3. Newly Added Non-attainment Cities in Andhra Pradesh	3
4. Srikakulam City and its Air Quality.....	3
5. National Air Quality Index and Daily Emergency Response	5
6. Air Pollution Sources at Srikakulam	6
7. Comprehensive Clean Air Action Plan (CAP) for Srikakulam.....	14
a. Graded Response Action Plan (GRAP) proposed for Srikakulam City	32
b. Monitoring Mechanism for Implementation	34
Annexure I: Srikakulam City: Ambient Air Quality monitoring data - PM10 values	35
Annexure II - Air Quality monitoring in the region	36

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

1. Hon'ble National Green Tribunal directions on non-attainment cities

Hon'ble National Green Tribunal, Delhi in its Orders, dated 06.08.2019 in O. A. No. 681 of 2018 on non-attainment cities has issued the following directions to comply with:

1. Actions Plans need to be prepared by States for the additional 20 NACs on the pattern of 102 NACs within three months and after its approval by CPCB within two months, States must initiate time bound action on remediation within next three months.

In this order the Hon'ble National Green Tribunal, Delhi has directed that the "pattern of such plans for 102 cities, already prepared". These earlier plans were made according to the NGT orders, dated 08.10.2018 in O. A. No. 681 of 2018 on non-attainment cities. These have given the following directions to comply with:

1. All the States and Union Territories with non-attainment cities must prepare appropriate action plans within two months, aimed to bring down the air pollution levels to the prescribed norms within six months from the date of finalization of action plans.
2. Action plans may be prepared by six-member Committee comprising of Directors of Environment, Transport, Industries, Urban Development, Agriculture and Member Secretary, State Pollution Control Board or Committee of the concerned State. The Committee may be called Air Quality Monitoring Committee (AQMC). The Committee will function under the overall supervision and coördination of Principal Secretary, Environment of the concerned State or the Union Territory. This may be further supervised by the Chief Secretaries concerned or their counter parts in Union Territories by ensuring intra-sectorial coordination.
3. The action plan will indicate steps to be taken to check different sources of pollution having speedy, definite and specific timelines for execution.
4. The Chief Secretaries of the State and Administrators / Advisors to Administrators of the Union Territories will be personally accountable for the failure to formulate action plans, as directed.

2. Constitution of Air Quality Monitoring Committee (AQMC)

In compliance to the directions of Hon'ble National Green Tribunal, Environment, Forests, Science & Technology Department, Govt. of Andhra Pradesh has issued the G. O. R. T. No. 167, dated 14.11.2018 constituting the Air Quality Monitoring Committee with the following members for preparation/ revision of action plans to control air pollution in the non-attainment cities of Andhra Pradesh. The same committee will look after the newly added eight non-attainment cities.

Table 1: Clean Air Action Plan Monitoring Committee

S. No.	Member of the Committee	Designation
1	Commissioner, Transport	Member
2	Commissioner, Industries	Member
3	Commissioner & Director, MA&UD	Member
4	Commissioner & Director, Agriculture	Member
5	Member Secretary, APPCB	Member Convener
6	Special Secretary to Government Environment, Forest, Science & Technology Department	Member

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

3. Newly Added Non-attainment Cities in Andhra Pradesh

Central Pollution Control Board (CPCB) had earlier identified five cities in Andhra Pradesh, namely, Visakhapatnam, Vijayawada, Guntur, Nellore and Kurnool as non-attainment cities. In addition to the above, Central Pollution Control Board (CPCB) has identified additional 08 cities and towns as non-attainment for not meeting the National Ambient Air Quality Standards (NAAQS) for PM10 in Andhra Pradesh. These include Srikakulam, Vizianagaram, Rajamahendravaram, Eluru, Ongole, Chittoor, Kadapa and Anantapur. (see table 2: PM 10 values in the new Non-attainment cities of Andhra Pradesh)

CPCB has issued directions to APPCB under Section 18 (1) (b) of the Air (Prevention and Control of Pollution) Act, 1981 for preparation of action plans, in coordination with stakeholder departments for control air pollution in the said cities and towns.

Table 2 : PM 10 values in the new Non-attainment Cities of Andhra Pradesh

S. No.	Cities	Particulate Matter (PM 10) $\mu\text{g}/\text{m}^3$							Annual standard
		2014	2015	2016	2017	2018	2019	2020	
1	Srikakulam	-	-	-	68	70	63	57	60 $\mu\text{g}/\text{m}^3$
2	Vizianagaram	-	-	-	63	65	65	59	
3	Rajamahendravaram	70	61	62	65	75	63	56	
4	Eluru	97	79	70	70	70	63	60	
5	Ongole	63	67	65	65	65	60	50	
6	Chittoor	68	69	63	69	61	54	42	
7	Kadapa	-	-	-	69	61	52	43	
8	Anantapur	76	86	85	72	71	67	60	

The Air Quality Monitoring Committee has prepared the multi-sector clean air action plans based on the information available from the concerned departments and implementing bodies.

The AQMC has considered the guiding principles linked with the National Clean Air Programme (NCAP), the Air (Prevention and Control of Air Pollution) Act, 1981 and other concerned regulations in different sectors and the good practices that have bearing on the quality and effectiveness of the plans to meet the NCAP target of 20-30 percent reduction by 2024.

Accordingly, the approved action plans by AQMC for additional eight non-attainment cities namely Srikakulam, Vizianagaram, Rajamahendravaram, Eluru, Ongole, Chittoor, Kadapa & Anantapur in the state of Andhra Pradesh have been submitted to CPCB on 27.12.2019 for further approval. CPCB vide letter dt: 23.01.2020 has issued certain recommendations to revise the action plans.

The multi-sector plans have drawn upon the regulatory requirements in each sector and have sought robust pollution source assessment, monitoring and advanced air quality management strategies for measurable improvement in air quality. Measures that are part of the national and state regulatory requirements are common to all cities. Some measures are unique to a city depending on the local imperatives. The plans also seek to align the budget lines of the different sectors for more effective leveraging of the available resources. The plans include measurable outcomes and service level benchmarks and also indicate the improvement needed in the processes. The plans seek to promote equitable, affordable and innovative solutions. This also seeks air shed approach to reduce the regional influence on local air quality. This has outlined the institutional arrangement for effective implementation.

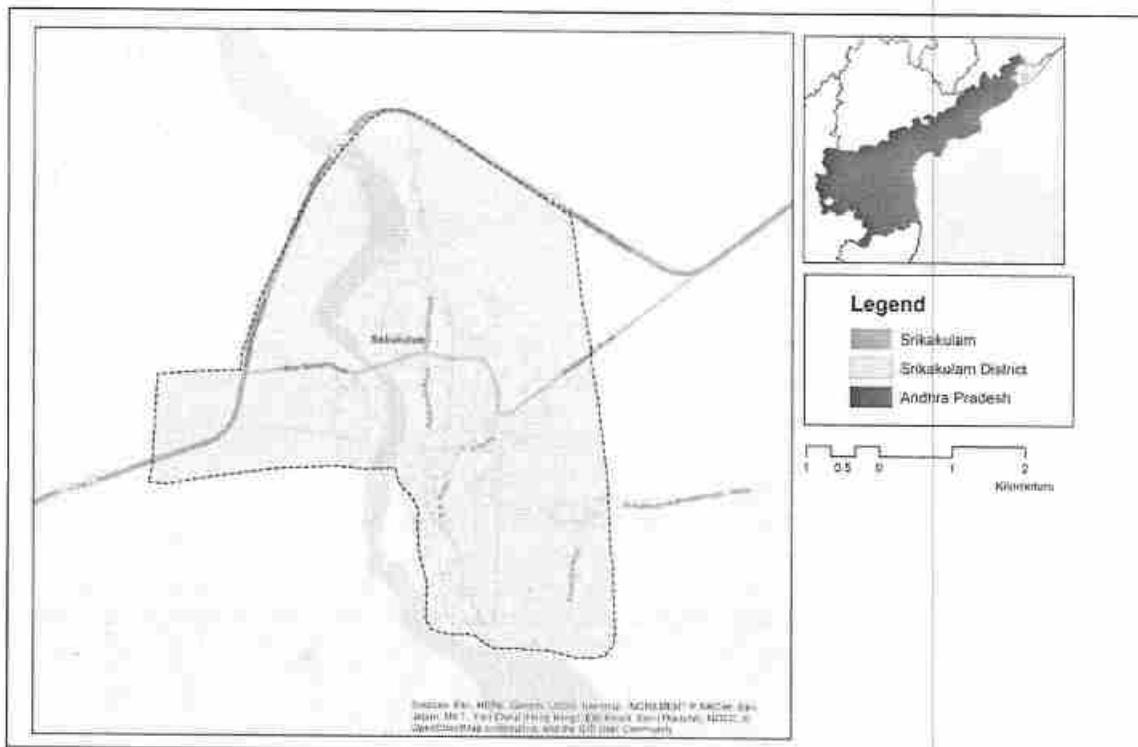

4. Srikakulam City and its Air Quality

Srikakulam is a city in north eastern part of Andhra Pradesh and is the district headquarters of the Srikakulam district. It is located on the low lying plain of the Nagavali River and is in close proximity to

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

the Bay of Bengal. The city is located at 18.2949° N, 83.8938° E. The city has a population of 3.28 lakh as per 2011 census & flourishing with an additional floating population of pilgrims visiting the famous temples, coming from other parts to the state. It is an industrial hub, and the city also experiences a seasonal influx of tourists.

Figure 1: Map of Srikakulam City limits

APCB has been monitoring the ambient air quality of Srikakulam city at three stations under National Ambient Air Quality Monitoring Programme (NAMP) till date for the parameters, PM10, PM2.5, SO₂, NO₂ & NH₃, as against 12 as per Notification No B-29016/20/90/PCI-L dated 18 November 2009 of CPCB. All of these are manual stations and there are no real time monitoring stations in the city. Ambient air quality of Srikakulam City is monitored in three locations. (see Table 3: Location and type of monitoring stations in Srikakulam).

According to the CPCB criteria Srikakulam has adequate number of manual monitoring stations. But it needs to plan and expand its real time monitoring to generate real time data.

Table 3: Location and type of monitoring stations in Srikakulam

S. No.	Location	NAMP / CAAQMS	Types of pollutant monitored	Category of station
1	Municipal Office, Old Bus Stand	NAMP	PM 10, NO ₂ , SO ₂ , NH ₃	Commercial
2	District Co-operative Office (DCO) at SKLM Old Bridge.	NAMP	PM 10, NO ₂ , SO ₂ , NH ₃	Commercial
3	APIIC, Kushalpuram	NAMP	PM 10, NO ₂ , SO ₂ , NH ₃	Industrial / Commercial

Source: APPCB, 2020 and NAMP data

The NAMP data of four stations including SAMKRG, Pydibhemavaram monitoring station (located within the Srikakulam district at a distance of 33 km from the Srikakulam city) indicate the non-

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

attainment status of Srikakulam. CPCB has included SAMKRG, Pydibhemavaram monitoring station to assess non-attainment status of Srikakulam. Based on the CPCB Envis centre database, most of the other pollutants are well within the limits, PM10 has continuously been above the standards since 2013 (this was when the SAMKRG, Pydibhemavaram monitoring station was considered). Though NO₂ levels are well below the standards, they have been steadily increasing since 2013, possibly due to industrial activity and higher vehicular movement. The overall trend in PM10 shows a declining trend. (See Annexure I). The air quality within the city is also influenced by the pollution sources around the city. Air quality of the Srikakulam city (excluding the SAMKRG, Pydibhemavaram monitoring station) is given below.

Table 4: Air Quality Monitoring results in Srikakulam

S. No.	Parameter	2017	2018	2019	2020	Annual average Standard
1	PM10	68	70	63	57	60
2	SO ₂	8.3	9.5	8.3	7.3	50
3	NOx	17.3	20.5	19.3	17.0	40
4	NH ₃	66.4	72.7	54.5	25.7	100
Average of no. of stations		2	3	3	3	--
5	PM2.5	---	---	---	---	40
Average of no. of stations		---	---	---	---	---

Note: All values are expressed in $\mu\text{g}/\text{m}^3$

5. National Air Quality Index and Daily Emergency Response

The non-attainment cities under the NCAP are also required to adopt graded response action plan for short-term emergency response during smog episodes or high pollution days. The Ministry of Environment, Forest and Climate Change (MoEF & CC) had notified the National Air Quality Index (NAQI) and a corresponding health advisory in 2015. Based on this index, daily pollutant concentrations are classified and graded as good, satisfactory, moderate, poor, very poor and severe and color-coded so that the general public can understand the gravity of the problem. The health advisory has also been framed to indicate the expected health outcomes at varying severity of daily air pollution (see Table 5: National Air Quality Index of India and Table 6: Health Advisory at different AQI levels in India). This is designed to control daily pollution peaks and reduce exposure and associated health risk. Smog episodes largely occur when weather is adverse with calm atmosphere or no wind, cold temperature, and lower mixing height of air that traps air and pollution very close to the ground. Short-term policy action can control further loading of emissions and prevent higher smog peaks.

Table 5: National Air Quality Index of India

AQI Category (Range)	PM10 24-hr	PM2.5 24-hr	NO2 24-hr	O ₃ 8-hr	CO 8-hr (mg/m ³)	SO ₂ 24-hr	NH ₃ 24-hr	Pb 24-hr
Good (0-50)	0-50	0-30	0-40	0-50	0-1.0	0-40	0-200	0-0.5
Satisfactory (51-100)	51-100	31-60	41-80	51-100	1.1-2.0	41-80	201-400	0.5-1.0
Moderately polluted (101-200)	101-250	61-90	81-180	101-168	2.1-10	81-380	401-800	1.1-2.0
Poor (201-300)	251-350	91-120	181-280	169-208	Oct-17	381-800	801-1200	2.1-3.0
Very poor (301-450)	351-450	121-250	281-400	209-748 ^a	17-34	801-1800	1200-1800	3.1-3.5

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

400)	Severe (401-500)	430+	250+	400+	748+*	34+	1600+	1800+	3.5+
-------------	-------------------------	-------------	-------------	-------------	--------------	------------	--------------	--------------	-------------

Note: Ambient concentration values of all regulated pollutants are compared with corresponding standards, and an exceedance factor is used for qualitative assessment of air quality. Air quality for a particular pollutant is defined as good, satisfactory, moderate, poor, very poor, and severe if concentration value is < 0.5, between 0.5 and 1.0, >1.0 but <1.5, and >1.5 times the standard value for that pollutant respectively.

Source: Ministry of Environment and Forest and Climate Change

Table 6: Health advisory at different AQI levels in India

AQI	Associated health impacts
Good (0–50)	Minimal impact
Satisfactory (51–100)	Minor breathing discomfort to sensitive people
Moderately polluted (101–200)	May cause breathing discomfort to the people with lung disease such as asthma and discomfort to people with heart disease, children and older adults
Poor (201–300)	May cause breathing discomfort to people on prolonged exposure and discomfort to people with heart disease
Very poor (301–400)	May cause respiratory illness to the people on prolonged exposure Effect may be more pronounced in people with lung and heart diseases
Severe (401–500)	May cause respiratory effects even on healthy people and serious health impacts on people with lung or heart diseases. The health impacts may be experienced even during light physical activity

6. Air Pollution Sources at Srikakulam

As of 2020, pollution source inventory and source apportionment studies have not been carried out for Srikakulam. Broad review shows that the major sources contributing to PM10 in Srikakulam are resuspension of road dust, emissions from vehicle movement, burning of biomass, municipal solid waste, and construction activities. It is however not possible to assess their relative contribution. Thus, actions have been proposed for all these sources.

Industrial Emissions

There are no major industries located within the city and as per the CPCB classification, there are 4 red category, 23 orange category and 32 green category industries within 15 km radius from the city. APIIC has developed industrial estates with small scale industries at Mogalapadu (V), Palasa (M) & Kusalapuram (V), Etcherla (M), Srikakulam District. The city does not have any major iron and steel plants in the vicinity. (See Table 7: List of red category industries within and upto 15 km radius of Srikakulam city).

Though all the major units are registered under the APPCB, granular data collection on stack emissions, fuel used and status of air pollution control devices is required, along with data on the state of implementation of Continuous Emission Monitoring System (CEMS), management of fugitive emissions and use of clean fuel is required.

Table 7: List of Red category industries within and upto 15 km radius of Srikakulam City

S. No.	Name of the Industry	Line of Activity	Distance from city (km)
1	M/s. Apna Bhoomi E-Waste Management Services, R. Sy. No. 119, Plot No. D5 & D6, IDA, Kushalpuram (V), Etcherla (M), Srikakulam District	Recycling unit	3
2	Smart Chem Technologies Limited, Ponnada (V), Etcherla (M), Srikakulam District	Chemical industry	10
3	M/s NACL Industries Limited (Formerly M/s. Nagarjuna Agri Chem Limited), Plot No.177, Arinama Akkivalasa(V), Allinagaram Post, Etcherla (M),	Pesticide	12

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

	Srikakulam District.		
4	SAMKRG Pistons & Rings Limited (Plant-III), Allinagaram (P.O), Arinama Akkivalasa (V), Etcherla (M), Srikakulam District	Chemical industry	15

In general coal, natural gas, diesel, biomass, husk and furnace oil are being used as fuel in the industrial units. Often due to the difference in pricing, polluting fuels like pet coke, fuel oil, furnace oil are used. Tyre pyrolysis oil is popular in unregulated smaller units. An approved fuel list for a clean fuel strategy along with a fuel pricing policy can help to reduce emissions.

Fuels containing high levels of sulphur lead to high emission of particulates; gaseous emissions like SO_x and contribute to 'secondary' particulate load. High-sulphur fuels also contain heavy metals, which add to the toxicity and contamination of the environment. The Supreme Court of India vide order of 24 October 2017 has banned use and sale of petroleum, coke and fuel oil in Haryana, Rajasthan and Uttar Pradesh. Delhi had banned these fuels in 1998. Only the cement, lime kiln, calcium carbide and gasification industries are allowed to use this as feedstock but not fuel. Further the order dated 13 July 2018, the Supreme Court has asked for a ban on import of pet-coke into India, with specific exemptions given to these four categories of Industries. The Ministry of Commerce, GOI has issued an order dated 17 August 2018 to this effect. Further, under India's commitments to the WTO, the country's laws are bound to treat imported and domestic pet coke equally. As of November 2018, the Ministry of Commerce & MoEF & CC are considering restricting the usage of all pet coke in India—domestic and imported. In future, policy instruments such as tax incentives might be explored as an option to incentivize industries to upgrade technologies and fuel that will bring down emissions. Following this CPCB has asked state governments to frame a policy to discourage pet coke and furnace oil as combustion fuels.

In addition, following the Supreme Court order dated 29 January 2018, CPCB notified NO_x and SO_x standards for 16 groups of industries out of 35 industries as directed by the Supreme Court. This will have to be enforced nation-wide. Accordingly, the 16 category of industries need to be identified for implementation. Since most of the other industries are large scale units, there needs to be thorough inspection to collect granular and transparent data on the following aspects,

- Stack emissions
- PM emission load per unit per day
- State of Air Pollution Control (APC) Devices
- State of CEMS monitoring
- Stack height
- Management of fugitive emissions
- Extent of green cover, buffer zones and plantations around major plants
- Paved roads within and around the factories to minimize dust due to freight and raw material transportation
- Detailed Environment Health and Safety norms inventory for all operating units

The city does have several rice mills (modern rice mill / Huller) which are a rich source of fugitive emissions. Complete data on fugitive emissions was not available. It is suggested to monitor SO₂ and NO_x, for all units.

Special attention will have to be given to management and disposal of industrial waste in industrial areas.

There is not much information available on the small and medium scale units and industrial boilers. This assessment is needed to identify the mitigation strategies including common boiler policy, and clean fuel and pricing strategy.

Industrial Siting Policy

Like many other states, Andhra Pradesh Pollution Control Board has a siting policy in place. There are specific guidelines for the establishment of cement factories (upto 50 TPD), stone crushers, dairies,

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

LPG bottling units, cashee processing units, rice mills (parabolled), pesticide units and sponge iron manufactures. All units with investment of Rs 10 Crores and above must be away from residential areas, educational institutions and national highways. Additionally, they must also have clearly demarcated buffer zones, which can only be used for the following.

1. Vehicle parking.
2. Administrative building and security office.
3. Green belt.
4. Electrical Substation / transformers.
5. Fuel Station.
6. Water supply sumps and
7. Other non-industrial activities.

Brick Kilns and Hot Mix Plants

There are a few unregistered brick kilns in the immediate surroundings of the Srikakulam City which are operating seasonally for three to four months. There are about 100 stone crushers located in villages of Narayananapuram, Lolugu, S M puram of Etcherla Mandalam, Yelamanchili, Regulupadu, Podugupadu, Ramyyapeta of Kotabommali Mandalam, Kalyanipeta, Rapaka, Konchada, Vavilapallipeta, Garapeta of Ponduru Mandalam, Singupuram, Munusubupeta, Kristapeta, Patrunivalasa, Mamidivalasa of Srikakulam Mandalam and Lingalavalsa, Survaram of Jalumuru Mandalam, Srikakulam District. All these units are located about 20km away from the Srikakulam city

Further there are eight hot mix plants and five concrete batching plants, both in Etcherla, Narasannapeta areas, temporarily working for construction and maintenance work for NH 16. These units located at a radial distance of 30 to 50 km away from the city center and would not have a significant bearing on the local air quality of the city.

Thermal Power Plants

There are no power plants located within the city limits and upto 25km radius from the city limits.

Municipal Solid Waste

The city generates 69 TPD of municipal solid waste and a majority of it is collected through waste pickers by a system of door-to door collection. Dry and Wet waste segregation is carried out at the door-to-door level manually. The entire municipal solid waste management is decentralized by dividing the entire city into 127 micro pockets. The municipal corporation has 38 ward secretaries, with each one having its own environment secretary to look after all this MSW management.

Roughly, 15 percent of the waste is treated for biogas generation and it is carried out at Khajipeta. The remaining waste is dumped at the Thandevalasa dumpsite, located at a distance of 10 km from the core of the city. The dumpsite occupies a total area of 19.35 Acres and is being monitored for spontaneous fire.

The biomedical waste generated from the city is being collected and treated by M/s. Rainbow Industries, Srikakulam which is a common biomedical waste management facility (CBMTWF).

Further, no waste burning is allowed and regular monitoring made by sanitary inspectors around the city. 100 per cent processing and treatment of waste and recycling will have to be planned for to avoid any possibility of open burning of waste. The city has one waste to energy plant, in its pilot phase, which utilizes 5 MT of waste and produces about 60 units of power per day. Wet vegetable waste and cow dung is being used for this purpose. There are no bio-incinerators within the city limits, and none are proposed for the near future.

Construction and Demolition Waste

The city is mostly residential, with not much major construction activity. About, 5 TPD of C&D Waste is generated per day and most of it is dumped. As development activities increase, infrastructure for

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

collection, segregation, in-situ re-utilisation in the construction sites, transportation, recycling plants and market uptake of recycled products in the construction industry will have to be planned according to the Construction and Demolition Rules 2016 of CPCB. At present there are no C&D waste recycling plants within the city.

Household Emissions

The city has excellent LPG penetration both at the commercial and household level. The city has 10375 households and all of them have LPG connections. Additionally, the city has 15 bakeries, all of which have switched to LPG for their ovens. DG sets do pose a slight challenge, as they use diesel and cause localized air pollution.

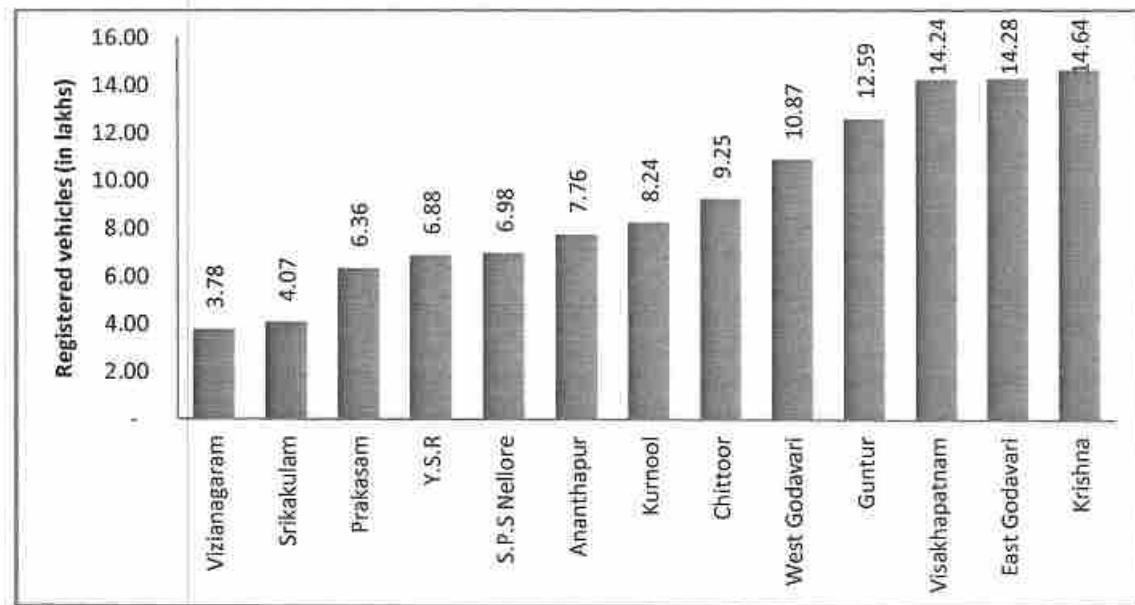

Vehicular Emissions

Vehicles are among the dominant sources of air pollution and are responsible for high toxic exposure. Therefore, mobility strategy is a critical intervention point to control toxic emissions and exposure from vehicles.

As of March 2019, the Srikakulam district had about 3.4 percent (i.e. 4.07 lakhs) of the total registered vehicles in the state of Andhra Pradesh (i.e. 1.19 crores) (see

Graph 1: District-wise number of registered motor vehicles in Andhra Pradesh [March 2019]). Between the years 2015-19, vehicles have grown at a rate of 10.6 percent annually (see Graph 2: Year-wise growth of registered motor vehicles in Srikakulam district).

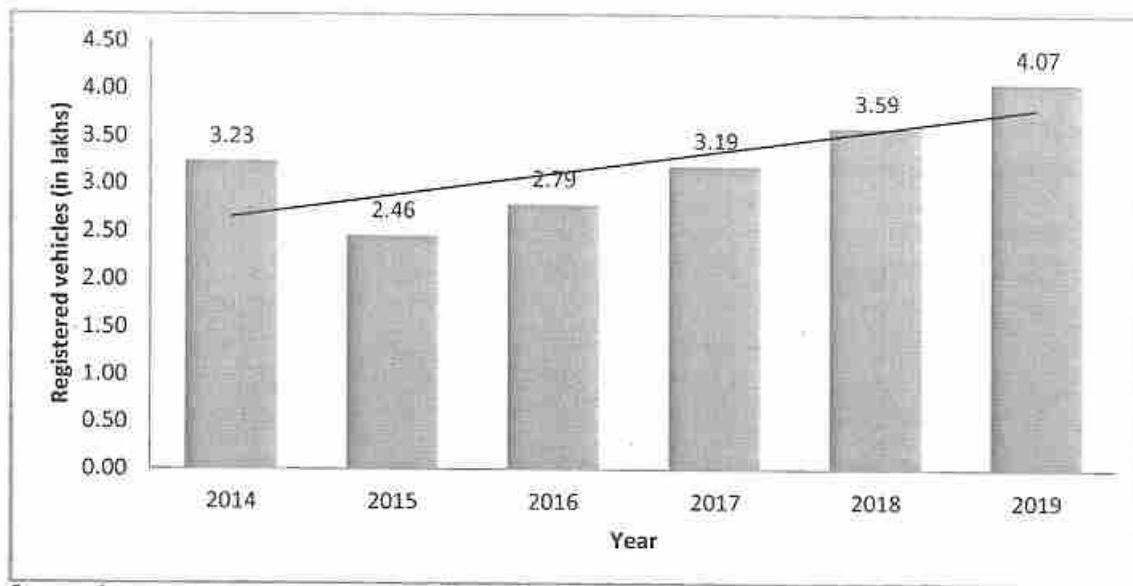

Graph 1: District-wise number of registered motor vehicles in Andhra Pradesh [March 2019]

Source: Statistical abstract, 2019, Directorate of Economics and Statistics, Government of Andhra Pradesh

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

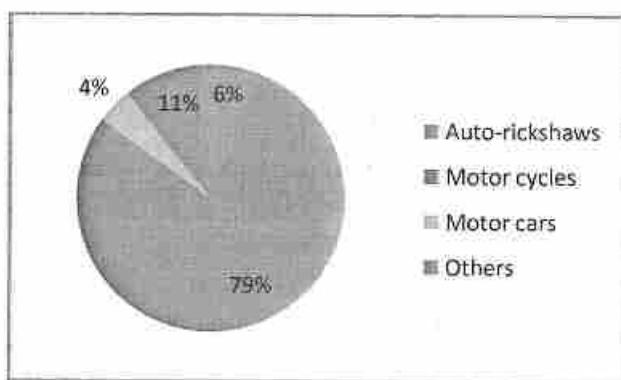

Graph 2: Year-wise growth of registered motor vehicles in Srikakulam district

Source: Statistical abstract, 2014-19, Directorate of Economics and Statistics, Government of Andhra Pradesh

The share of two-wheelers (i.e. motor cycles) in the district is quite high and dominates the fleet (i.e. 79 per cent of the total registered vehicles) (see Graph 3: Percentage distribution of registered vehicles as per vehicle category in Srikakulam district [March 2019]). The district is second lowest in terms of total registered vehicles and lowest in terms of vehicle per thousand population (i.e. 151) in the state ([and Error! Reference source not found.](#)).

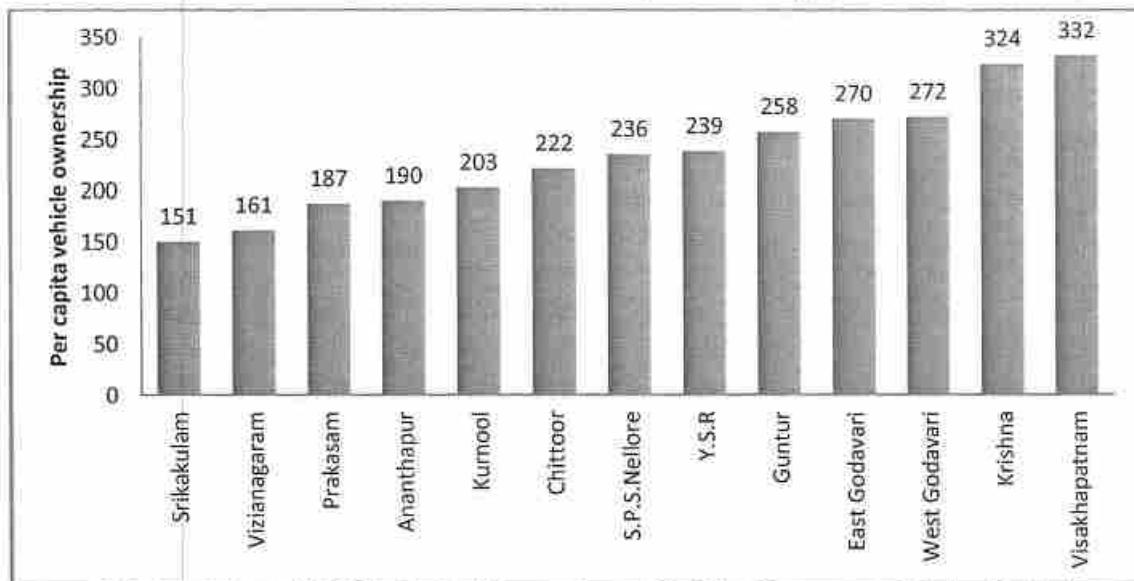

Graph 3: Percentage distribution of registered vehicles as per vehicle category in Srikakulam district [March 2019]

Source: Statistical abstract, 2019, Directorate of Economics and Statistics, Government of Andhra Pradesh

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

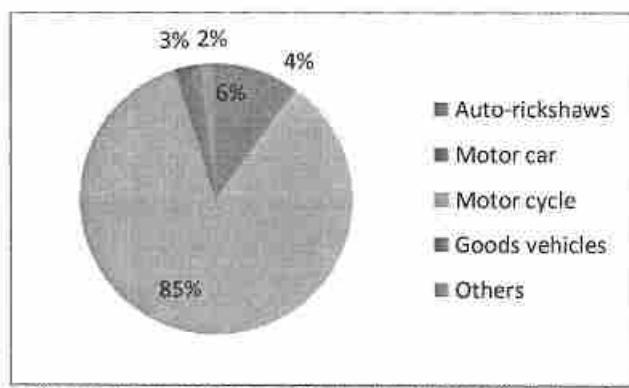

Graph 4: District-wise registered motor vehicles per thousand population [March 2019]

Source: Statistical abstract, 2019, Directorate of Economics and Statistics, Government of Andhra Pradesh

Srikakulam city has around 1.83 lakhs registered vehicles. Motor cycles dominate the fleet and constitutes 85 percent share followed by auto-rickshaws (i.e. 6 percent) and others (see Graph 5: Percentage distribution of registered vehicles as per vehicle category in Srikakulam city).

Graph 5: Percentage distribution of registered vehicles as per vehicle category in Srikakulam city

Source: Regional Transport Authority (RTA), Srikakulam city

There are several policy initiatives in place to address emissions from the on-road vehicular fleet. These include pollution under control certificate programme (PUC); checking of visibly polluting vehicles, green tax and gasous fuel programme and electric vehicle programme.

Srikakulam city has implemented PUC programme. There are 12 PUC testing centres in the city. However, not all of them are connected to the e-Vahan database of the Ministry of Road Transport and Highways. All of them have valid licences as of July 2020. Though a considerable number of vehicles (60 percent) do turn up for PUC testing, granular data is required to check the failure rate

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

and the overall compliance level. The transport department has made efforts to keep tabs on the PUC centres.

At the city level, the traffic police also have a surveillance programme for detecting visibly polluting vehicles. These vehicles are heavily penalized.

This is an opportunity to expand the CNG programme especially for the public transport, intermediate public transport like autos and taxis, and small commercial vehicles. This requires a roadmap for targeted replacement of existing fleet with the vehicles on alternative fuels.

The State Government has also issued guidelines for levying "green tax"ⁱⁱ, wherein older polluting vehicles are taxed higher to discourage them to ply. Vehicles over a certain age have to pay green tax, in accordance to the polluter pay's principle. Vehicles operating on LPG, CNG, Battery or Solar Power are exempt for paying green tax. This is expected to accelerate fleet renewal and phase out older vehicles. It must be noted that the green tax currently is very low (Transport vehicles are expected to pay only Rs 200 per annum after 7 years of registration and non-transport vehicles are expected to pay between Rs 250-500 for five years after 15 years of registration). It is recommended to incorporate a scrappage policy for older vehicles and implement green taxes more strictly.

Electric Mobilityⁱⁱⁱ

The State Government of Andhra Pradesh notified the electric vehicle policy in the year 2018. The policy emphasizes on manufacturing of Electric Vehicles (EV) and its components, charging infrastructure, hydrogen generation and refuelling infrastructure, demand creation for EVs, and research and development.

The policy aims to achieve the following targets:

- Attract combined investments of over INR 30,000 Crore in the next 5 years across the electric mobility ecosystem with an employment potential for 60,000 people.
- Target to bring in manufacturing units of high density energy storage of at least 10GWh capacity in the next 5 years to cater to both domestic as well as export market.
- Target to convert 100 per cent of APSRTC bus fleet of over 11,000 buses into electric buses by 2029, with the first phase of 100 per cent conversion of bus fleet in top 4 cities by 2024.
- Phase out all fossil fuel based commercial fleets and logistics vehicles in top 4 cities by 2024 and all cities by 2030.
- All forms of government vehicles, including vehicles under government corporations, boards and government ambulances etc. Will be converted to electric vehicles by 2024.
- Target to have 10 lakh EVs, combined across all segment of vehicles, by 2024.
- Target to have 1 lakh slow and fast charging stations by 2024.

This is an opportunity to scale up zero emissions mobility in Srikakulam city. The state level policy may be complemented by a city level electric vehicle policy with targeted electrification over the next five years. Srikakulam city can set the milestones in terms of charging infrastructure and targeted electrification of three-wheelers, two-wheelers, small commercial vehicles, feeders and delivery fleet.

City Connectivity and Mobility

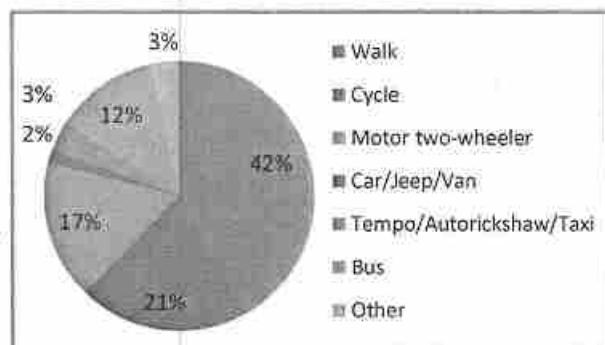

Srikakulam city is well connected with road and rail. The National Highway (NH) 16 connects the city with Bhubaneswar in the North and Vijayawada and Chennai in the South direction. The Srikakulam railway station lies on the Khurda Road-Visakhapatnam section of Howrah-Chennai main line and is administered under Waltair railway division of South Coast Railway zone.

At the district level, according to the 2011 Census, 63 per cent of the total work trips in urban areas of the district are being made by walk and bicycle followed by motor two-wheeler and others (see Graph

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

6: *Modal share in urban areas of Srikakulam district*). Walk trips dominate at about 42 per cent share followed by bicycle and motor two-wheeler at about 21 per cent and 17 per cent respectively.

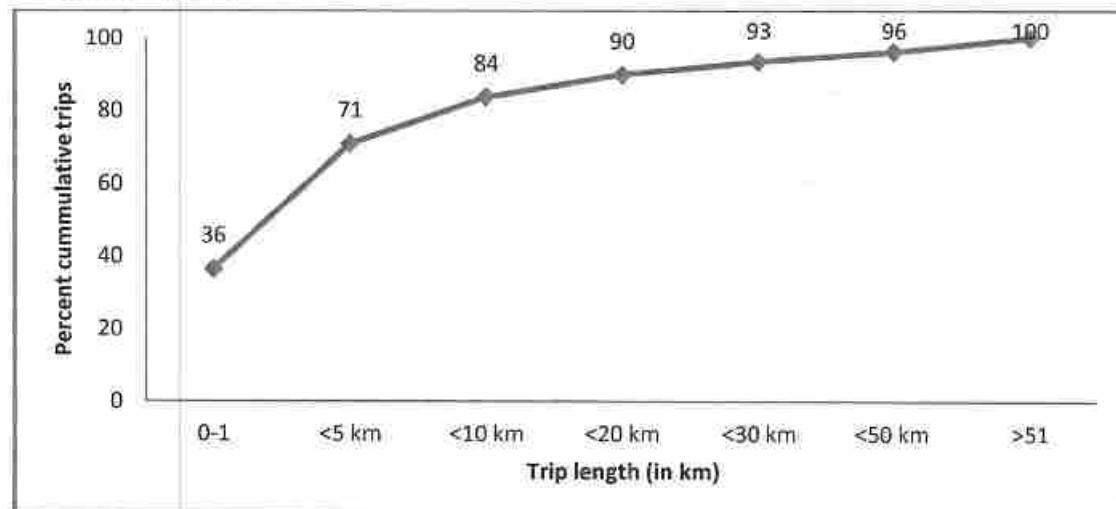

Graph 6: Modal share in urban areas of Srikakulam district

Note: Data does not include "no travel" and "distance not stated" category in Census statistics
Source: Census of India 2011

The distribution of trips as per trip length shows that more than 50 percent of the trips end within bicyclable distance which shows a potential to attract people towards bicycling provided adequate infrastructure is made available (see Graph 7: *Distribution of trip length from place of residence to workplace as per trip length in Srikakulam district*).

Graph 7: Distribution of trip length from place of residence to workplace as per trip length in Srikakulam district

Note: Data does not include "no travel" and "distance not stated" category in Census statistics
Source: Census of India 2011

Public Transport Service

Srikakulam city does not have dedicated bus transport system and is served by the buses of Andhra Pradesh State Road Transport Corporation (APSRTC) that runs inter-city bus service in the state. The total APSRTC bus trips generated from the city on daily basis is 491. Almost for every 10 minutes one bus is being departure from City Bus Station to different places including other Districts and States

Based on the travel pattern, road network pattern, and road inventory of the city, intra-city bus transport can be introduced. For a city size of Srikakulam, mini /midi buses can be used for operation. This

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

service should have routes that penetrate within the city and should be in accordance to accepted level as per MOUD service-level benchmark.

Para transit System

There exists only unorganized Intermediate Para Transit (IPT) in form of auto rickshaw, which runs as a substitute for buses. The bulk of the public transport service in the city is provided by IPT systems including 15,656 autos and shared services. These are low occupancy but high frequency services that meet the local requirement and provide efficient connectivity including the last mile connectivity. There is a need to reorganize and modernize this system and upgrade these services with GPS, route rationalization, service level benchmark. This is an important opportunity to reduce dependence on personal vehicles. These vehicles can also be linked with electric vehicle programme.

Walking and Cycling

The condition of existing footpath is poor which forces pedestrians to walk on the carriage way. Also, the roads lack zebra markings and other safety measures that increase accident risk. But given the fact that walking and cycling constitutes 63 per cent of the modal share in the district and more than 50 per cent of the trips end within bicyclable distance, this presents an immense opportunity to promote infrastructure for walking and cycling to move towards zero emissions. This is an opportunity to reduce dependence on motorized travel for short distances. This can promote clean and active mobility for clean air.

Parking Strategy to Reduce Traffic Volume

Rapid urbanization, motorization, haphazard development, narrow streets, and unorganized parking are all contributing to traffic congestion in the city. Most of the city roads are encroached with haphazardly parked vehicles. The hawking activities are not regularized. The city needs to adopt a city wide parking policy and rules at the early stages that will enable adoption of parking area management plan. This will help to identify the legal parking area and lead to demarcation in all land uses enable enforcement against illegal parking, allow parking charges to manage demand and reduce parking pressure, and prevent parking from happening in green areas, parks, on footpaths and near intersections. This can help to improve integrated management of off-site and on-site parking management, maximise utilisation of the available parking spaces. This can help to promote park and walk strategies. This city wide approach can reduce parking chaos, congestion and pollution. Parking management is considered an important demand management and pollution reduction measure.

Traffic Management and Enforcement

Traffic management and enforcement of traffic rules is handled by the city's traffic police. There are total 7 junctions in the city out of which 4 are signalized and rest are non-signalized. Total 36 junctions in the city are equipped with CCTV cameras. Between the period from January, 2020 to June, 2020, a total of 109 challans were issued for violation of traffic rules. With the use of public awareness system, the traffic police conduct awareness programmes about the vehicular pollution and traffic regulations.

7. Comprehensive Clean Air Action Plan (CAP) for Srikakulam

This pollution source-wise comprehensive action plan has been developed for Srikakulam to meet the NCAP objective of 20-30 per cent reduction in particulate pollution by 2024. This plan indicates the nature, scale, scope and depth of action needed for effective reduction in different sectors.

This plan has integrated the on-going action of the state government in each sector and has further built upon that based on good practices. Sufficient indicators are included in the plan to define the nature and scope of each strategy. This plan has identified the agencies responsible for implementation of each action point and has also indicated the timeline for implementation. This can be monitored for reporting and compliance.

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

This section deals with department-wise clean air action plan and compliance strategy to meet clean air standards. The following tables indicate the short, medium and long-term action along with agencies responsible for the city of Srikakulam. This plan indicates short term as six months; medium term as up to one year and long term 1-2 years.

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

Comprehensive Action Plan (CAP): Short, medium and long-term measures, Source-wise clean air action plan and compliance strategy for non-attainment cities to meet clean air standards.

1. Air Quality

S. No.	Source	Action Points	Micro level Action points	Present status	Agency responsible	Timeline	Budget
1.1.	Air monitoring and assessment	Installation and commissioning of CAAQM stations as per CPCB criteria.	Install and commission one or more CAAQM station as per CPCB criteria as real time monitoring is needed for GRAP. All stations should monitor parameters as specified in NAAQS, 2009 and weather parameters to have real time data.	There are 3 manual monitoring stations within the city and no real time station.	APPCB CPCB	One year and	Departmental funds/ NCAP funds
1.2.	Air monitoring and assessment	Reporting daily air quality data to public	Plan for public dissemination— web-based, billboard-based through visual media, etc. Adopt as per graded response action plan.	The AQI data is available on APPCB website and paryavaran app.	APPCB	Continuous	Departmental funds/ NCAP funds
1.3.	Air monitoring and assessment	Quality control and quality assurance system for air quality data.	Ensure all monitors are functioning and recording data. Adopt detailed protocol for transparent reporting of CEMS data (wherever applicable) (for industrial emissions monitoring and NAMP data	The NAMP data is being uploaded in the CPCB website for public dissemination.	APPCB	Continuous	Departmental funds
1.4.	Air monitoring and assessment	Adopt satellite-based monitoring to complement ground-based air monitoring	Adopt an airshed approach for rural and peri-urban areas as recommended by NCAP and MoEF & CC	To be initiated	APPCB, CPCB, India Meteorological Department (IMD), Ministry of Earth Sciences (MoES)	One year	Departmental funds
1.5.	Air monitoring and assessment	Adopt protocol for assessing annual and daily air quality trend for reporting compliance with the NAAQS and NCAP targets.	Explore application of sensor based monitoring for areas where there are no regulatory monitors and cover unmonitored areas and agricultural burning/forest fires that impacts urban air quality.	Adopt detailed protocol for transparent reporting of CEMS data (wherever applicable) for industrial emissions monitoring and NAMP data	APPCB, CPCB	Six months	Departmental funds/ NCAP funds
1.6.	Assessment of pollution sources	Source apportionment and Emission inventory	The SA study will be given to a competent research institution and study must include the surrounding airshed along with	National Knowledge Network (NKN) act as an advisory board to the CPCB.	APPCB, CPCB	One year	Departmental funds/ NCAP funds

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

		studies to be carried out for the city	a Health Impact Study incorporating exposure impacts.	CPCB along with the advisory board identified the Institute of Repute (IoR) to carry out the SA8 EI studies in all the states of Non-attainment cities.		
1.7	AQI forecasting	Adopt pollution forecasting system for implementation of graded response action plan.	This will also require weather data and prior support from MOES and IMD. The system to be adopted could be on the lines of SAFAR	-	Department of Environment, APPCB, CPCB, MoES	One year Departmental funds/ NCAP funds

2. Industries

S. No.	Source	Action Points	Micro Level Action points	Present Status	Agency responsible	Timeline for action	Budget
2.1	Industrial emissions	Implement SO ₂ and NOx standards	Standards notified by MoEF & CC on 29 January 2018 for 16 categories of industries in and around the city – as applicable.	Under implementation	APPCB	Six months	Nil
2.2	Industrial emissions	Management of emissions from MSME sector	Inspection and monitoring surveillance of small, medium and large-scale category of industries and necessary penal action for violation of standards	Regular and random inspections are being taken up by the APPCB	APPCB, CPCB	One year	Departmental funds
2.3	Industrial emissions	Introduction of Clean Fuels	Notify approved list of fuels for the state Ban use of pet coke and furnace oil Ensure conversion to CNG/PNG from pet coke/furnace oil Strict enforcement against use of high sulphur content fuels and levying fines on the violators. Implement phase-in plan to promote clean fuels in industry like natural gas.	A condition of not to use pet coke in industries is being included in the CFO as per Hon'ble NGT order.	APPCB, Civil Supplies Department	One year	Nil
2.4	Industrial emissions	Use of CEMS	Enforce monitoring of polluting industries within urban air-shed zones via CEMS. Check for installation, upkeep and data collection.	The CEMS data of industries is connected to central server at APPCB head office and is being monitored for any abnormalities.	APPCB	Six months	Nil
2.5	Industrial emissions	Control of fugitive emissions across all industries	Implementation of control measures during various industrial processes (in ancillary units, material transfer and handling etc). Construction of paved roads around all major industrial belts and estates; Installation of dust suppression system and green belt	All the required conditions are kept in the CFO and are being implemented by the concerned industries.	APPCB	Six months	Nil

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

S. No.	Source	Action Points	Micro Level Action points	Present Status	Agency responsible	Timeline for action	Budget
2.6 Pesticide Industries							
2.6.1	Industrial Emissions	Control of fugitive emissions Odour	Ensure to comply with the NAAQS, 2009 outside the premises and stack/ incinerators emissions as specified in the CFO order.	The industries are implementing all the conditions as specified in the CFO	APPCB	Continuous	Nil
2.7 Chemical Industries (Nitric acid and Ammonium nitrate)							
2.7.1	Industrial Emissions	Control of acid fumes	Ensure to comply with the NAAQS, 2009 outside the premises and stack/ chimney emissions as specified in the CFO order.	Install and operate Air Pollution Controlling Equipment or Devices (APCE) Install and maintain fixed ammonia sensors to detect the leakages from ammonium nitrate plant.	APPCB	Continuous	Nil

3. Brick Kilns, Hot Mix Plants and Stone Crushers

S. No.	Source	Action points	Micro level Action points	Present status	Agency responsible	Timeline	Budget
3.1	Hot mix plants	Use of clean fuels	Establish a protocol to use cleaner fuels &	There are few hot mix plants	MORTH, Municipal	One year	Departmental

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

S. No.	Source	Action points	Micro level Action points	Present status	Agency responsible	Timeline	Budget
3.2	Hot mix plants	Emissions monitoring	Technology for asphalt mixing and minimizing the number of hot-mix plants. Stack heights of these plants should be atleast 25 meters (as prescribed by Haryana government) or prescribed by MoEE&GC should be maintained	and concrete batching plants around the city temporarily working for construction and maintenance work for NH 16.	Corporation, APPCB Municipal Corporation, APPCB	One year	Departmental funds
3.3	Stone crushers			To be initiated	Local administration, APPCB, Department of Industries, Commerce and Enterprises, MSME	One year	Departmental funds
3.3.1	Stone crushers	Relocation of stone crushers	Remove stone crushers that are close to the city; adopt stringent dust control measures and greening as applicable. Green buffer zone should be maintained with a minimum width of 10 meters shall be maintained				
3.4	Brick Kilns			The brick kilns around the city are under the jurisdiction of District Administration.	APPCB District Administration	Six months	Departmental funds
3.4.1	Brick Kilns	Inventory of brick kilns	Inventorize all illegal brick kilns. Mandatory conversion of all brick kilns in the district to zigzag technology and closure of all illegal brick kilns.		APPCB, Municipal Corporation, Department of MSME	One year	Departmental funds
3.4.2	Brick Kilns	Design restrictions	1. Enforce restrictions on operations of brick kilns within urban airshed zones during high pollution periods; allow only those Brick kilns that comply with rectangular zig-zag design with induced draft or those with improved technology. 2. Convert all brick kilns to rectangular design induced zigzag technology – from FCBT natural draft.				

4. Vehicles

S. No.	Source	Action Points	Micro level action points	Present status	Agency responsible	Timeline	Budget
4.1	Vehicular emissions	Emission standards and fuel quality for new vehicles	Ensure implementation of Supreme Court order of October 24, 2018 and subsequent Central Government notification by MoRTH- Only BS VI compliant fuels and vehicles to be registered after April 1, 2020.	Only BS VI compliant vehicles are being registered after April 1, 2020. Regular / random checks are being conducted by RTO's to ensure the implementation of Hon'ble Supreme Court order.	Transport Department and Auto Industry Associations	Ongoing	NIL

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

S. No.	Source	Action Points	Micro level action points	Present status	Agency responsible	Timeline	Budget
4.2	Vehicular emissions	Gaseous programme vehicles	Shift/replacement of petrol/diesel fuel for driven vehicles viz., auto rickshaws, taxis and buses to CNG/LPG based vehicles.	-	Transport Department, Department of ICE, MoPNG	1 year	Nil
4.3	Vehicular emissions	Encourage Fuels	Introduce favorable fiscal measures such as reduction in road tax to promote clean fuels and vehicles.	The State Government has issued guidelines to exempt levy of green tax on vehicles operated by LPG, CNG, battery and solar power.	Transport Department	1 year	Nil
4.4	Tail emissions	pipe	Strengthen periodic auditing and oversight of PUC centres and calibration of equipment and third-party checks.	1. Ensure PUC centers are upgraded to be capable of testing all the notified parameters and vehicles including BS VI. 2. Ensure further strengthening of ongoing linking of PUC centers with NIC vahan server to eliminate manual intervention in PUC testing. 3. Ensure all vehicles obtain valid PUC certificate vehicles without PUC certificates are not allowed to ply. Link PUC certificate with annual vehicle insurance.	Communication has made to the MORTH for taking necessary action in this matter. Integration with NIC vahan software is initiated. PUC program in place, though all not linked to e-Vahan server	Transport Department	1 year
4.5	Tail emissions	pipe	Ensure universal linking of PUC centres with remote server and eliminate manual intervention in PUC testing	Implementation testing of all notified emissions parameters including Lambda testing for petrol cars as notified by MORTH in 2004.	-	Transport Department	6 months
4.6	Tail emissions	pipe	Integrate on-board diagnostic (OBD) system fitted in new vehicles with vehicle inspection.	As per the MORTH advisory PUC centres have to check malfunctioning indicator light on dash boards of vehicles. If the light is found on vehicles to be sent back for testing in authorized workshops. Additionally, PUC centres need to check if the OBD is functioning properly.	Presently there is no OBD system within the city.	Transport Department	6 months
4.7	Tail emissions	pipe	Ensure availability of ammonia based urea for BS VI diesel vehicles	Ensure availability of the auto grade urea for the vehicles fitted with SCR system (selective catalytic reducing system) for NOx control in BS VI vehicles in coordination with the oil companies.	Availability of ammonia based urea in fuel stations as and when BS VI fuels available in the market.	Transport Department, Department of Civil Supplies and Oil companies	6 months
4.8	Tail emissions	pipe	Penalising the visibly polluting vehicles	Remove/impose penalty/ challans and launch extensive awareness drive against visibly polluting vehicles.	Traffic department is imposing and collecting the penalties from owners of visibly polluting	Transport Department	Continuous

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

S No.	Source	Action Points	Micro level action points	Present status	Agency responsible	Timeline	Budget
4.9	Tail emissions	Set up modern vehicle centres upgraded for emissions	Ensure annual fitness and road worthiness tests for commercial vehicles and diesel vehicles are conducted in well equipped centralised testing centres. These centres can cater to the region	Transport department is regularly conducting the fitness checks to phase out vehicles which are 15 years & above and or completing the 2,50,000 km	Transport Department	6 months	Departmental funds
4.10	Emissions from older vehicles	Green Tax And Vehicle labelling or sticker programme out old vehicles	Ensure measures to increase the green tax on petrol and diesel vehicles to encourage the LPG, CNG and battery operated vehicles.	The State Government has issued guidelines to exempt levy of green tax on vehicles operated by LPG, CNG, battery and solar power.	Transport Department	6 months	Nil
4.11	Freight Transport	Diversion of truck traffic	Ensure phasing out of old vehicles with the help of color coded sticker programme and age linked road tax policy.	Green tax need to be paid by Transport vehicles and Non-transport vehicles based on the age cap from the date of their registration:	Transport vehicles and Non-transport vehicles based on the age cap from the date of their registration:		
4.11.1	Emissions from trucks		Set up scrapping infrastructure for scientific dismantling and disposal of old vehicles and material recovery as per the CPCB guidelines. Set up recycling units that are authorized with proper environmental guidelines and integrate the current informal scrapping units		District and local administration, Municipal Corporation and PWD, NHAI	6 months	Nil
4.11.2	Emissions from trucks	Ensure fitness of trucks	Rationalise movement pattern of heavy-duty trucks, and their routes and logistic infrastructure, spacing of warehouses/wholesale marts etc. entry points and timing to reduce exposure levels • Provide truck rest areas/parks along national and state highways to prevent entry of trucks into cities during the day time or peak hours to continue. • Local trucks can shift to LNG/CNG • Use of off-peak passenger travel times to move freight and restrict the entry of heavy vehicles into cities during the day to continue. Ensure fitness and road worthiness of trucks and compliance to set standards. Install weigh in motion bridges in all city	There are no existing bypass routes for the Srikakulam city	Transport Department	6 months	Departmental funds

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

S. No.	Source	Action Points	Micro level action points	Present status	Agency responsible	Timeline	Budget
4.12 Fuel Quality and Clean Fuel standards							
4.12.1	Poor fuel quality	Fuel quality testing to check adulteration	Ensure to create system to carry out fuel checks for fuel monitoring the fuel quality through surprise fuel testing for all transport and non-transport fuels.	Department of Civil Supplies is ensuring the regular fuel checks through oil companies.	MoPNG, Oil marketing companies, Department of Civil Supplies	Continuous	Departmental funds
4.12.2	Poor fuel quality	Emission control at Fuel Stations	Install vapour recovery systems in fuel outlets to reduce benzene and VOC emissions to comply with the Hon'ble NGT directions. In respect of installation of stage I and Stage II vapour recovery system in all new retail outlets with capacity 300 KL MS per month in cities with population more than 1 lakh,	There is no monitoring system for VOC emissions in the city.	Department of Civil Supplies, Transport department, State Oil Coordinator	6 months	Nil
4.12.3	Poor fuel quality	Adopt favourable taxation policy for clean fuels	Reduce VAT and cess on CNG	-	Transport Department	6 months	

5. Urban Mobility

S. No.	Source	Action Points	Micro level action points	Present status	Agency responsible	Timeline	Budget
5.1 City Bus Service Improvement							
5.1.1	Vehicular emissions	Ensure setting up of Public transport intra city bus services	<ul style="list-style-type: none"> Implement intra-city bus services based on travel demand of city population. For a city size of Srikakulam, mini /midi buses can be used for operation Service level benchmark of Ministry of Housing and Urban Affairs should be followed to decide fleet size and network for adequate city penetration Implement phase wise requirement of bus fleet, transit infrastructures i.e. depots, terminals and bus queue shelters etc. Ensure adoption of EV buses through 	Presently, city does not have a dedicated bus service	Bus Undertaking	1 - 2 years	Departmental Funds

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

S. No.	Source	Action Points	Micro level action points	Present status	Agency responsible	Timeline	Budget
5.2	Vehicular emissions	Regularization of IPT through registration and planning	<ul style="list-style-type: none"> • Use modern technologies like Global Positioning Device (GPS), Public Information System (PIS) etc. to manage the services, locate buses and also to make it more attractive to commuters. • Introduction of Electronic Ticketing Machine for ticketing purposes. It helps to record and manage trip details, number of users, and other trip characteristics of public transport users. 	IPT system is un-organized.	RTQ, Transport Department, GoAP, Urban Local Bodies	1 – 2 Years	Departmental Funds
5.2.1	Vehicular emissions	Shared IPT, Taxis, and electric rickshaws	<ul style="list-style-type: none"> • Implementation of IPT operation plan and IPT route network connecting residential areas to important nodes (transport nodes, shopping areas, or other areas with high footfall) • Implement well planned dedicated parking and pick-up and drop-off points for IPT • Shared IPT/Autos – specify route, fix fare and carrying capacity. These should be mostly provided to connect very high footfall areas for easy pick up and drop-off • Install GPS in autos for monitoring • Plan and enforce safety standards for IPT vehicles for driver safety and safety in driving etc to improve service. 	IPT system is un-organized.	RTQ, Transport Department, GoAP, Urban Local Bodies	1 – 2 Years	Departmental Funds
5.3	Vehicular emissions	Build non-motorized transport network	<p>All major arterial and sub-arterial roads should be redesigned to have dedicated/protected space for walking, cycling. Enmark street vending activities with respect to complete street principles and universal accessibility</p> <p>(For good street design, refer to Design Standards can be followed from Indian Road Congress (IRC) 103-2012, or improved draft IRC code on road design, or any other adopted standards and good</p>	<p>The condition of existing footpath is poor which forces pedestrians to walk on the carriage way. Also, the roads lack zebra markings and other safety measures that increase accident risk.</p>	Urban Bodies	Local	1 year
5.3.1	Vehicular emissions	Build adequate street network that is walkable, cycleable and provides safe mobility for all road users

5.7.3	Vehicular emissions	Enhance EV adaptation in IPT segment which is an important mode of public transport.	<ul style="list-style-type: none"> • Incentives/schemes to IPT owners to transition from ICE vehicles to EV such as road tax rebate, concession on charges, credit on transition to EV, etc. • Provide registration for e-rickshaws 	-	Ltd. / NREDCAP)	Transport Department, Urban Bodies, APERC	2 years	NIL
5.7.4	Vehicular emissions	Priority parking for EV/Provision of dedicated on-street parking spaces for commercial/ personal/ vehicles)	<ul style="list-style-type: none"> • Carry out inventory of area where dedicated EV parking is feasible • Implement incentives like waiver of parking fees for electric vehicle among others. 	-	Local	1 year	NIL	

6. Waste Management

S. No.	Source	Action Points	Micro level Action points	Present Status	Agency responsible	Timeline	Budget
6.1	Municipal Solid Waste	Ensure Implementation of Solid Waste Management Rules 2016 notified by MoEF & CC.	<ul style="list-style-type: none"> • Implement a plan for collection and management of waste based on the quantity of solid waste collected daily. Quantify waste stream for each municipality and peri urban areas to plan infrastructure for collection and recycling. • Implement household level segregation, segregated transport, recycling facilities and composting facilities • Ensure GPS tracking of waste collection and transportation vehicles to dump yards and mobile spot check squads for enforcement. • Implement a plan to monitor garbage burning within city limits through sanitation team. • Levy and collect hefty fines from the violator's viz., dumping of solid waste in open areas or unauthorised places, burning of solid waste/ biomass and other waste. • Stringent implementation of amended by 	<p>Regular inspection is done by Ward Sanitation environment secretaries to control open burning of solid waste.</p> <p>Garbage burning is now significantly under control.</p>	Municipal Corporation, Office of the District Magistrate	6 months	NIL

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

S. No.	Source	Action Points	Micro level Action points	Present Status	Agency responsible	Timeline	Budget
			<ul style="list-style-type: none"> laws and collect fine from the violators Mapping of all waste dumping grounds in the region as well as mobile spot check squads for enforcement. 				
6.2	Municipal Waste	Solid Management of Dumping yards and treatment facilities	<ul style="list-style-type: none"> Plan to convert Thandevulasa dumping yard into scientific processing facility to ensure further processing of municipal solid waste. The processing facility should be planned and grounded in a time-bound manner to avoid further open dumping of the collected solid waste Ensure safety measures and management at dump yard to avoid spontaneous fire at the site. Use landfill management techniques based on CPCB guidelines. 	<p>The solid waste collected from the household is being dumped at the Thandevulasa dump yard without any further treatment. Water facility is provided to arrest the fire in emergency situations.</p>	Municipal Corporation, Office of the District Magistrate	1 Year	Departmental Funds.
6.3	Municipal Waste	Solid Zero landfill policy	<ul style="list-style-type: none"> Adopt roadmap for zero landfill policy by promoting decentralized waste segregation, reuse and recycling 	About 20 per cent of dry waste treated by MRF system and 15 per cent of wet waste is processed by Home Composting and Vermi compost. The landfill site and is monitored for spontaneous fire.	Municipal Corporation, APPCB	1 Year	
6.4	Solid Waste	Control of burning of biomass and crop residue and	<ul style="list-style-type: none"> Ensure proper collection of horticulture/garden waste (bio-mass) from parks and open areas and its disposal through composting within the premises. Ensure ban on burning of agriculture waste and crop residue and its implementation. 	Extensive programmes were launched by Agriculture department like Polambadi & Polam pilustondi, for creating awareness in Community not to burn agricultural wastes/ Stubbles	Agriculture department, MA & UD	6 months	Departmental Funds
6.5	Municipal Waste	Installation of waste to energy plant.	<ul style="list-style-type: none"> Ensure to avoid installation of Waste to Energy plant if the city is having an efficient waste segregation system in place. If required develop a proper plan with strong siting policy to locate the Waste to Energy plant away from habitation and sensitive areas including neighbourhoods of low-income groups. 	No waste to energy plant is located either within the Srikakulam city or Srikakulam district.	Municipal Corporation, Office of the District Magistrate and APPCB	1 year	Departmental funds

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

S. No.	Source	Action Points	Micro level Action points	Present Status	Agency responsible	Timeline	Budget
6.6	Incinerators	Siting CEMS	<ul style="list-style-type: none"> Ensure stringent emission norms and real time monitoring of the emissions data through CEMS: Use of state-of-the-art technology and provide real time emissions data to APPCB. 	<p>Ms. Rainbow Industries, Srikakulam is a common biomedical waste management facility (CBMTWF) is collecting and treating all the waste generated within the district.</p>	APPCB	1 year	Departmental funds
6.7	Construction and Demolition waste	Ensure implementation of Construction & Demolition Waste Management Rules, 2016 and subsequent amendments:	<ul style="list-style-type: none"> Provide a siting policy and an open platform for biomedical incinerators. Implement CEMS for incinerators and provide data on an open progressive. Provide a C&D waste management facility for segregation and disposal of collected waste from the construction sites across the city. The Waste Management Plan should be combined with building permits and made compulsory before any construction/demolition/remodeling activity by the bulk waste generators. Adopt and implement dust control measures for all types of construction - buildings and infrastructure. Undertake control measures for fugitive emissions from material handling, conveying, screening operations and through water sprinkling, curtains, barriers, and dust suppression units. Introduce steeper penalties for non-compliance in all construction sites The preventive measures as mentioned in CPCB guidelines. Construction agencies to be made liable. Impose penalty for non-compliance. 	<p>Around 5 TPD of C&D waste is generated and being utilized for filling the low lying areas.</p> <p>Municipal Corporation APPCB</p>	6 months	Departmental funds	
6.8	Construction and Demolition waste	Zoning construction activities	Enforce restrictions on construction activities within urban airshed zones during high pollution period.	A notification was issued by Municipal Corporation, Srikakulam for handling of C&D waste within the city limits.	Municipal Corporations	6 months	Departmental funds
6.9	Construction and Demolition waste	Notify rules to segregate construction and demolition waste	Provide a network of decentralized C&D waste segregation and collection sites across the city.	For material handling, construction and	Municipal Corporations	1-2 years	Departmental funds

			sale of the local fireworks and regular inspections to ensure only licensed vendors are selling the crackers.	Chief Controller of Explosives, Petroleum and Explosive Safety Organization (PESO)			

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

a. Graded Response Action Plan (GRAP) proposed for Srikakulam City

The proposed Graded Response Action Plan is meant to be temporary measures for duration of smog episodes and is implemented according to the severity of the daily air pollution levels. Once the levels come down and stabilize, measures are withdrawn. The objective of the GRAP is to prevent pollution from getting worse when adverse weather conditions trap and spike pollution.

The proposed GRAP includes set of measures to be implemented with greater vigor and stringency to prevent and avoid high level of air pollution in cities. This is linked to the national air quality index that categorizes daily air quality as good, satisfactory, moderate, poor, very poor, severe, and emergency. All actions suggested for each category are cumulative and add up to the level of emergency as air quality worsens. For implementation of GRAP, the scientific Task Force under APPCB will advise the District Level monitoring committee on the daily pollution levels and forecasting based on real time monitoring. Accordingly, the Committee may issue notices to the city authorities to implement the pre-defined action. Each implementing department will appoint a nodal officer to facilitate implementation. The action notified for moderate and poor categories that are largely about stringent enforcement in different sectors can become default action for continuous implementation throughout the year. Additional measures meant for very poor and severe may be notified which such situation develops especially during calm and inversion conditions.

This will require daily air quality data reporting on the SPCB website and public dissemination system on air quality and health alert.

Graded Response Action Plan (GRAP) for Reducing Air Pollution in Non-attainment Cities of Andhra Pradesh

Moderate to poor Poor - When PM2.5 levels are between 91-120 microgramme per cum or PM10 levels are between 251-350 microgramme per cum; Moderate - When PM2.5 is between 61-90 microgramme per cum or PM10 is between 101-250 microgramme per cum	
Action to be taken	Agency responsible
Stringently enforce/stop garbage burning in landfills and other places and impose heavy fines on person responsible	Municipal Corporations
Close/stringently enforce all pollution control regulations in brick kilns and industries	State Pollution Control Board
Stringently enforce pollution control in thermal power plants through Pollution Control Board monitoring	State Pollution Control Board
Do periodic mechanized sweeping on roads particularly in roads with heavy traffic and water sprinkling every two days	Municipal Corporations Traffic Police, PWD
Strict vigilance and no tolerance for visible emissions – stop plying of visibly polluting vehicles by impounding or heavy fine	Department of Transport Traffic Police
Stringently enforce rules for dust control in construction activities and close non-compliant sites	District Administration, Police
Deploy traffic police for smooth traffic flow at identified vulnerable areas	Traffic Police
Divert non-destined truck traffic	Municipal Corporations Traffic Police
Strictly enforce Supreme Court orders on firecrackers	SPCB, District Administration in consultation with Chief Controller of Explosives, Petroleum and Explosive Safety Organization (PESO); Police
Ensure fly ash ponds are watered every alternate day during summer months (March-May)	Plant in charge of Power Plants
Information dissemination, social media, mobile Apps should be used to inform people about the pollution levels, contact details of control room, enable them to report polluting activities/sources to the concerned authorities, and actions that will be taken by government based on the level of pollution.	State Pollution Control Board District Administration

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

<u>Very Poor</u> When PM2.5 levels are between 121-250 microgramme per cum or PM10 levels are between 351-430 microgramme per cum	
Action to be taken	Agency responsible
Control use of diesel generator sets by improving electricity supply	State Pollution Control Boards
Restrict parking and enhance parking fee by 3-4 times in commercial areas to reduce usage of personal vehicles	Municipal Corporations
Augment public transport services by increasing frequency and ensure adequate para transit services	Department of Transport State Transport Corporation
Stop use of coal/firewood in hotels and open eateries	Municipal Corporations
Alert in newspapers/TV to advise people with respiratory and cardiac patients to avoid polluted areas and restrict outdoor movement.	State Pollution Control Board

<u>Severe</u> When PM2.5 levels are above 250 microgramme per cum or PM10 levels are above 430 microgramme per cum	
Action to be taken	Agency responsible
Close brick kilns, Hot Mix plants, Stone Crushers and other highly polluting units or as applicable locally	State Pollution Control Board District Administration Police
Shut down / minimize operation of coal based polluting industrial units and plants, if emissions are found to be beyond permissible limit; Allow plants on cleaner fuels like natural gas, electricity etc.	State Pollution Control Boards
Intensify public transport services. Introduce differential rates to encourage off-peak travel.	Transport Department State Transport Corporations
Increase frequency of mechanized cleaning of road and sprinkling of water on roads. Identify road stretches with high dust generation.	All road owning agencies including Municipal Corporations, Public Works Department and National Highway Authority of India
Restrict movement of trucks inside the coal field mine areas	State pollution control board, Department of Steel and mine

<u>Severe + or Emergency</u> When PM2.5 levels cross 300 microgramme per cum or PM10 levels cross 500 microgramme per cum (or 5 times above the standard) or persist for 48 hrs or more.	
Action to be taken	Agency responsible
Stop entry of diesel truck traffic into city (except essential commodities)	Traffic Police Municipal Corporations
Stop construction activities	Pollution Control Board Municipal Corporations
Introduce some form of vehicle restraint measures for private vehicles based on license plate numbers (odd/even scheme), or introduce low emissions zones in the city to stop entry of polluting vehicles (old and ageing and polluting diesel vehicles etc).	Transport Department Traffic Police
State Pollution Control Board Task Force to take decision on any additional steps including shutting of schools	SPCB

Action to be taken by public

While the National Air Quality Index (AQI) and health advisory will inform people about the dangers of exposure, people are also expected to take precautionary measures to protect themselves. Suggested actions by public are listed below:

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

Level according to AQI	Action
Very poor, severe	<p>Those suffering from heart diseases, asthma, and other respiratory disease may consider avoiding undue and prolonged exposure</p> <p>Schools to suspend all outdoor activities and sport events</p> <p>Report visible emissions from vehicles, industries, power plants, garbage burning, and other non-compliances to the respective control rooms</p> <p>Do not use diesel and kerosene generators</p> <p>Maintain vehicles properly (PUC certificate, replace car air filter, maintain right tire pressure)</p> <p>Minimize unnecessary travel, use public transport & avoid using private vehicles.</p>

b. Monitoring Mechanism for Implementation

As per the directions of the Hon'ble National Green Tribunal, dated 08.10.2018, the Air Quality Monitoring Committee (AQMC) with six members has been constituted by the Govt. of Andhra Pradesh, vide G.O. Rt. No. 167, dated 14.11.2018 for the preparation of Action Plans. The Committee, as directed will function under the overall supervision coordination of Principle Secretary, Environment. This will further be supervised by Chief Secretary by ensuring intra sectorial coordination.

MoEF & CC vide its Letter No. D.O.No. Q-16017/12/2019-CPA Dated: 24.04.2019, requested to constitute three committees at state level for effective implementation of NCAP. Accordingly Govt. of Andhra Pradesh, vide G.O. Rt. No. 46, dated 11.06.2020 has constituted three committees namely **Steering Committee**: Headed by the Chief Secretary, **Monitoring Committee**: Head of the Departments and **Implementation Committee**: District Head/ In-charge for effective implementation of NCAP to control air pollution in the 13 Non-attainment cities and towns of Andhra Pradesh.

These Action Plans will further be communicated to all the stakeholders for compliance for control of ambient air quality in Srikakulam city. Regular meetings will be convened by Implementation Committee to ensure implementation of the action plans at District level and the Compliance of the Action Plan points by the concerned stakeholder departments will be reviewed at regular intervals by the Principal Secretary, Environment & the Chief Secretary, Government of Andhra Pradesh.

MEMBER SECRETARY

Comprehensive Action Plan for Clean Air - Non-attainment cities: Srikakulam

Annexure II - Air Quality monitoring in the region

Andhra Pradesh Pollution Control Board (APPCB) is the regulatory body to oversee all air pollution activities all over the state. As per the provisions of the Air (Prevention and Control of Pollution) Act, 1981, APPCB is monitoring ambient air quality in cities and important towns including district headquarters of the State of Andhra Pradesh. Details of the cities and towns monitored for ambient air quality are as follows:

Table 8: Number of monitoring stations across Andhra Pradesh
