

## List of Publications

### Union Territory of Daman, Dadar & Nagar Haveli (Abridged) Foreword

The Central Board for the Prevention and Control of Water Pollution (CBPCWP) was constituted in September, 1974. An intensive programme on generation, collection and compilation of scientific and technical data through field investigations on various aspects of water pollution and its prevention and control has been initiated since September, 1976. With a view to disseminate information, the Central Board has also undertaken the task of publication under the following presently conceived series titles :

Programme	Objective	Series	(PROBES)
Control of Urban Pollution		Series	(CUPS)
Assessment and Development Study of River Basin		Series	(ADSORBS)
Comprehensive Industry Document Series			(COINDS)

The present publication is the first in the ADSORBS series and is to be followed by reports on similar river basin studies. It is believed that the report would be found useful by those involved in the work of restoring and preserving the quality of natural water bodies.

The report enunciates the problems of water pollution associated with Industrial Estates, quantifies the impact of these Estates on water quality of the two rivers flowing nearby and proposes a master plan for prevention and control of water pollution in a phased manner for the entire basin of the two rivers. This report merits publication because its contents reflect the situation in most of the Industrial Estates in India. For this reason, development of Planning Guides for Industrial Estates is receiving the attention of the Central Board.

This investigation would not have been possible without the active cooperation of the Gujarat Industrial Development Corporation, the Gujarat State Board for the Prevention and Control of Water Pollution and the Government of Goa, Daman and Diu.

Dr. R. Pitchai, Professor, Guindy College of Engineering, Madras, helped this investigation as Programme Adviser. Dr. K.R. Ranganathan of Central Board coordinated the investigation.

Shri K. V. Swaminathan, Miss Kanchan Bala, and Shri Bidhi Chand of Central Board shared the typing load among them.
