

Sewage Management in Trans - Yamuna Region of delhi: Status and Needs

Foreword

One of the functions of the State Pollution Control Boards constituted under the provisions of Section 17 (f) of the Water (Prevention and Control of Pollution) Act, 1974 is "To inspect sewage or trade effluents, works and plants for the treatment of sewage and trade effluents and to review plants, specifications or other data relating to plants set up for the treatment of water, works for the purification thereof and the system for the disposal of sewage or trade effluents or in connection with the grant of any consent as required by this Act'. In order to translate this mandate into practice, the Central Pollution Control Board has surveyed and published various documents under the Control of Urban Pollution Series (CUPS).

The present document is based on micro-level in-depth study in the Trans- Yamuna area of the National Capital Territory of Delhi. A team of the technical and scientific officials of the Central

Pollution Control Board under the leadership of Sh. N.K. Verma, Additional Director and Dr. D.D. Basu, Senior Scientist conducted the study. The findings, observations and a 'Comprehensive implementation plan for up-gradation of status of sewage management in the region are outlined in this document. The contribution of Shri N. Sateesh Babu, Assistant

Environmental Engineer and Shri S.K. Sharma, Retired Assistant Chief Water Analyst, Delhi Jal Board, is gratefully acknowledged. The manuscript of the entire document is edited by Dr. S.P. Chakrabarti. We hope, this document will be helpful for State Pollution Control Boards, Municipal Corporations, Development Authorities and others concerned with the sewage
