

SPEED POST

File No. B-190200/WQM-II/CPCB/STP/2016-17 ¹⁸⁵⁵⁻¹⁸⁷⁹ Date: 19/04/2017

To,

The Authorities
(As per the list enclosed)

DIRECTIONS UNDER SECTION 5 OF THE ENVIRONMENT (PROTECTION) ACT, 1986 REGARDING SEWAGE TREATMENT PLANTS

Whereas, the Ministry of Environment & Forests, Govt. of India, vide notification S.O.157(E) of 27.02.1996 has delegated powers vested under Section 5 of the Environment (Protection) Act, 1986 (29 of 1986) to the Chairman, Central Pollution Control Board (CPCB), to issue direction to any Industry, Municipal Corporation, Municipal Council, Cantonment Board to any local or other Authority for the violation of emission and effluent standards notified under the Environment (Protection) Rules, 1986 and other standards and norms; and

Whereas, the Central Government has notified the general discharge standards of environmental pollutants from various sources including municipal wastewater under the Environment (Protection) Act, 1986 and the rules framed there under; and

Whereas, the cities and the towns have not created adequate systems for sewage collection and its treatment and thus untreated waste water either goes into rivers or lakes or remains inundated on land causing ground water contamination; and

Whereas, National Mission for Clean Ganga (NMCG) has identified 118 class-I, II, III, IV & V cities/towns called Ganga front towns near the banks of Ganga and sewage generated from these cities/towns located in your state falls directly in river Ganga & its tributaries through drains and is also responsible for deterioration of the water quality of river Ganga; and

Whereas, CPCB vide D.O letter dated 08/07/2014 has requested to Chief Secretaries of four States Governments of Ganga basin namely Utrakhand, Uttar Pradesh, Bihar & West Bengal to direct urban development authorities and urban local bodies to formulate a comprehensive plan for 100% sewage treatment and so that no untreated sewage enters any water body and for setting up of Real Time/Continuous Water Quality monitoring Stations at the outfall of each Drain/STP; and

Whereas, CPCB issued directions dated: 21/04/2015 under Section 18 (1) (b) of Water (Prevention and Control of Pollution) Act, 1974 to the State Pollution Control Boards (SPCBs)

/Pollution Control Committees (PCCs) to direct concerned authorities and municipalities in the State/Union Territory to develop infrastructure for sewage management; and

Whereas, CPCB vide letter dated 21/09/2015 has also communicated guidelines to Municipal Corporations of Allahabad, Howrah, Kanpur, Kolkata, Patna & Varanasi for Rejuvenation/Improving sanitary conditions of open drains carrying sewage – sullage; and

Whereas, CPCB issued directions dated 10/09/2015 under Section 5 of Environment (Protection) Act, 1986 to the Commissioner/Mayor/Chief Executive Officer of the Nagar Nigam/ Municipal Corporation/Local Bodies/Panchayat of the identified 118 Ganga front towns regarding treatment of entire sewage generated from these towns, utilization of treated sewage and installation of online monitoring devices at inlet and outlet of STPs; and

Whereas, Hon'ble Supreme Court in the writ petition (c) no. 375 of 2012 pronounced judgement dated: 22/02/2017 as under:

"Just in manner suggested hereinabove, for the purpose of setting up of 'common effluent treatment plants' the concerned State Governments (including, the concerned Union Territories) will prioritize such cities, towns and villages, which discharge industrial pollutants and sewer, directly into rivers and water bodies."

"We are of the view, that in the manner suggested above, the malady of sewer treatment, should also be dealt with simultaneously. We therefore hereby direct, that 'sewage treatment plants' shall also be set up and made functional, within the timelines and the format, expressed hereinabove."

And Whereas, water quality of river Ganga has been monitored manually at 57 and by real time stations at 8 locations and it has been observed that water quality has been deteriorating on account of disposal of untreated sewage through various drains or partially treated sewage and trade effluent in to the river and making the river unfit for human bathing/consumption; and

Whereas, based on the performance studies carried out by CPCB on STPs, it has been observed that capacity of the STPs is either under utilized and the operating plants are also not meeting with the standards. The poor operation and maintenance of the STPs has also been observed; and

Whereas, concerned authority (UJS, PJN, UPJN, BRJP, KMDA, KMWSA, PHED (WB) and local urban bodies of Jharkhand) is responsible for operation and maintenance of STPs in Uttarakhand, Uttar Pradesh, Bihar, Jharkhand & West Bengal.

And Now, Therefore, based on all material facts available with CPCB, realizing that the water quality of river Ganga is getting effected and to prevent further deterioration, and in exercise of powers delegated under Section 5 of the Environment (Protection) Act, 1986 you are directed to provide the following information and to comply with directions as stated hereunder:

1. The estimated volume of sewage generated, treated & bypassed into river Ganga & its tributaries without treatment from Ganga front Towns located under your jurisdiction (list enclosed) and also provide the information for each Ganga front town on following points:

- a. Present sewage collection, treatment and disposal arrangements in the city/town area, pointing out deficiencies, if any in system of collection and treatment.
 - b. Coverage of toilets
 - c. Coverage of sewage network services (% area with details) & collection efficiency of sewage network
 - d. Adequacy of sewage treatment capacity (on the basis of total sewage generated). Volumen of sewage being treated or bypasses by STP.
 - e. Quality of final treated sewage (including load reduction)
 - f. Extent of reuse or recycling of sewage
 - g. Sludge treatment & septage management
2. The status of no. of STPs installed in Ganga front towns located under your jurisdiction their installed capacity along with name, location, treatment technology, degree of treatment (pre-treatment, primary treatment, secondary biological treatment, tertiary treatment and post treatment i.e. chlorination/membrane filtration), treatment facility available for control of fecal coliform in the treated sewage, date of commissioning and name of project under which STPs were funded.
 3. Area served by STPs, quantity & quality of sewage collected, details of components of the system such as collection network, size and type of pumping stations, extent of sludge production and its disposal and effluent reuse or disposal methods. Also provide the percentage of unserved area.
 4. The details of performance of STPs under your jurisdiction, whether or not sewage is being received in STPs through integrated sewage network or the sewage is being lifted from drains directly.
 5. The operational status and operating capacity of individual STPs against the installed capacity. If any STP is non-operational, the reason for non-operational and date since it was non-operational. If STPs are working under utilized capacity, the major reason for under utilization of designed capacity.
 6. Provide the plan for re-vamping of non-operational STPs/ construction of new STP in place of non-operational STPs.
 7. The time bound action plan/DPR for capacity augmentation and upgradation of STP to ensure compliance of all parameters along with details of land available for construction of new STP/additional treatment units as per the proposed action plan/DPR.
 8. Average daily operational hours of the sewage pumping stations and STPs, average daily power cut hours, details of alternative power backup arrangement (for individual STP).
 9. The status of installation of online monitoring devices on STPs to monitor consented parameters.
 10. With regard to open Nallas/ drains, which are directly flowing in the river, steps shall be taken for temporary tapping the wastewater by putting wirenets/screens at the tail end of Nallas to stop the clothes, polythenes and other solid garbage from falling directly into the river. These wirenets should be cleaned regularly.

11. The authority shall prepare a plan for interception, diversion of all the open Nallas falling directly in Ganges & its tributaries to trap the Nallas / drains and treat their water by treatment plants.
12. The drainage map of the catchment area of these drains shall also be prepared. Details of colonies/human settlement/Industrial clustures connected through these drains shall also be provided.
13. The authority shall take all necessary measures so that STPs which have been commissioned and all pumping stations work to their maximum capacity regularly and in no case their function should be stopped.
14. The authority shall ensure that all STPs shall maintain a complete record / log book of their operations.
15. The continuous power supply at STPs and pumping stations shall be ensured (at least dual feeder system)
16. Plan for reuse of treated sewage for non-potable applications shall be implemented wherever possible
17. With regard to STPs, the authority shall submit the details of each and every project, the projects which are under way as well as the projects which are under consideration and also indicate the specific time frame when these plans will be completed to commission.
18. The authority shall undertake a time bound action plan for collection and treatment of entire sewage generated in the identified Ganga front towns located in your jurisdiction along with reuse/disposal of treated sewage so that wastewater is not permitted to flow into the river Ganga. The plan shall be based on actual field survey.

The authority shall acknowledge the receipt of these directions within a week and submit the action taken report within 30 days from the date of issue of these directions. In case of default in compliance with the above directions by the authority, CPCB will be constrained to initiate appropriate action against the authority, in accordance with the provisions of the Environmental (Protection) Act, 1986.

(S. P. Singh Parihar)
CHAIRMAN
