**Water 1. Standard flow meter and flow recorder at final outlet of ETP & CETP.**

Issue	Time limit	Action taken	Status of compliance of action point
Flow meter to be installed at the final outlet chamber of the units having more than 100 KL/day effluent volume and 25 kl/day	31.10.2010	<ul style="list-style-type: none"> <li>• <b>Vatva -</b></li> <li>• All the sumps are equipped with MFM and at a time only one unit is allowed to discharge waste water. Arrangement is made to note down discharge quantity.</li> <li>• CETP of Vatva (capacity 16 MLD) has installed MFM at the outlet.</li> <li>• CETP has installed SCADA system at seven sump rooms on trial and proposal is submitted to GOG for converting all 92 sump rooms.</li> <li>• Online TOC meter is installed at the final outlet of CETP</li>   <li>• <b>Narol-</b></li> <li>• All the industrial units have installed MFM at the final outlet.</li>   <li>• ATPA has installed SCADA system at sump No 6 and proposed to install SCADA system at each sump.</li> </ul>	Complied

**2. Water consumption from non permitted sources**  
**(e.g. Borewell, tanker etc.) or more than permitted quantity.**

Issue	Time limit	Action taken	Status of compliance of action point
Water consumption from non-permitted sources (e.g. bore well, tanker etc) or more than permitted quantity is to be identified	31/08/2010	<ul style="list-style-type: none"> <li>•<b>Vatva-</b> Water supply is managed by separate body named “Vatva Industrial Infrastructure Development Ltd” which also charges water intake from bore well.</li> <li>•In Vatva estate 45 units have their own official bore wells which are generally not operated regularly. New <i>bore wells</i> are not permitted without permission of GIDC.</li> <li>•GIDC carries out metering of these bore well &amp; charges accordingly.</li> <li>•Flow meters are installed at each CETP incoming and outgoing lines and water mass balance is carried out daily.</li>   <li>•<b>Narol-</b> In this estate water source is individual bore well. Almost all units in Narol area have installed magnetic flow meter on bore wells and record of the same is maintained. A Special drive is carried out for quantification of water consumption. Verification of the same is done during routine visits also.</li> </ul>	Complied

### 3. Sealing of unauthorized discharge other than regular discharge of effluent.

Issue	Time limit	Action taken	Status of compliance of action point
<p>Identification of the streams having non-biodegradable effluent containing refractory COD, toxicants like Ammonical nitrogen here treat ability not possible/difficult/tech no economically not viable</p>	<p>31/08/2010</p>	<ul style="list-style-type: none"> <li>• The list of 103 units which are having high COD have been identified and they have either segregated concentrated streams (mainly intermediates), and sending to Common MEE for further treatment or they have upgraded their treatment facility as per the submitted Action Plan. Later on 52 units have also up graded their ETP. Hence total 155 units have now up graded their ETP.</li> <li>• Total 8 industrial incinerators are operational.</li> <li>• Total 10 individual MEE have been commissioned recently.</li> <li>• GESCSL &amp; GPCB jointly carrying out qualitative &amp; quantitative study of concentrated stream based on product profiles for prioritization of membership of common MEE among their members.</li> <li>• <u>Narol</u>- This is a Textile cluster having bio degradable stream with comparatively low COD but having high hydraulic load.</li> <li>• List of units (70) having high hydraulic load are identified and most of them have now upgraded their ETP as per the submitted Action Plan.</li> </ul>	<p>Complied</p> <p style="text-align: right;">8</p>

## 7. Reduction of pollution load on CETP

Issue	Time limit	Action taken	Status of compliance of action point
<p>All the units have to strengthen individual treatment plant to meet with the CETP inlet norms, so as to reduce inlet pollution load on CETP and thereby improvement in treated effluent quality from CETP</p>	<p>31/03/2011</p>	<p>•<b>Vatva-</b> About 103 units (mainly Dyes &amp; dyes intermediates) are identified which required to strengthen their existing ETP. They were asked to submit Action Plan and all the units have now upgraded their ETP. Some have also become the members of NOVEL.</p> <p>•Later on 52 units have also up graded their ETP. Hence total 155 units have now up graded their ETP.</p> <p>•<b>Narol-</b>About 60 units (Textiles)are identified which required to strengthen their existing ETP. They were asked to submit Action Plan and all the units have now upgraded their ETP.</p>	<p>Complied</p>

Issue	Time limit	Action taken	Status of compliance of action point
Reduction of pollution load on CETP	31/03/2011	<ul style="list-style-type: none"> <li>•<b>Vatva-</b> As efforts have made to up grade ETPs at individual level, there is reduction in pollution load on CETP. Units generating highly acidic stream (Spent acid) are member of Novel Spent Acid Management project and units are sending such streams to NOVEL which has resulted into stoppage of illegal discharge of highly acidic wastewater. This NOVEL Project is unique which manages the spent acid generation from units.(Present receipt is about 300 MT/day. ( Members- 64 of Vatva)</li> <li>•A new company has been formed in the name of “Society for Clean Earth” with project cost of Rs. 15 Crores for treatment of conc. Effluent stream. The project will consist of multi effect evaporator, cyclomatic evaporator and spray dryer having 43 member units. A common spray dryer of 200 KLD is already commissioned.</li> <li>•300 KLD capacity 8 effect MEE is commissioned for treatment of concentrated effluent of member units by GESCSL. And one common spray dryer of ----- capacity is under installation.</li> </ul>	Complied

## 7-A upgradation of CETP.

Issue	Time limit	Action taken	Status of compliance of action point
Up gradation of CETP	31/03/2011	<ul style="list-style-type: none"> <li>•<b>Vatva-</b></li> <li>•CETP Vatva (16 MLD) is up-graded with additional clarifloculator (2310 M3 capacity with investment of Rs.2.5 crores) ,</li> <li>•Details of aeration tank and sst expenditure</li> <li>•Based on experience of the pilot plant, it is decided to provide a large capacity of 300 M<sup>3</sup>/day MEE (Investment about 27.10 crore) is commissioned. Total 224 units have become the members of MEE.</li> <li>•CETP vatva has submitted the EMS up gradation programme which includes installation of additional aeration tank with secondary clarifier. ( Capacity-30000 M<sup>3</sup> Volume) the detailed process, engineering and civil structural design is under progress and system will be commissioned by March 2015. (Investment 25 crore)</li> <li>•Thus total new investment for up gradation of CETP will be 56.10 crores.</li> </ul>	Partially Complied

## CONCLUSIONS

Households' survey was conducted in areas of Vatva and Narol and three villages (Adalaja, Nenpur and Dhegam) near those two industrial areas. The sample was randomly selected.

In the selected areas, 2105 families were randomly interviewed using road maps and house numbers available with the local authorities. Out of these 2105 families, 1335 are from Vatva and Narol areas and remaining 770 are from three villages (Adalaja, Nenpur and Dhegam) near by Vatva and Narol areas. Sample surveyed from Vatva and Narol areas is called '**focus group**' and three villages sample is treated as '**control group**'.

Conclusions that could be drawn from survey and analysis findings are given in this section with respective to each objective of the survey.

**Objective 1:** To assess the health status of vatva, narol and surrounding areas inhabitants

Conclusions drawn:

- ☞ Out of 2105 families studied 1335 are from vatva-narol town and 770 are from nearby villages.
- ☞ Majority of the earning members from the Vatva-narol town and villagers are dependent on industrial work.
- ☞ About 54% males have admitted to be consuming tobacco in oral form. (pan, gutka, zarda etc).
- ☞ Around 27% men have admitted to consume alcohol in different quantity. About 40% are smokers in men.
- ☞ Around 4% of the women admitted to be smoking and chewing tobacco. About 2% of the women said to be consuming alcohol.

- ☞ About 10% of unmarried and children above 5 years admitted to be smoking, 5% consuming alcohol and consuming oral tobacco.
- ☞ Personal hygiene after ablutions is practiced in majority of the families. Around 41% of them are using water and other rubbing agents for hand wash.
- ☞ Consumption of nutritious and balanced diet is not practiced by majority. Consumption of dal, leafy vegetables, fruits, milk, eggs and non-vegetarian food is less frequent.
- ☞ The sample population in general is feeling healthy and expressed the same.
- ☞ Men reported to be suffering with chronic ailments like hypertension 5%, diabetes 3%, and Asthma 2%, heart attack 1% etc.
- ☞ Women reported to be suffering with chronic ailments like hypertension 3%, diabetes 1%, asthma 2% and heart attack 1% etc.
- ☞ Around 27% men, women, unmarried and children above 5 years were affected with fever and loose motions 'once' in last year, which is very common. There are very insignificant percentage of people who reported frequent attacks of fever and loose motions.
- ☞ About 23% of the children above 1 to 5 years had some kind of illness in last 3 months. About 42% of the infants fell ill in the last three months.
- ☞ Around 8-10% men, women, unmarried and children above 5 years reported to have got affected with typhoid and malaria fever for 'once' in last year.

- ☞ 83-88% of the men, women unmarried and children above 5 years do not have susceptibility to food, dust, skin allergies.
- ☞ About 11.5% men and 10% women complained to be suffering with 'joint pains' occasionally.
- ☞ Irritation, Redness, Watering of eyes is reported by about 14.4% men and 14.5% women.
- ☞ 96% of the men did not have any surgery ever reinforcing the fact that there were no major incidences of bad health.
- ☞ About 33% women had family operation and around 21% had operation for delivery.
- ☞ No major incidences of death were observed in all the families studied in the last 2 years. About 1.6% of families said that a family member died due to heart attack.

**Objective 2:** To compare the health status of inhabitants from town and villages

Conclusions drawn:

- ☞ Living standards of urban community seems to be better than their counter parts from villages as more percentage of them have separate kitchen, separate bedroom and separate toilet.
- ☞ Educational standards of both urban and rural inhabitants are more or less same with majority having only formal education.
- ☞ There is no significant difference between control group families and focus group families in hygiene practices followed after ablutions, but marginally urban community is better off in using soap for washing hands than their counterparts from near by villages.

- ☞ Though frequency of incidence of fever and loose motions is slightly varying, statistically valid difference is not observed between town and villages in all age segments.
- ☞ Incidence of typhoid and malaria fever among men, unmarried and children above 5 years is marginally low (3-6%) in town compared to near by villages. Among women, no difference is observed.
- ☞ Among men and women, prevalence of major diseases like diabetes, heart attack, TB, asthma etc. has no statistically valid variation between urban and rural areas.
- ☞ Percentage of men suffering with 'joint pains' is almost equal in both the groups. Marginal (1.6%) and insignificant difference is observed in case of females.
- ☞ Irritation, redness and watering of eyes are complained by marginally (2-4%) more percentage of men and women from villages than those from town.

**Objective 3:** To compare reproductive cycle and hormonal life of farming women with that of women from non farming families.

Conclusions drawn:

- ☞ Majority of the women in both groups reported age at first menstruation as 11 years and above, which is normal. There is no difference between the groups.
- ☞ In both the groups majority women got married between 18-30 years. A marriage among relatives is not a practice in both town and near by villages.
- ☞ There is no statistically noticeable difference between study and control group women regarding 'reproductive abilities' like number of

children, number of pregnancies and incidence of infertility. Caesarian deliveries are marginally (about 6%) more in women of town compared to village women.

- ☞ Abortions, still births, infant deaths are minimal. There is no valid difference in abortions, still births and infant mortality rates between study and control groups.
- ☞ The incidence of women having undergone hysterectomy is more or less same in both the groups.
- ☞ The average age of attaining menopause in both the groups remains same ie above 50 years.

**Objective 4:** To compare mental and physical abilities of control group children with that of focused group children.

Conclusions drawn:

- All most all the children are born without any mental and physical disabilities.
- There are no abnormalities observed in the physical and mental growth among children of age group of 1 to 5 years among both the groups.
- Academic performance in the last examination is satisfactory in majority of children of above 5 years of age and is equal in both the groups.
- The door to door house hold survey is carried out to record any perceivable change in the health status of the residents of Vatva and Narol area who live in highly industrialized area in India. The main focus is on the incidence of common infections

life fever, loose motions etc in a year. There is absolutely no increased incidence recorded in the focused families.

- Similarly to elicit any extra incidence (if any) of chronic diseases like TB, diabetes, hypertension, asthma, paralysis, heart attack etc, data is collected. Even this has no variation from national level incidences or statistics.
- In view of several agencies reporting pollution of industrialization and its alleged effect on the hormonal life of the industrial area family members, an extensive data is collected on the age at menarche, age at menopause, number of abortions, number of still births, early hysterectomies. Even these data is as  
per the other socio economic groups in the country who have no exposure to the industrialization.
- The academic performance of the children of the focused group families was also recorded and did not show any abnormal findings.
- Deaths due to cancer and other diseases during last 2 years are recorded and 6-7 deaths of cancer are recorded in both industrial and non industrial area.
- In view of the fact that having studied nearly 2105 families involving more than 7100 members in the low socio economic colonies of Vatva and Narol areas of Ahmedabad city and nearby villages of a conclusion can be drawn that there is no direct or indirect perceivable effect of industrialization on the health of residents or its family members

**ANNEXURE-11**

**List of units under CEPI action plan-Vatva**

Sr. No.	GPCB ID	Name of Unit/Stake Holder	Product	Status of Compliance & date	Expenditure for EMS	Remarks	Status
1.	14382	Tapasheel Enterprise 425, 430, 431, 432, 445, Phase - II	reactive dyes(/ red/orang/yellow/black)	Construction of primary clarifier and aeration tank is started and will complete by Nov,10 (19/10/10) Primary clarifier and modification in Aeration tank is completed and taken in operation. (15/2/11)	20 lacs	Completed primary and secondary ETP.	complied
2.	14578	Ushanti Colour Chem P. Ltd. (Unit-1) 88/7, Phase-I	reactive turquoise blue h5g.h7g	Filter press observed (5/10/10)  Started reusing of w/w, simple flow meter is installed (22/12/10) Started reusing of w/w, simple flow meter is installed on reuse line (15/02/11)  installation of new reactor vessels is going on (10/6/11)  seepages from this unit are going to this storm water drain. Also	85.53 lacs	Unit has completed upgradation of ETP.  NH3 is not conforming it remains @ 150. During meeting directed unit to submit ERI for verification of production.	complied

				the discharged flow of this unit is going on in sump, opposite to the unit, unit is manufacturing other than consented products as well as manufacturing more than consented, Housekeeping at ETP area as well as production plant is found very poor, and small ponding of w/w is observed within plant.			
3.	14577	Oshtani Colour Chem P. Ltd. (Unit-2) 88/8, Phase - I	spray drying of dyes	NO work in spray drying unit (5/10/10)  No work req'd in spray drying unit(15/02/2011)	0.3 lac	Presently under compliance	complied
4.	14113	Shyamal Intermediates Ltd A-2/349, Phase - II	DASDA SPCP SULPHOLINIC ACID	No progress is observed. (27/10/10)  Cleaning of ETP units going on. One additional filter press is installed. (25/11/10)  Cleaning of ETP is completed. New (second) Filter Press is taken in operation. (15/2/11)	1 lac	Improvement in Existing treatment	complied
5.	10878	CAFFIL PVT LTD. 29, Phase - I	para amino benzomine pyrazolones sulphanic acid	unit has ETP consisting of Collection tank, Neut tank, PST, Aeration tank, Filter press, Blower, carbon & send filter, SST and Treated w/w holding	10-15 lacs	Carbon nutch installed. Sending spent acid to NOVEL.	complied

6.	12578	Shubhlaxmi ji Intermediate (Milan Intermediates P. Ltd.) 443, Phase - II	Gamma Acid Sodium Bi Sulphite (byproduct)	tank. (30/9/11) Sep M.L. collection tank installed. Modification of ETP, Brick lining work, upgradation in scrubber is completed. Upgradation work in incinerator is in progress. Installation of MEE is going on. (27/10/10) Installation of APCM with dual chamber incinerator is going on (22/12/10)  Proposed up gradation is completed. MEE and Incinerator are under trial run. (15/2/11)	77 lacs	Installation of sep M.L. collection tank, Modification in ETP, Brick lining in acidic w/w handling area, upgradation of incinerator, Installation of MEE, Upgradation in scrubber.	complied
7.	12213	Lakoona Reactions 56/B-2, Phase - I	DASA	Segregation of w/w is yet not started (15/10/10) ETP Up gradation work completed (22/02/2011) Unit is having one evaporator for treatment of concentrated w/w, evaporator was found in operation.(18/11/11)	60 lacs	-Effluent Segregation -Thermic fluid evaporator (cap. 2000 L/Hr) for high concentrated effluent stream from process and for washing effluent	complied
8.	10036	Aarti Organic 273/1/3 & 5, Phase -II	fc acid, a d p s a, o a p s a, P T 2 S A, 4 n a d p s a, o t 5 s a, a24dsa, paabsa	Modification of existing MEE is in progress. (15/2/11) stared segregation of high TDS w/w and they have provided high TDS w/w storage tank having capacity 20000lit. They have started evaporation system,	12 lacs	-Effluent Segregation -Thermic fluid evaporator & Salt recovery system - Higher acid stream will be sent to NOVEL	complied

				for high TDS w/w, during visit evaporation system is found in operation.(27/7/11)			
9.	11826	Jainik Industries 605/A, Phase - IV	6 CHLORO METANILIC ACID . OAPSA ONAPSA oncbpsa pnaosa pncbosa  PPDOSA	Unit has started sending Spent acid to Novel Spent acid Management. Lime & FeSo4 treatment is started in Primary treatment but proper chemical dosing system is so far not installed. (28/10/10).  Install carbon treatment system and filter press (15/3/11)	10 lacs	- Higher acid stream will be sent to NOVEL -Primary treatment will be improved by raising pH upto 12 and by reduction with FeSO4	complied
10.	10398	Anmol Dyestuff P. Ltd. 140, Phase - I	Acetyl MPDSA, MPDSA,NASDA	Carbon filter & Sand filter observed. Not working during visit. (15/10/10) Carbon filter & Sand filter installed. Changed blower of aeration. (05/04/2011)	5 lacs	-Tertiary treatment (Dual Media filter) -start flocculating treatment in Primary units	complied
11.	10219	Atlas Pharmachem Inds. P. Ltd. 286, Phase - II	1-(AMINO METHYL)CYCLO HEXANE ACETIC ACID HYDOCHLOIDE,2 CHLOO METHYL 3 METHOXY 4 CHLOO PYIDINE HCL ,2,6- DICHLOO PYIDINE,2- MECAPTO,5-METHOXY BENZIMIDAZOLE,2- pyridone,5-BOMO PHTHALIDE,5-CYNO PHTHALIDE 5-DIFLAUO	Production of 2-Pyridone has been stopped. Proper dosing system for flocculating treatment is yet not provided. (27/10/10) Routine maintenance of ETP (23/11/10) Proposed up gradation work is completed. (15/2/11)	45 lac	Stop mfg of 2- Pyridone to reduce load of NH <sub>3</sub> N, COD -start flocculating treatment in Primary units	complied

			METHYL 2-MECAPTO BENZIMIDAZOLE ,CHLOTHEXIDINE BASE ,HYDAZONE,INDOLINE ,N-ACETYL(4 HYDOXY PHENYL) PIPEAZINE,SPENT SULPHUIC ACID(BY PODUCT).				
12.	11911	Aganice Enterprizes 288/1, Phase - II	DASA PNTOSA	work for jacketed evaporator for thermal destruction of concentrated stream is completed (5/10/10)(07/01/2012)	18 lacs	-Effluent Segregation -jacketed evaporator for thermal destruction for concentrated stream -Stream wise analysis for proper segregation of effluent	complied
13.	12599	J. B. Finechem 242/2, Phase - II	6 Nitro 1 Diazo 2 Naphthol 4 Solphonic acid, Brown14/75/85/98/165/348/349/354/434/452/Red183/357/Yello w49/99/194	New activated carbon added in Carbon filter. Filter press is so far not installed. (27/10/10) Filter Press has been installed but not commissioned. (15/2/11)	1 lac	Routine maintenance i.e. change of activated carbon at filter. Installation of Filter Press.	complied
14.	11181	Dispo Dyechem P. Ltd. A-1-210, Phase - II	6 Acetyl OAPSA/4-4 -DASA synthetic organic dyes	ETP upgradation completed (18/2/11)  Additional Filter press installed, ETP maintenance going on (6/12/10)  ETP upgradation completed but found inadequate (18/2/11)	29 lacs	Up gradation of ETP Filter press installed. Segraging two stream. - Sending spent acid (20-30%) to NOVEL.	complied
15.	10421	Appex Dyestuff	Acid Black	PSF & ACF are commissioned,	3.50 lacs	Routine maintenance i.e.	complied

		Industries C-1/258, Phase - II	REACTIVE RED, NAVY BLUE, DIRECT VIOLET, ACID BLACK, DIRECT BLUE	Unit has replaced the Activated carbon in tertiary plant. (15/10/10). <b>Installation of Filter Press is in progress.</b> (15/2/11) Unit has provided sand filter, Carbon filter. (6/1/12)		change of activated carbon at filter Filter press and activated carbon installed.	
16.	10632	Balaji Industries i-5052 & 5633, Phase - II	Reactive Dyes Spray drying of Liquid S.O Dyes	Proposed upgradation work for evaporating of filtrate/ process w/w into Spray Dryer is completed. (15/2/11)	2.5 lacs	-Filtration operation will be replaced by spray drying in most of the process - w/w from filtration (if any) and washing operation will be collected separately and will be evaporate in spray dryer	Complied
17.	12432	Mansi Chemicals 273/1/2, Phase - II	Acid Dyes	Unit has provided incinerator for concentrated w/w. (10/10/11)	30 lacs	-Effluent Segregation -jacketed evaporator for thermal destruction for concentrated stream/ Replacement of raw material -Stream wise analysis for proper segregation of effluent Installation of an incinerator of 20 m <sup>3</sup> /d capacity by 31/3/11 (2/12/10)	Complied
18.	11053	Crystal Quinone P. Ltd. (unit-1) 143, Phase - II	2:5,D.M.A	ACF commissioned, tray dryer is being replaced by fluid bed, construction work is going on (19/10/10)	16 lacs	ETP upgradation  Separate neutralization tank of 18 KL, additional SST of 25 KL, installation of carbon	Complied

				Fluidised bed dryer is commissioned (15/2/11)		filter, tray dryer is replaced by fluid bed, NG is started as fuel ( .	
19.	11054	Crystal Quinone P. Ltd. (unit-2) A/2-20, Phase - II	2.5 DMAVS PCVS	MEE Is commissioned.( 25/04/2012)	36 lacs	ETP upgradation/ installation of MEE/Salt recovery unit Unit has informed that installed triple effect evaporator	Complied
20.	12053	Monica Industries C-1/421-422, Phase -II	reactive dyes (orange-m2r, rd-m8b, m5b, my-r and yellow -r)	Secondary treatment units are observed on site and have reduced tray drying process and are carrying out spray drying on job work. (15/10/10) P+S ETP working and have reduced tray drying operation (8/2/11)	13 lacs	-Filtration operation will be replaced by spray drying in most of the process - boiler blowdown and washing w/w will be given P+ advanced treatment	Complied
21.	11917	Jemby Chem Ltd. C-1/335 to 337, Phase - II	J Acid Derivates Sulpho Tobias Acid	Distillation unit is provided for concentrated effluent stream (17/4/12)	20.00	Effluent recycling R&D regarding multistage evaporator and E.O. is going on (6/12/10)	Complied
22.	11755	Ishan Dyes & Chemical Ltd. 18, Phase - I	alpha beta cpc cuprous chloride	blue blue blue Second ammonia stripping column and additional filter press are commissioned (3/5/11)	85 lacs	Ammonia stripping tower	Complied

23.	11546	Gurudev Dyestuff (India) P. Ltd. 541, Phase - II	DASA	<p>Sulphonilic Recovery Plant is commissioned , purchase order is given for disc diffusion system (15/10/10), Unit has procured the 2# of HDPE tank for collection of segregated w/w stream ( High and low COD) and executed the order for MEE</p> <p>Installation of MEE and filter nutch oning on (18/2/11)</p> <p>Proposed MEE plant is installed and taken into operation. Proposed Sulphanilic acid recovery plant is installed and taken into operation. (4/4/11)</p>	95 lacs	<p>-Sulphonilic Recovery Plant will be installed</p> <p>-ETP upgradation by providing Disc Diffusion System</p> <p>Install MEE within 10-15 days (15/12/10)</p>	Complied
24.	13588	Shanghai Colour Chem C-1/88/5, Phase - I	Nevy Blue Rx, Brilliant Orange Rx, Golden yellow MR, Red M8B,	<p>Spray dryer is provided) (15/10/10)</p> <p>Unit has installed new MS collection tank (12000 liter) for spray drying of concentrate effluent in spray dryer. Unit has also provided new settling tank, collection tank, neutralization tank, Filter press, holding tank, O/H CETP discharged tank for low concentrate effluent.(3/11/11)</p>	10 lacs	-Filtration operation will be replaced by spray drying in most of the process	Complied
25.	12999	Parshwanath Colour Chem	Poncean 4R(Red-7) Red 2G ( Red-10 )Tartrazine	R.O. system at production plant is installed and taken into	12 lacs.	- skipping of filtration process by directly passing	Complied

		452-453, Phase - II		operation. Installation work of RO plant for treatment of w/w is almost completed but not commissioned. (27/10/10)		the product through the RO system and w/w generated will be treated by RO of ETP.	
				RO Plant for treatment of w/w is commissioned. (25/4/12)			
26.	14243	Sulphochem Industries (Agate Dye Chem) C-1/B-203/1, Phase-II	Resist Salt	Installed new ETP consisting of Collection tank, Neutralization tank, Filter Press Aeration tank, SST and Carbon filter are commissioned (6/1/12)	30 lacs	Secondary treatment units	Complied
27.	12925	Ornet Intermediates Ltd 63,64,65 /1/C,D,E Phase - II		Additional aeration tank is constructed, Hydrosulphite dosing is started, RO plant is commissioned (15/10/10) Additional aeration tank is commissioned (18/2/11)	10 lacs	Additional Aeration tank Use of Hydrosulphite to reduce colour - R.O. plant	Complied
28.	13147	Pratik Dyes & Intermediates C-1/73, Phase - II		P+S ETP and F.P commissioned (18/2/11)	8.92 lacs	Install filter press (7/12/10) installed secondary plant and evaporator completed and became member of MEE.	Complied
29.	10484	Ascent Finechem P. Ltd. 273, Phase - II		Construction of Aeration tank and secondary clarifier is completed, mechanical work is remaining will commission by Nov,2010. (19/10/10) Aeration tank is under commissioning stage and acclimatization of biomass is going on. Clarifier is so far not commissioned.	75 lacs	Additional Aeration tank and clarifier	Complied

Subject: Health Survey of the people of villages surrounding GIDC Estate Vatva.

We would like to get a comprehensive health survey / study done by you covering the people residing in the villages surrounding GIDC estate Vatva. The study will primarily focus on the determination of the impact on the health of the people due to possible pollution and other adverse effects, if any caused by various industrial units in this area.

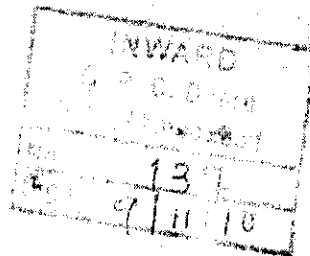

We therefore request you to send us your proposal to carry out this study and prepare a report. If you need additional information or clarification kindly let us know. If you wish we are prepared to have a joint meeting to have discussion on this issue.

Awaiting your early reply and thanking you.

For and on behalf of
