10)	т.	1-1 C1 - (1) (11)		
13)		tal Cost of the facility		2295 lakh (as per DPR)
	i	Financing patterns	:	Shareholding from industries with subsidy
				from Kerala State Govt. and MoEF
	Ii	Subsidy, if any (Central Govt.,	:	Central Govt. subsidy Rs. 2 crore + State
		State Govt.) in Rs.		Govt. subsidy Rs 2 crore
14)	A	uthorization details	:	Renewed - Consent no: PCI
				HO/EKM/ICO-R/15/2012 valid upto
				30.06.2015
	D	ate of authorization	:	14.11.2012
	A.	uthorization issued by	:	Kerala State Pollution Control Board
		alidity upto	:	30.06.2015
		fain conditions of authorization		There shall be no effluent discharge
	111	directions of addictization		from the unit. Leachate shall be
				pumped regularly and evaporated in the MEE.
			:	
				Condensate shall be utilized for
				irrigation and gardening and the slurry
				shall be diverted to secured landfill.
		hether the authorization issued as		Yes
		r the guidelines of CPCB	i	
15)		hether TSDF posses own		Yes. 2 Nos. (One tipper, one hook loader
		insportation vehicles & containers for	:	with three containers – capacity 7, 9 and 12
	ha	ndling of HW (if so, provide details)		MT)
16)	То	tal population in and around the	:	Entire state of Kerala 33.3 million as pe
	dis	sposal facility upto radius of 150 Kms	<u> </u>	2011 census
17)	То	tal no of industries upto radius of		America 122 I Inite
		0 Kms	:	Approx. 423 Units
18)	La	nd use around the disposal facility		The area around the disposal facility is
		to radius of 5 KM (Indicate any		occupied by industries like FACT - CD
	_	rest or monuments or sensitive areas)	$ \cdot $	BPCL- KRL and HOCL. The facility is
		or concern of sections.		situated in an industrial area. There is no
				forest or monuments.
19)	Riv	vers/canals if any in & around the		
1/)		DF with approximate distance from	:	Chitrapuzha River – 500 meter (Approx)
		DF	•	Ambalamedu Lake - 2 km (Approx.)
20)				As now EIA woment 2004 Jaks 2105 as as
20)	10	tal Rainfall (annual average in mm)	:	As per EIA report 2004 data, 3195 mm

21)	Geo hydrological features of the TSDF Site		:	As	The ground water level at the landfill site is around 6-7 m, and rated good. The GW gradient is in the range of 5-10 km, and rated Ideal. The depth of the bedrock at the landfill site is 5-10 m and rated good. The seismic intensity of 5 & 6 and rated ideal for seismic intensity criteria.	
22)	Sources of	water intake	:	Tr	reated water from FACT- CD	
23	Electrical	Resistively Data around SLF	:	N	ot available as on now	
24	Emergenc	y preparedness details	:	N	ot available.	
25)	Level of G	Froundwater in and around all facility (Below ground	:		ne ground water level at the landfill site is ound 6-7 m, as per EIA report.	
26)	Ground w	ater Quality reports	:	(A	as submitted by the Facility)	
	i Befo	re setting the facilities	:	Fr	om EIA report (Annexure 1)	
	ii Mid	period	:	Pl	. See Annexure 2	
	iii Late	st period		Tł	ne monitoring team collected ground	
			:	W	ater samples, the results are discussed	
				be	elow in other observations	
27)	Wind patt	ern details (average)	:	Pr	resent data not available.	
28)	Reduced 1	evel of TSDF w.r.t MSL	:	10 to 18 mtr. above MSL		
29)	Maximum reservoir i	Flood level of river, lakes, f any	:	2 1	mtrs. above MSL	
30)	Details of	consent to operate issued	:	Co	onsent no: PCB HO/EKM/ICO-	
	under Wa	ter & Air Acts	•	R	/15/2012 valid up to 30.06.2015	
II.	Site Identi	fication Procedures Followed	and	l A	pproval of Designs of the TSDF	
a)	Whether t	he selection of TSDF is as per t	he		Yes	
	criteria giv	ven by CPCB		•		
b)	EIA condu	ıcted through reputed			Yes	
	organizati			•		
c)	_	oublic hearing conducted by			Yes	
	SPCB/PC			•		
d)		he recommendations of			Yes	
		C regarding EIA study to the		:		
		. is favorable.				
e)		he state Govt. notified the TSD	F		Yes	
	site		Ŀ			
f)	Whether the design of TSDF is as per criteria of CPCB		:	Yes		
g)	Whether the design of TSDF is approved by SPCB/PCC		:	Yes		
	Single/Do	ouble liner		:	Double liner	
		of liner system		:	1.95 mtr.	
		of cover system		:	1.80 mtr.	

	Drainage collection system details : Ye			Yes			
	Leachate collection system details			_	ge liner 1.5 mt thicknesses of		
			cobblestones (200 mm to 300mm) and 30 to 450 mm HDPE pipes to collect leachate provided with submersible pump to pump

	TSDF	•					
III.	Waste Acceptance Procedures Followed By	TS	DF				
1	Information collected by the TSDF on the following	llo	wing :				
a)	Name & Address of the Industry			:	Yes		
b)	Products manufactured			:	Yes		
c)	Stepwise process chemical reactions			:	Yes		
d)	Quantity of waste generated			:	Yes		
e)	Characteristics of the waste (physical)			:	Yes		
f)	Chemical characteristics of the waste (finger	pr	int as	:	Yes		
	well as detailed analysis)			•			
g)	Category of the wastes (as per schedule 1or	2)		:	Yes		
h)	Any pre-treatment given, if so, type of treatr	ne	nt	:	Yes		
	given by the generator			•			
i)	Any other relevant information collected by	th	e	:	-		
	operator			•			
2	Procedures followed by the operator of the	fa	cility :				
3	Whether the TSDF accepting the waste from			:	Yes		
	generator having the manifest or not			•			
(a)	Report Selected waste received / observed a	t t	he		Yes		
	time of inspection / based on the verification	n o	f the	:			
	records maintained by the TSDF operator						
4	Whether the TSDF sending the copies of the				Yes		
	manifest to the respective agencies (like SPC	ΈB ,	/	:			
	PCC& the generator of the HW)		_				
5	Whether the waste accepted on cross verifyi	_			Yes, Not at all the time by		
	characteristics of the waste (finger print)fur	nis	hed	:	repeating analysis.		
	by the generator or not				2/		
6	Laboratory facilities provided for finger prin	nt		:	Yes		
	analysis	1			N.		
7	Check for the unloading facilities and the ad	-	uacy		Yes		
	of the environmentally sound storage facilities			:			
0	before treatment of wastes Regard keeping for maintaneness with regard				Vac		
8	Record keeping & maintenance with regard	ω	uie	:	Yes		
0	waste acceptance procedures	1	100555		Vac		
9	Whether the transportation vehicles allowed	ı tc	ieave	:	Yes		

	the facilities only after cleaning							
10	Whether WW generated from cleaning of ve	hic	cles is		Yes			
	treated before disposal			:				
11	Check for any other relevant information in	res	spect		_			
	of waste acceptance procedures	-0.	Proce	:				
IV. P	Pre-Treatment Facilities Provided by the TSDF							
1								
	as per the records							
(a)	Whether the wastes are segregated		TE1 : (• • •				
, ,	(recyclable, incinerable, disposal) before	:		acıl	lity accepts only land fillable			
	the pre - treatment		waste.					
(b)	Record keeping of the segregated wastes	:	NA					
(c)	Check for adequacy and storage of		NA					
	segregated wastes	:						
2	Check for treatment proposed & the exact		Yes					
	treatment given to the HW	:						
3	Check for wastes lying for its		Yes					
	appropriateness / adequacy.	:						
4	Check record keeping / maintenance with		Yes, o	con	sumption of chemical waste			
	the respect to the consumption of	:			provided.			
	chemicals (waste - wise & date - wise)			•				
5	Whether the TSDF having the facilities as		Yes					
	maintained in the records for treating the							
	various wastes accepted by the TSDF	:						
	operator							
6	Has spillage collection provision is	:	Yes					
	satisfactory	•						
7	Whether the treated wastes meeting with		Yes					
	the criteria for disposal of hazardous							
	waste prepared by the CPCB before	•						
	disposal into disposal facility							
8	Record keeping with respect to treated		Yes					
	wastes (like hazardous waste , liquid	:						
	waste , sludge's with sample no. analysis							
	of wastes before & after treatment							
9	Whether transportation of treated waste is		Yes					
	done in an environmentally sound manner	:						
	up to disposal site							
10	Whether the TSDF provided adequate treati	ne	nt facilit	ties	for			
(a)	Treatment of hazardous wastes;	:	Yes					
(b)	Leachate generated from disposal facility	:	Yes					
(c)	Whether the TSDF possess facilities for		Yes					
	treatment of wastewater generated from							
	sources like cleaning of vehicles, utilities,	:						
	waste water from pre-treatment area, air							
	pollution control systems , Leachate							

	generat	ed from the disposal facility etc.		
11		of the next cells closed and capped		Filled-up portions of the 1st and 2nd Cell
		11		capped. 3 rd cell is operational.
12	Fire Saf	ety provisions		Yes
13		tory facilities		Yes
	i	Waste water analysis		Yes
	ii	Water analysis		Yes
	iii	Ambient Air Quality monitoring		Yes
	iv	Stack emission monitoring		Yes
14		ace provisions		Yes, Public Liability Insurance, Special
		1	:	Contingency Insurance, Fire & General
				Insurance
15	Escrow	Fund details		Yes, FD in lieu of Escrow Fund regularly
			:	maintained.
V. D	Disposal S	Site & Assessment of operation of t	he	
1		cells in TSDF as per the designs		10 lakh MT (50, 000 TPA)
		ed by the SPCB	:	,
2		cells completely filled with the HW		Filled-up portions of the 1st and 2nd Cell
		vith total quantity of HW disposed	:	capped. 3 rd cell is operational.
	(cell wis	1 7 1		1
3	`	er the wastes are pre-treated before		No.
		ortation of HW to the TSDF	:	
4	_	f transportation of treated		By dedicated vehicle
	hazardo	ous waste up to the disposal facility	:	
5	Whethe	er the records maintained with		Yes, records available with facility
	respect	to HW which is disposed in facility	:	-
6	Check f	or any spillages around the	:	No spillage noticed during visit
	disposa	l facilities	•	
7	Whethe	er the liners used are as per the	:	Yes, as per record furnished by the
	specific	ation of CPCB criteria and as		facility
	approv	ed by the SPCB/PCC		
8	Whethe	er the operation of the facility is	:	Yes
	scientifi	ic		
9	_	acy of the provision made for the	:	Man and machineries are in place for
		on of spillages around the TSDF &		landfilling and in case of spillage if any
	its disp			during operation.
10	Check f	or adequacy of the	:	
	• Lea	chate collection system	:	As on date adequate
	• Pro	vision for collection of Leachate	:	Leachate collection system has grid of
	/dr	ainage provision		leachate perforated pipes of a lower
				diameter, the collected leachate are
				being drains into the common header
				pipes with a larger diameter and
				pumped for treatment.
	• Pro	vision made for removal of	:	The facility has leachate collection
	Lea	chate from Leachate collection pits		system; the leachate generated from the

			landfill area is pumped to the leachate
			collection tanks (syntax) placed above
	- Duranisian for transportation of	-	ground.
	Provision for transportation of Leachate to the treatment facility	:	The leachate stored in a syntax tanks above ground are being pumped using centrifugal pump for further treatment in MEE, the salt residue is landfilled. Also part of the leachate is used for spraying on the landfill. The distillate is used as Boiler feed and the balance is used for irrigation.
12	Whether any provision made for covering	:	Only temporary tarpaulin covers are
	the facility so as to avoid entry of		provided to avoid entry of rainwater
	rainwater during monsoon		during monsoon.
13	Whether the groundwater monitoring	:	There is 4 bore well of different depth
	provision made around the disposal		i.e. 9 m, 12 m, 30 m and 80 m are existing
	facility is scientific		to monitor the groundwater.
14	The GW monitoring provision has been	:	Yes
	made as per the CPCB criteria		
15	Level of Leachate in the collection pit	:	Low (in the tank)
16	Whether records maintained with the	:	Yes
	respect to the location of the HW and its		
	characteristics that has been disposed in		
	the facility		
17	Whether any provision made for samples	:	No.
	of HW that has been disposed in the		
VI.	facility The recyclable waste storage area / Incine	rat	ion facility
1	Check for adequacy of the waste storage		Not applicable
1	area of the wastes intended for recycling	•	Not applicable
	or incineration		
2	Record keeping and its maintenance	:	NA
	with respect to the quantum of the HW		
	proposed / treated by incineration		
3	Check records for characteristics of the	:	NA
	HW before incineration process		
4	Details of incineration facility	:	NA
	Supplier of the incinerator	:	NA
	Capacity of the incinerator	:	NA
	Operation condition of the	:	NA
	incineration based on the designs		
	 Performance assured by the supplier 	:	NA
	Temperature probes provided	:	NA
	Provision for measurement of O2	:	NA
5	Whether the operation of the	:	NA

	incineration facility as observed at the		
	time of visit is as per the guidelines of		
	CBCB and or prescribed by the		
	SPCB/PCC		
	• Operation temperature of the	:	NA
	primary chamber	•	
	Operation temperature of the	:	NA
	secondary chamber		
	Residence time	:	NA
	Type of fuel used and its quantity	:	NA
	Characteristics of the HW that feed	:	NA
	into the incinerator		
	Provision made for waste feeding	:	NA
	Provision made for desired negative	:	NA
	pressure in the incineration		
	chambers		
	Air pollution control systems	:	NA
	attached with the incinerator is as		
	per the guidelines or not		
	Whether stack monitoring provision	:	NA
	has been made like porthole and		
	monitoring platform		
	Whether stack emissions are	:	NA
	complying with the consent issued		
	by the SPCB/PCC		774
	Whether the construction,	:	NA
	maintenance and operation of the		
	incineration is as per the guidelines for HW incinerators		
	Quantum of ashes or residues		NA
	generated from the incineration unit	•	1471
6	Characteristics of the wastes generated		NA
	from the incineration process (ashes	•	
	/residues)		
7	Whether the incineration ashes /sledges	:	NA
	from the APCD are pretreated and then		
	disposal facility		
VII.	Compliance of Provisions of the Rules		
1	Characteristics of the wastes (untreated,	:	Sample was not available during
	treated and before disposal to facility)		inspection for analysis (untreated &
			treated).
2	Characteristics of the Leachate before	:	The inspection team collected a raw
	and after treatment		leachate and MEE condensate for
			analysis; the results are discussed below
2	Characteristics of the sussitivities of	<u> </u>	in other observations.
3	Characteristics of the wastewater from	:	Not applicable.

	different sources within the facility		
	before and after treatment		
4	Stack emission monitoring results		Not applicable
	(incinerator)		
5	Ambient air quality monitoring results	:	The team does not carry out Ambient Air
	(to be carried out as per the consent or		Quality analysis.
	Guidelines)		
6	GW quality in and around the disposal	:	The team collected ground water from 4
	facility		bore well of different depth i.e. 9 m, 12 m,
			30 m and 80 m, which are existing to
			monitor the groundwater. The analysis
			results of the same are discussed in
			observation.

VIII. ANY OTHER OBSERVATIONS:

- 1. The M/s Kerala Enviro Infrastructure Ltd, Common TSDF project has been in operation since from August 2008. Presently having 229 member industries. The Consent issued under Water, Air & HW rules by Kerala Sate Pollution Control Board is having validity up to 30.06.2015.
- 2. The Secured land fill Cells 1 & 2 are filled up (Covering 7500 M² area) and Cell 3 is in operation.
- 3. During the inspection it is observed that the wastes which can be utilized for resource recovery also being landfilled, the Kerala Board shall take appropriate measures to coprocess incinerable wastes and to discourage landfilling of incinerable wastes.
- 4. During inspection, it is observed that the unit has provided plastic tanks (Sintex) for collection of leachate and again re-pumped to MEE for treatment. In order to avoid pumping cost and operation difficulties, the unit may be directed to construct permanent RCC leachate holding tank near MEE and easy operation and to save energy cost.
- 5. The unit may be directed to start Monitoring of gaseous emissions from vents of capped cells for total VOC and H_2S .
- 6. All the internal roads used for transportation of wastes are not paved, due to that fugitive emission are more. The unit shall be directed to pave the roads with proper storm water drains.
- 7. On the day of inspection the MEE was not in operation, the inspection team collected samples from leachate tank and the MEE condensate. The analysis results are given below:

S. No.	Parameters	Raw Leachate	MEE Condensate
1	pН	7.8	7.5
2	EC (μS/cm)	29990	1544
3	TDS (mg/l)	28890	1010
4	COD (mg/l)	4680	76
5	Chloride (mg/l)	9360	412
6	Copper (mg/l)	BDL	BDL
7	Cadmium (mg/l)	BDL	BDL
8	Chromium (mg/l)	BDL	BDL

9	Iron (mg/l)	3.71	BDL
10	Manganese (mg/l)	1.68	0.65
11	Nickel (mg/l)	BDL	BDL
12	Lead (mg/l)	BDL	BDL
13	Zinc (mg/l)	BDL	BDL
14	Cobalt (mg/l)	BDL	BDL

8. The analysis results of ground water samples (bore well) collected are given below:

S. No.	Parameters	Bore well (9M)	Bore well (12M)	Bore well (30M)	Bore well (80M)
1	рН	7.5	5.5	6.4	5.7
2	EC (μS/cm)	131	134	110	88
3	TDS (mg/l)	84	91	68	57
4	Chloride (mg/l)	36	41	19	16
5	Sulphate (mg/l)	21	24	10	2
6	Copper (mg/l)	BDL	BDL	BDL	BDL
7	Cadmium (mg/l)	BDL	BDL	BDL	BDL
8	Chromium (mg/l)	BDL	BDL	BDL	BDL
9	Iron (mg/l)	0.753	0.322	0.357	BDL
10	Manganese (mg/l)	0.453	1.02	0.545	BDL
11	Nickel (mg/l)	BDL	BDL	BDL	BDL
12	Lead (mg/l)	BDL	BDL	BDL	BDL
13	Zinc (mg/l)	BDL	BDL	BDL	BDL
14	Cobalt (mg/l)	BDL	BDL	BDL	BDL

9. Relevant photographs are given at **Annexure 3**

IX. Recommendations

The TSDF shall be directed to implement the following:

- To stop landfilling of waste which can be utilized for resource recovery.
- To direct the Kerala State Pollution Control Board to take appropriate measures to coprocess incinerable wastes and to discourage landfilling.
- To construct permanent RCC leachate holding tank near MEE in place of Sintex tank for easy operation and to save energy cost in pumping.
- To start Monitoring of gaseous emissions from vents of capped cells for total VOC and H₂S
- To pave all internal roads with proper storm water drains to control fugitive emissions.

No. Tech 30/ TSDF/ZOB/2013-14/

March 19, 2014

To

The Member Secretary Central Pollution Control Board, Parivesh Bhawan, East Arjun Nagar, Delhi – 110 032

Subject: Inspection of TSDF facility, Kochi

Sir,

With reference to above mentioned subject, Common TSDF of Kochi operated by Kerala Enviro Infrastructure Ltd. was inspected by SZO, CPCB, Bangalore on December 11, 2013 along with other activities. The inspection report of the same is enclosed for kind perusal, pl.

Yours faithfully,

Encl.: As above

(S.Suresh) Zonal Officer
