To,

**Kisan Sahkari Chini Mill  
Gajraula, Hasanpur, Amroha,  
J.P. Nagar-244241, U.P.**

**DIRECTION UNDER SECTION 5 OF THE ENVIRONMENT (PROTECTION) ACT, 1986-  
CLOSURE NOTICE THEREOF**

**WHEREAS**, the Central Government has notified the standards for discharge of environmental pollutants from various categories of industries under the Environment (Protection) Act, 1986 and the rules framed there under; and

**WHEREAS**, the Ministry of Environment & Forests, Govt. of India, vide notification S.O.157(E) of 27.02.1996 has delegated powers vested under Section 5 of the Environment (Protection) Act, 1986 (29 of 1986) to the Chairman, Central Pollution Control Board (CPCB), to issue direction to any industry, Municipal Corporation, Municipal Council, Cantonment Board to any local or other Authority for the violation of emission and effluent standards notified under the Environment (Protection) Rules, 1986; and

**WHEREAS**, it is obligatory on the part of industries to install effluent treatment plants (ETPs) to comply with the effluent discharge standards as notified under the Environment (Protection) Act, 1986 and the Rules framed thereunder and also to meet the consent conditions granted by State Pollution Control Board (SPCBs) / Pollution Control Committees (PCCs); and

**WHEREAS**, Kisan Sahkari Chini Mill, Gajraula, Hasanpur, Amroha, J.P. Nagar, U.P. (hereinafter referred as 'the Unit') is involved in the process of sugar manufacturing from crushing of cane; and

**WHEREAS**, the Unit was inspected on 09.12.2016 by the officials of Central Pollution Control Board; and

**AND WHEREAS**, CPCB issued direction dated 23.06.2017 under section 5 of Environment Protection Act, 1986 to the Unit to remain closed till compliance with the following directions:

1. i. The Unit shall submit the following reports to CPCB duly validated by reputed institutions like National Sugar Institute, Kanpur/Vasandada Sugar Institute, Pune /IITs within 60 days;
  - a) ETP adequacy assessment reports;
  - b) time bound action plan for ETP augmentation & upgradation upto tertiary treatment level; to comply with the standards notified G.S.R. 35 (E), MoEF&CC, January 14, 2016 for effluent disposal, & waste water conservation.

**(Contd..2/-)**

- c) water audit and mass balance report to establish waste water generation rate;
  - d) action Plans to achieve the notified effluent discharge quality and generation standards.
  - e) irrigation management plan as per the new notified standards on January 14, 2016; and
- ii. The Unit shall restrict the storage capacity of lined lagoon upto 15 days of effluent generation.
  - iii. The Unit shall meet the BOD-30mg/l standards for discharging any effluent on land /surface water body whereas effluent stored in lined lagoons/tanks of capacity not more than 15 days shall comply with BOD-100 mg/l standards.
2. The Unit shall stabilize the ETP by September 2017 before commencing of the new crushing season. The unit will not be allowed to resume manufacturing operations till stabilization of ETP system.
  3. The Unit shall upgrade of process technology, ETP system & adapt the best practice in a time bound manner and submit a report to CPCB before starting the next crushing season.
  4. The Unit shall seek permission from CPCB, after compliance with the above mentioned directions before resumption of manufacturing operations.

**AND WHEREAS**, the CPCB received adequacy assessment report vide letter dt. 24.09.2017 on 25.09.2017 from the unit prepared by VSI, Pune.

**AND WHEREAS**, the Unit has submitted the implementation of action plan vide letter dt. 24.11.2017 on 27.11.2017 at CPCB; and

**WHEREAS**, CPCB issued direction dated 10.11.2017 under section 5 of Environment Protection Act, 1986 to the Unit to comply with the following directions;

1. The Unit shall start its operation only after obtaining valid consent from the concerned State Pollution Control Board.
2. The Unit shall submit action plan within 15 days to implement the recommendations (including the general observation) of the adequacy report within 45 days.
3. The Unit shall install & Commission ETP system upto tertiary treatment level including adequate treatment system for spray pond overflow effluent in case of double sulphitation process (Brine recovery system to be installed in case of sugar refinery having Ion Exchange Process for sugar melt de-colorization).
4. The Unit having high pressure boiler (>45 Kg/cm<sup>2</sup>) shall install & Commission Condensate Polishing Unit (CPU) within 45 days for treatment of condensate water to ensure its reuse & recycle within the process.
5. The Unit shall restrict the effluent storage capacity to 15 days.
6. The Unit shall utilise treated effluent meeting the prescribed norms for irrigation as per the irrigation management plan validated by expert institutions namely, NSI, Kanpur/ VSI, Pune/ Agricultural Institutions.

**(Contd..3/-)**

7. The Unit shall implement the observation and recommendation of the adequacy report within 45 days.
8. The Unit shall get the verification of implement status of the recommendation of adequacy report including ETP performance assessment & effluent generation assessment done by the same institute which carried out adequacy assessment and submit the report to CPCB within 45 days from date of resumption of manufacturing operations.
9. The analysis result of the treated effluent shall also be submitted within 45 days through EPA recognised laboratories.
10. If the Unit fails to provide the verification report duly validated by the expert institutions, the Unit shall automatically stop all its manufacturing operations after 45 days from date of resumption of manufacturing operations.

**AND WHEREAS**, the Unit (Kisan Sahkari Chini Mill, Gajraula, Hasanpur, Amroha, J.P. Nagar, U.P.) was inspected on 17.01.2018 by officials from CPCB, Delhi and following observations were made;

1. The Unit was found operational at the time of inspection and ETP was functional.
2. The average cane crush capacity is 2527 TCD which is marginally higher than the licences capacity 2500 TCD.
3. The Unit has installed the two bore well as the fresh water consumption is 2064 KLD in which maximum water consumption i.e. is 1857.6 KLD in the residential colony.
4. The Unit has installed the flow meter at the inlet as well as at outlet of ETP.
5. The analysis report shows pH-4.56, against 5.5-9.0, **BOD-1184 mg/l** against 30 mg/l, **COD- 1937 mg/l** against 250 mg/l and **TSS-162 mg/l**, against 30 mg/l at the outlet of ETP which indicates non-compliance with the prescribed effluent discharge norms under Environment (Protection) Act,1986.
6. The Unit has three cooling tower recycling the excess condensate water.
7. The Unit has installed the OCEMS and provided the connectivity of OCEMS.
8. Operation and maintenance of aeration tank of ETP system was poor as the MLSS of the aeration tank was 334 mg/l.
9. The Unit has not submitted the irrigation management plan.
10. The Unit was found to be bypassing the tertiary treatment system and discharging the effluent from secondary clarifier.

It is evident that untreated/ partially treated effluent is being discharged on land by the Unit, posing potential threat to surface water/ground water quality.

**AND NOW, THEREFORE**, in view of above observations and in exercise of the powers delegated to the Chairman, CPCB under section 5 of the Environment (Protection) Act, 1986, the unit (Kisan Sahkari Chini Mill, Gajraula, Hasanpur, Amroha, J.P. Nagar, U.P.) is directed to **close down its manufacturing operations immediately** till compliance of the following directions;

1. The Unit is directed to close down its Sugar manufacturing operations with immediate effect and shall not resume its operations.

**(Contd..4/-)**

2. The Unit shall also comply with new standards notified G.S.R. 35 (E), MoEF&CC, January 12, 2016 for effluent disposal, waste water conservation and pollution control management.
3. The Unit shall install & Commission ETP system upto tertiary treatment level including adequate treatment system for spray pond overflow effluent in case of double sulphitation process.
4. The Unit having high-pressure boiler (>45 Kg/cm<sup>2</sup>) shall install & Commission Condensate Polishing Unit (CPU) for treatment of condensate water to ensure its reuse & recycle within the process.
5. The Unit shall restrict the effluent storage capacity to 15 days.
6. The Unit shall submit irrigation management plan and utilise treated effluent meeting the prescribed norms for irrigation as per the irrigation management plan validated by expert institutions namely, NSI, Kanpur/ VSI, Pune/ Agricultural Institutions.
7. The Unit shall inform to CPCB about the Closure of operation immediately.
8. The Unit shall seek permission from CPCB before resumption of manufacturing operations.

In case of default in compliance with the above directions, CPCB will be constrained to initiate action against the Unit (Kisan Sahkari Chini Mill, Gajraula, Hasanpur, Amroha, J.P. Nagar, U.P.) without giving any further notice in accordance with the provisions of the Environment (Protection) Act, 1986.

(S. P. SINGH PARIHAR)  
CHAIRMAN
