-34011/1/01/PCI-II dated January 10, 1996)

**(v). Use of beneficiated coal**

In order to minimize flyash generation, it was recommended to use beneficiated coal in the power plants. The Ministry of Environment & Forests, Govt. of India has promulgated Gazette Notification (G.S.R. 02(E) dated January 02, 2014) on use of beneficiated/blended coal containing ash not more than 34 percent, on quarterly average basis in the following power plants:

- a stand-alone thermal power plant (of any capacity), or a captive thermal power plant of installed capacity of 100 MW or above, located beyond 1000 kilometres from the pit-head or, in an urban area or an ecologically sensitive area or a critically polluted industrial area, irrespective of its distance from the pit-head, except a pit-head power plant, with immediate effect;
- a stand-alone thermal power plant (of any capacity), or a captive thermal power plant of installed capacity of 100 MW or above, located between 750 – 1000 kilometres from the pit-head, with effect from the 1st day of January, 2015;
- a stand-alone thermal power plant (of any capacity), or a captive thermal power plant of installed capacity of 100 MW or above, located between 500-749 kilometres from the pit-head, with effect from the 5th day of June, 2016:

The power plants using Circulating Fluidised Bed Combustion or Atmosphere Fluidised Bed Combustion or Pressurized Fluidised Bed Combustion or Integrated Gasification Combined Cycle technologies or any other clean technologies as may be notified by the Central Government in the Official Gazette are exempted to use beneficiated coal irrespective of their locations.

**(vi). Utilisation of Flyash**

Ministry of Environment, Forest & Climate Change (MoEF&CC) issued various notifications for better way of utilization of Fly Ash to reduce the requirement of thousands of acres of land for its disposal. First notification by MoEF&CC regarding this was issued on 14<sup>th</sup> September, 1999 and amendments were made in 2003, 2009 and 2016 vide Notifications dated 27th August, 2003, 3rd November, 2009 and 27<sup>th</sup> January, 2016 respectively.

Whereas; vide Notification No. S.O 804 (E) dated 3rd November 2009, timeline for achieving the target of 100% Fly Ash Utilization was the specified for all Coal/Lignite based Thermal Power Stations in the country in a progressive manner. The prescribed targets for the Thermal Power Stations based on their date of commissioning are as follows:

The Thermal Power Stations in operation before the date of 3<sup>rd</sup> November, 2009 Notification are to achieve the target of Fly Ash utilization in successive 5 years as: 50% in 1<sup>st</sup> year; 60% in 2<sup>nd</sup>; 75% in

3<sup>rd</sup>; 90% in 4<sup>th</sup> and 100% in 5<sup>th</sup> year from the issue of this notification. The new Thermal Power Stations coming into operation after the MoEF's notification (i.e. 3rd November, 2009) are to achieve the target of Fly Ash utilization as: 50% in the 1<sup>st</sup> year, 70% in 2<sup>nd</sup>, 90% in 3<sup>rd</sup> and 100% in 4<sup>th</sup> year from their date of commissioning.

Whereas; vide Notification No. S.O 254(E) dated 27th January 2016, for promoting the utilization of Fly Ash, MoEF&CC stipulates the provisions applicable to all construction agencies of Central / State / Local Government and private or public sector engaged in the construction of buildings within a radius of 300 km from Coal/Lignite based Thermal Power Stations to use only Fly Ash based products in every construction project.

MoEF&CC in order to make mandatory use of flyash and flyash based products notified the criteria of minimum Fly Ash content for building materials to qualify as "Fly Ash based products" category as given in table below:

<b>Sl. No.</b>	<b>Building Materials or Products</b>	<b>Minimum % of Fly Ash by weight</b>
1.	Fly Ash bricks, blocks, tiles, etc. made with Fly Ash, lime, gypsum, sand, stone dust, cement, etc. (without clay).	50% of total raw material.
2.	Paving blocks, paving tiles, checker tiles, mosaic tiles, roofing sheets, pre-cast elements, etc. wherein cement is used as binder.	Usage of PPC (IS-1489: Part 1) or PPC (IS-455) or 15 % of OPC (IS-269/8112/12269) content.
3.	Cement.	15% of total raw materials.
4.	Clay based building materials such as bricks, blocks, tiles, etc.	25% of total raw materials.
5.	Concrete, mortar and plaster.	Usage of PPC (IS-1489: Part 1) or PPC (IS-455) or 15 % of OPC (IS-269/8112/12269) content.

Whereas; considering to the fact that the transportation cost of carrying dry Fly Ash is considerably high, MoEF&CC notified special provisions for promoting the utilization of Fly Ash. As per Notification dated 27th January 2016, cost of transportation of ash for road construction projects or for manufacturing of ash based products or use as soil conditioner in agriculture activity within a radius of 100 km from a Coal/Lignite based Thermal Power Station shall be borne by such Coal/Lignite based Thermal Power Station and the cost of transportation beyond the radius of 100 km and up to 300 km shall be shared equally between the user and the Coal/Lignite based Thermal Power Station.

Whereas; MoEF&CC also brings transparency in field of stock of Fly Ash available with the Coal/Lignite based Thermal Power Station by issuing a new provision i.e. Every Coal/Lignite based Thermal Power Station (including Captive/Co-generating Stations) shall, within 3 Months from the date of notification, upload on their website the details of stock of each type of Ash available with them and thereafter shall update the stock position at least once a Month.

## **B. Gas/ Naphtha based Thermal Power Plants**

### **(i) Emission standards for NOx**

- (a) For existing units 150 ppm (v/v) at 15% excess oxygen

(b) For new units with effect from 01.06.1999.

<b>Generation capacity of gas turbine</b>	<b>Limit for NOx emission (v/v), at 15% excess oxygen)</b>
(a) 400 MW and above	(i) 50 ppm for the units burning natural gas.
	(ii) 100 ppm for the units burning naphtha
(b) Less than 400 MW but up to 100MW	(i) 75 ppm for the units burning natural gas
	(ii) 100 ppm for the units burning naphtha
(c) Less than 100 MW	100 ppm for units burning natural gas or naphtha as fuel
(d) For the plants burning gas in a conventional boiler.	100 ppm

### **(ii) Stack height**

H in m should be calculated using the formula:

$$H = 14 Q^{0.3},$$

where Q is the emission of SO<sub>2</sub> in kg/hr, subject to a minimum of 30 metres.

### **(iii) Liquid waste discharge limit**

<b>Parameter</b>	<b>Maximum limit of concentration (in mg/l except for pH and temperature)</b>
pH	6.5 – 8.5
Temperature	As applicable for other thermal power plants
Free available	0.5
chlorine	100
Suspended solids	20
Oil & grease	1
Copper (total)	1
Iron (total)	1
Zinc	0.2
Chromium (total)	5
Phosphate	

## **C: Liquid fuel based Thermal Power Plants**

### **(i) Emission Standards for Diesel Engines (Engine Rating More Than 0.8 Mw (800 Kw) for Power Plant, Generator Set applications and other requirements**

Parameter	Area Category	Total engine rating of the plant (includes existing as well as new generator sets)	Generator sets commissioning date		
			Before 1/7/2003	Between 1/7/2003 and 1/7/2005	On or after 1/7/2005
NOx (as NO <sub>2</sub> ) (at 15% O <sub>2</sub> ), dry basis, in ppm	A	Up to 75MW	1100	970	710
	B	Up to 150MW			
	A	More than 75MW		710	360
	B	More than 150MW	1100		
NMHC (as C) (at 15% O <sub>2</sub> ), mg/Nm <sup>3</sup>	Both A and B		150	100	.
PM (at 15% O <sub>2</sub> ), mg/Nm <sup>3</sup>	Diesel Fuels - HSD & LDO	Both A and B	75	75	
	Furnace Oils - LSHS & FO	Both A and B	150	100	
CO (at 15% O <sub>2</sub> ), mg/Nm <sup>3</sup>	Both A and B		150	150	
Sulphur content in fuel	A		<2%	.	
	B		<4%		
Fuel specification	For A only	Up to 5MW	Only Diesel Fuels (HSD, LDO) shall be used.		
Stack height (for generator sets commissioned after 1/7/2003)	Stack height shall be maximum of the following, in meter: I. 14 Q 03, Q = Total SO <sub>2</sub> emission from the plant in kg/hr II. Minimum 6 m above the building where generator set is installed. III. 30 Meters				

#### Note: 1. Acronyms used

MW: Mega ( $10^6$ ) Watt, FO: Furnace Oil, NOx: Oxides of Nitrogen HSD: High Speed Diesel, NO<sub>2</sub>: Nitrogen Dioxide, LDO : Light Diesel Oil, O<sub>2</sub> : Oxygen , LSHS : Low Sulphur Heavy Stock, NMHC : Non- Methane Hydrocarbon kPa : Kilo Pascal, C : Carbon, mm : Milli ( $10^{-3}$ ) metre, PM : Particulate Matter kg/hr : Kilo ( $10^3$ ) gram per hour, CO : Carbon Monoxide, mg/Nm<sup>3</sup> : Milli ( $10^{-3}$ ) gram per Normal metre cubic, SO<sub>2</sub> : Sulphur Dioxide , ppmv: part per million ( $10^{-6}$ ) by volume

#### 2. Area categories A and B are defined as follows

Category A: Areas within the municipal limits of towns/cities having population more than 10 lakhs and also up to 5 km beyond the municipal limits of such towns/cities.

Category B: Areas not covered by category A.

3. The standards shall be regulated by the State Pollution Control Boards or Pollution Control Committees, as the case may be.
4. Individual units with engine ratings less than or equal to 800 KW are not covered by this notification.
5. Only following liquid fuels viz. High Speed Diesel, Light Diesel Oil, Low Sulphur Heavy Stock and Furnace Oil or liquid fuels with equivalent specifications shall be used in these power plants and generator sets.
6. For expansion project, stack height of new generator sets shall be as per total Sulphur Dioxide emission (including existing as well as additional load).
7. For multi engine plants, flues shall be grouped in cluster to get better plume rise and dispersion. Provision for any future expansion should be made in planning stage itself.
8. Particulate Matter, Non-Methane Hydrocarbon and percent moisture (dry basis). Carbon Monoxide results -are to be normalized to 25 0 C, 1.01 Kilo Pascal (760 mm of mercury) pressure and zero
9. Measurement shall be performed at steady load conditions of more than 85% of the rated load.
10. Continuous monitoring of Oxides of Nitrogen shall be done by the plants whose total engine capacity is more than 50 Mega Waft. However, minimum once in six-month monitoring for other parameters shall be adopted by the plants.
11. Following methods may be adopted for the measurement of emission parameters, -

Sl. No.	Emission Parameters	Measurement Methods
1	Particulates	Gravimetric
2	SO <sub>2</sub>	Barium Perchlorate- Thorin indicator method
3	NOx	Chemiluminescence, Non Dispersive Infra-Red, Non Dispersive Ultra-violet (for continuous measurement), Phenol disulphonic method
4	CO	Non Dispersive Infra-Red
5	O <sub>2</sub>	Paramagnetic, Electrochemical sensor
6	NMHC	Gas Chromatograph - Flame ionisation Detector

## **2. LIST OF THERMAL POWER PLANTS IN INDIA (as on 30.06.2016)**

Sl. No.	Name	State	Capacity (MW)
---------	------	-------	---------------

1.	Ramagundem, NTPC	Andhra Pradesh	2600
2.	Vijaywada, APPGCL	AP	1760
3.	Rayalseema ,APPGCL	AP	1050

## 4.0 Reports/guidelines

### 4.1 Protocol for sampling, analysis of coal and reporting of compliance in respect of implementation of the Gazette notification on use & supply of beneficiated coal in thermal power plants

This protocol presents the protocol for sampling, analysis of coal and reporting of compliance on quarterly basis with respect to ash content in coal to be supplied and used by the thermal power plants covered under the provisions of the Gazette notification GSR 02 ( E ) dated January 02, 2014 on supply and use of beneficiated coal in thermal power plants. The objective is to ensure compliance of the quality of coal with respect to ash content, supplied and used by thermal power plants. The data generated shall help in evaluation of compliance level of the notification.

### 4.2 Guidelines for loading, unloading and nuisance free transportation of all types of flyash, including bottom ash etc. generated by thermal power stations

As per the 2009 Notification on flyash utilisation, transportation of flyash should be in an environmentally sound manner. Flyash is categorised as high volume low effect waste under Hazardous Waste (Management & Handling) Rules, 2008 ( S.O. 2265( E ) dated September 24, 2008) and thus excluded from the category of Hazardous waste. The guidelines for transportation of flyash were prepared for minimising fugitive emissions during loading, unloading and making nuisance free transportation of all types of flyash, including bottom ash etc. generated by thermal power stations.

**List of Thermal Power Plants to whom Direction u/s 5 dated 21.07.2015  
were issued w.r.t. Installation & Connectivity of OCEMS**
