

SPEED POST

B-751(505)/Textile/WQM-11/CPCB/2017-18

11th September, 2017

10272

To,

M/s Kesoram Rayon,
P.O. Nyasari, P.S. Morga,
Hoogly-513, West Bengal.

Directions under Section 5 of the Environment (Protection) Act, 1986 –reg.

WHEREAS, the Textile dyeing and bleaching industries are identified as one of the Grossly Polluting industries (GPIs) which have been discharging environmental pollutants directly or indirectly into the ambient air and water, having potential threat to cause adverse effect on the water and air quality; and

WHEREAS, the Central Government has notified the general discharge standards of environmental pollutants from various categories of industries under the Environment (Protection) Act, 1986 and the rules framed there under;

WHEREAS, the Ministry of Environment & Forests, Government of India, vide Notifications No.S.O.157(E) of 27.02.1996 and S.O.730(E) dated 10.07.2002, has delegated the powers vested under Section 5 of the Environment (Protection) Act, 1986 (29 of 1986) to the Chairman, Central Pollution Control Board, to issue directions to any industry or any local body or any other authority for violations of the standards and rules notified under the Environment (Protection) Rules, 1986 and amendment thereof; and

WHEREAS, M/s Kesoram Rayon, P.O. Nyasari, P.S. Morga, Hoogly -513, West Bengal (here in after referred as 'the unit') is a rayon grade fibre unit; and,

WHEREAS, inspection of the unit was conducted on May 12th, 2017 to check the status of compliance of prescribed norms and following are the main findings of the inspection.

- 1) The unit was found operational at the time of the inspection.
- 2) **The unit has arrangement to bypass the non-zinc bearing effluent directly into the River Ganga.**
- 3) The unit has bypass arrangement of non zinc bearing effluent connected with the downstream of final outlet through which the untreated raw effluent may be drained into the river Ganga after mixing with treated effluent.
- 4) The analysis results of the effluent collected from the final outlet of the unit showed pH of 6.7 (against the notified standards of 6.5-8.5), TSS of 77 mg/l (against notified standards of 100 mg/l), BOD of 9 mg/l (against notified standards of 30 mg/l), COD of 62 mg/l (against notified standards of 250 mg/l) which indicate compliance with the prescribed norms.

Contd..

AND WHEREAS, the unit is required to dismantle and remove all bypass arrangement and no effluent should be discharged without providing treatment to ensure compliance with the effluent discharge standards:

NOW, THEREFORE, in view of the above and in exercise of the powers delegated to the Chairman, Central Pollution Control Board under Section 5 of the Environment (Protection) Act, 1986, the unit, **M/s Kesoram Rayon, P.O. Nyasari, P.S. Morga, Hoogly -513, West Bengal** is directed to close down the manufacturing process and dismantle the bypass arrangements immediately and to report the same to CPCB within 15 days for verification till such time the unit shall be closed.
