Training-cum-Workshop Program on "Online Continuous Emission/Effluent Monitoring Systems (OCEMS)"

Online Continuous Emission Monitoring Systems have been installed in highly polluting Industries in the country and data generated is being transferred to CPCB/SPCB on real time basis. Based on data exceedances, alerts are being generated and forwarded on the fly to various stake holders of this systems including the representatives of industries and officials of SPCB and CPCB for taking immediate corrective actions for controlling pollution from industries.

In this regard a Training-cum-Workshop is being organized by CPCB on 21st to 22nd May'2019 for its various officials involved in the process of inspections at Regional Directorates to understand instrumentation and its deployment procedure based on different technologies available in the field. Demonstration of instruments operational in field based on available technologies as per guidelines has been considered as an important factor.

Instrument Manufacturers, have been invited to demonstrate latest technology based instruments, deployed for OCEMS monitoring field.

Manufacturers operating in the field of OCEMS providing Instruments for OCEMS may kindly contact at bvbabu.cpcb@nic.in, 011-43102296 and aditya.cpcb@nic.in, 011-43102300 if interested in participation in this workshop at the earliest.

Thanking you,
